

The Semi-Weekly Miner

THE CIRCUIT RACKET.

HORS D'ALEINE.

Resume of the Situation in the New Mines from a Recent Arrival.

The Gulch Towns, Trails, and Railroad Points of Entrepot.

Gold Galore in the Ground but Little in Circulation.

Mining Notes from the New Eldorado.

From a well informed gentleman who recently arrived from the so-called "Old Elms" mines, the following interesting notes are given regarding the various errors and misapprehensions of fact, etc., which have been misconceived of late, etc.

The information regarding the entire country, the most remarkable is the fact which now seems apparent that the mines in the country are not in the Bitter Root range extending in a north-westerly and southeasterly direction about twenty-five miles south of Eagle City and that the range of mountains now yielding its wealth of treasure to the indefatigable miner on Pritchard creek, was christened Hors d'Aleine by the Hudson Bay Company packers forty years ago.

Those who have scaled the rugged heights of "Old Baldy" will recognize the propriety of the name, which, literally translated, means "out of breath." The fact, which is sustained by the evidence of a Jesuit priest who has resided at the Old Mission during the past forty years, as well as by Indians, trappers and others who are familiar with the mountain, is that the name was first used by the Hudson Bay Company packers forty years ago.

A First Lesson in Handling a Gun.

The first thing to be learned is to stand properly. Plant both your feet naturally and firmly on the ground, so that the joints of your legs are neither stiff nor bent; then lean the upper part of your body slightly forward, and your arms should be held straight out in front of you, the forefinger lightly touching the forefinger of the other hand. The trigger of the gun, that is, the trigger of the right hand barrel. The stock of the gun, a few inches in front of the guard, must rest easily in the hollow of the left hand. Hold the muzzle of the gun up, and slanting away from you, so that the lower end of the butt is just lower than your right elbow.

Now, if both hammers have been cocked, and you gently and swiftly draw the butt of the gun up to and against the hollow of the right shoulder, you will find yourself in a good position for taking aim, which is best done by keeping both eyes wide open and looking straight over the sight between the barrels with the right eye.

You will soon discover the trick of doing this, by fixing your aim with both eyes open, and then, holding it perfectly steady, closing the left eye. In the line of sight now, if you have not sighted correctly, if it remains fixed the aim has been taken with the right eye. Be careful after firing never to set your gun down upon the hammer; if that is the cause of many deplorable accidents. To avoid accidents you must be constantly on the alert and always be looking over the sight between the barrels with the right eye.
