

The Havre Herald

W. C. KESTER, Prop. and Pub.

Entered at the postoffice at Havre, Montana, as second-class mail matter.

HAVRE, FRIDAY, OCT. 11, 1907.

Official Paper of the City of Havre

The Chinook Opinion had another spasms last week, it said: "The county fair was boycotted by the Havre business men this year, tho that did not prevent the fair's success. The fair is primarily designed for the benefit of the ranchers and farmers of the county. Havre merchants are now appealing to those ranchers and farmers for trade. The ranchers and farmers should give them the same treatment that they gave the fair. The Chinook merchants and business men have stood by the fair, the ranchers and farmers should remember that."

Now there was not a boycott of the Chinook fair by Havre merchants or by any one else in this city. No especial effort was made on the part of the fair management to secure the attendance of the Havre people on the day set aside as Havre Day and it was not known that such had been done until two days before the date. Havre and her citizens were tired of conventions and public gatherings— as a result no one made any move to get up a crowd, though many went from this city. There was no boycott, intended or implied, and its silly nonsense to keep knocking—Wake up!

The people of Montana want a direct primary law. Under the old optional law all of the counties which voted upon the proposition adopted it except two. In the face of this, however, the legislature repealed the optional law, while each party failed to keep its platform promise to provide the state with a good direct primary law—Whitefish Pilot. Yes, the republicans having control of the legislature did.

If the railroads exercised a "bit of the ingenuity" to make a two-cent fare a success which they spend so largely to give the big shipper the worth of his money, there would be no need of calling on the courts, not even in Alabama.

If the people are punished hereafter in proportion to their misdeeds on earth, it is going to tax the Old Man's ingenuity to think up something sufficiently strenuous for the man who started the souvenir post card epidemic.

A Chicago woman has sued a dentist for \$10,000 damages because in extracting her tooth, he injured her jaw to such an extent, that she cannot speak. Depriving a woman of her chief luxury in life, certainly is a grave offense.

One writer claims that it makes a man look intellectual to chew tooth-picks, but any one compelled to resort to such an intellectual appearance is liable to wind up in the foolishness.

Of course, we understand, that hot weather is good for the corn crop, but it's a shame that the weather department doesn't devise ways and means of confining it to the cornfields.

Dr. Mark Twain is to preside at the British day celebration at Jamestown Exposition, and naturally seize on the opportunity to give his personal recollections of the original steamboat man.

The new plan to make Governor Hoke Smith, of Georgia, a United States senator, will work out more easily than the other plan to make him president of the United States.

One of the surest signs of the approach of fall may be found on the sporting pages, where the pictures of football heroes in their hideous harness are again appearing.

It is said that more druggists own automobiles in Kansas than in any other state in the union. Kansas being a prohibition state may have something to do with it.

"We must walk in the light," says John D. Rockefeller. And, while he doesn't say it, it is not to be doubted that he means the "kerosene light."

Some people may have voted the republican ticket in Oklahoma on the ground that a republican president wouldn't let a democratic state in.

As we understand it, neither the President nor the Vice-president order of those cocktails, and Loeb drank 'em. Why all this controversy?

Foraker's friends are asserting that he is "dead game." In that case, we suppose the President will waste no more ammunition on him.

At least, Judge Parker shows a greater willingness to talk in advance of the 1908 Democratic convention than he did in 1904.

Gov. Von Yonson hasn't declared against the third term theory—so far as the governorship of Minnesota is concerned.

Senator Dixon says one-third of Montana's democratic vote would go to President Roosevelt—wonder if it would?

"Advice is plentiful," says the Birmingham Age-Herald. Yes, indeed; in fact, the supply greatly exceeds the demand.

"Texas is said to be for Taft for president," says the Dayton News. Texas didn't say it however.

BUFFALO ARE KILLED

WHILE BEING LOADED.
The loading of the famous Pablo herd of buffalo has almost been completed at Ravalli, and animals will probably pass through Great Falls on their way to Banff, Alberta, this week.

A. Avete, agent of the Canadian government, came down last night from Ravalli, where the loading of the buffalo is in progress, says the Missouli. It is expected that the last of the big animals will be loaded today. Charles Allard and Michel Pablo are expected in from Mud creek with 60 head, which will make the total shipment a little more than 200. If there is no more than ordinary trouble in loading this lot, the last of the bison will be in the cars and ready to start for Canada tomorrow.

There has been more than trouble with this lot; it has been real grief. Yesterday one of the big fighting bulls got away and ran through Jno. Wightman's orchard fence, taking fences, trees and landscape with him. Then he went over to the railway track and planted himself in front of a freight train, which was tied up till the buffalo could be removed from the track.

Two of the finest animals in the bunch have been killed while loading. One, one of the largest bulls of the lot, ran against the side of the car into which he had been driven and he struck the side with such force that he broke his neck and died at once. The other, also a big bull, died from the effects of overheating; he ran a long way and dropped dead in his tracks.

Mowers, Rakes and Oats for sale at Gussenhoven's Lumber Yard.

TEACHERS' INSTITUTE HERE NEXT WEEK

The joint session of the Teachers' Institute for Valley and Chouteau counties is to be held at Havre, October 14 to 17, inclusive.

The following instructors and lecturers have been secured: State Supt. W. E. Harmon of Helena; President J. M. Hamilton, of the Agricultural College, Bozeman; Prof. Robt. Clark, of the State Normal, Dillon; and Mrs. Maud Summers, an eminent lecturer, of Boston.

PROGRAM:

- Monday.**
9:15. Roll call and singing.
9:30. Address—Prof. Harmon.
10:10. Lecture—"Learning to Read," Prof. Clark.
10:50. Rest.
11:00. Psychology—Prof. Clark.
11:40. Discussion.
12:00. Intermission.
1:25. Music.
1:35. Arithmetic—Prof. Hamilton.
2:15. Address—Prof. Harmon.
2:55. Rest.
3:05. Lecture—"Children's Literature," Miss Summers.
3:45. Dismissal.
- TUESDAY.**
9:00. Opening Exercises.
9:15. History—Prof. Hamilton.
9:55. Lecture—"Oral Language," Miss Summers.
10:40. Rest.
10:50. Psychology—Prof. Clark.
11:30. Address—Prof. Harmon.
12:00. Intermission.
1:25. Music.
1:35. Arithmetic—Prof. Hamilton.
2:15. "School Management," Prof. Clark.
2:55. Rest.
3:05. Address—Prof. Harmon.
3:45. Dismissal.
- WEDNESDAY.**
9:15. Opening Exercises.
9:25. History—Prof. Hamilton.
10:45. "School Management," Prof.

- Clark.
10:45. Rest.
10:55. "Course of Study and System of Grading in Rural Schools," Prof. Harmon.
11:40. Discussion.
12:00. Intermission.
1:25. Music.
1:35. Lecture—"Written Language," Miss Summers.
2:10. Reading—Prof. Clark.
2:50. Rest.
3:00. Address—P of H Hamilton.
THURSDAY.
9:15. Opening Exercises.
9:25. Address—P of H Hamilton.
10:05. Lecture—"Arithmetic," Miss Summers.
10:45. Rest.
10:55. Reading—Prof. Clark.
11:35. Discussion.
12:00. Intermission.
1:25. Business Session.
2:00. Rest.
2:10. Music.
Lecture, Miss Summers.

On Monday evening there will be an informal reception given at the Hotel Havre, with music by Hila's orchestra. On Wednesday evening a lecture will be given by Prof. Robert Clark of Dillon. Further entertainment will be provided and announced later. Everybody is invited to be present at any or all sessions.

SELECTIONS

THE SEA HEDGEHOG.

It Will Swallow Air Until It Swells Into Involuntarily.

Of fishes a large number are protected from hostile attack by a covering of prickles. By far the most curious examples are the globefishes or "sea hedgehogs" of the Atlantic and Indo-Pacific oceans. The extreme length of the globefish is something less than two feet. It has thick lips and goggle eyes, which give it the appearance of a good natured countryman. Courage it seems to lack, and one might suppose that such a simpleton would fall an easy prey to the first shark or dogfish it encountered. Yet the globefish is able to take care of itself. It never under any circumstances attacks the enemy, yet is always ready to receive him in a suitable manner should he provoke hostilities.

Let us suppose that a shoal of globefishes is swimming tranquilly in the clear waters when it is suddenly surprised by a hungry shark. Of course the little fellows scuttle hither and thither in uncontrollable alarm. But the shark, posing himself upon his powerful tail, leisurely singles out one of the feeble globefishes and sets out in pursuit. Now, although the globefish is a good swimmer, it is no match for the shark. The chase is in every way unequal and can have but one ending. Within a few minutes of its commencement the shark must overtake the globefish. But the quarry is well aware of its danger. It makes a bee line for the surface and as soon as it gets there begins to take in great gulps of air.

Then a strange thing happens. The fish that only a moment before was thin and small begins to grow stouter and stouter until, like the frog in the fable, it seems in danger of bursting. It stops inflating itself, however, just in time to avert this catastrophe. But its skin has become as taut as a drumhead, and the whole of its body is covered with sharp, erect prickles. It has become a sea hedgehog, and the hungry shark which comes surging through the water dares not touch it, but turns tail in search of something more eatable. Of course the globefish was covered with prickles all the time, but in periods of tranquillity these lie comfortably along its sides, just as do those of the hedgehog. Unlike its land prototype, however, the sea hedgehog is unprovided with a special muscle for erecting its prickles, so when danger threatens it has recourse to the mechanical method of inflating the whole body with air or with water. If it cannot reach the surface quickly.—Scientific American.

Living Room.

In a living room where all things receive constant use, and hard use at that, it is often something of a problem to know what to have as covering for the couch cushions, beauty being desired as well as durability. The materials that have proved most satisfactory from every point of view are the art tickings, cretonnes and chintzes. These all stand repeated laundering as well as hard wear. They are pretty and possessed of great variety as to color and design. Stripes, floral designs galore and beautiful Persian patterns may be had in these cottons and linens, and when used in conjunction with each other they make of the living room couch a most cozy and inviting spot, luring the unsuspecting on to many an idle hour.

Let Us Forget.

This is the age of utilitarianism and we are apt to forget, says the Los Angeles Times, that the well being of our nature requires something more than the mere satisfying of our physical hunger and that, although fruits are indispensable, lovely trees and scented flowers in towns are necessary, too, if we would get out of life all that goes to make life worth living.

A STYLISH FALL SUIT OR OVERCOAT

Is an essential part of every man's wardrobe. We have the best and most complete line of Fall Overcoats in the city, Grays, Mixed Grays, Browns, Mixed Browns, Shadow Plaids and Dark Colors.

OUR CLOTHING IS MADE ESPECIALLY FOR US BY THE BEST AND LARGEST MANUFACTURERS.

Men's Suits

You'll be sure to find the suit that pleases you in color, fabric and fit.

A special Discount on all Suits for Bargain Week.

Men's Overcoats

Overcoats like the Suits are here in endless variety, very stylish in cut and the latest models.

A Special Discount on all Overcoats for Bargain Week.

Hats

Get a Hat that will give you all the Hat satisfaction. Correct shapes and guaranteed fast colors. All the correct shapes in stiff and soft. Famous Kingsbury Hat sold all over for \$3.50. Bargain week. . . . \$2.15

Boy's Clothing

Boy's suit, long and short pants, regular values, \$4. 5, 6 to \$7 for bargain week. . . . \$2.85
Dr. Wright's Sanitary fleeced lined underwear sold all over this land for 2.50 & \$3; bargain week \$1.90

We have many surprises in store for you for the coming week. We want outside visitors to make their headquarters with us. There will be something doing all the time you are in Havre. We extend to you all a Hearty Welcome.

M. AUERBACH & SON.

THE CYCLONE.

How This Wonderful and Destructive Air Fury is Formed.

To get an idea of a cyclone's formation imagine a large circular pan or tub with quite a large hole in the middle of the bottom. With this hole plugged, fill the vessel with water, then draw out the plug, and watch. There is first a rush of water from all directions toward the hole and a turbulent effort to get through; then the water surface above begins to sink and swirl, the particles gradually circling around and around and rushing, ever faster, toward the center. At last there is actually a hollow space through the center, around which all the water in the tub is whirling sluggishly near the rim, but with more and more violent rapidity toward the middle until it rushes downward through the bottom. Now, if that water were air you would be watching a little cyclone turned upside down, for the air rushes upward instead of downward.

In the cradle of cyclones during the summer months, when the land and the water grow hotter and hotter because of the longer days than nights, a layer of air, hot, light and full of vapor, is for a time held down by denser air above it. Restless, expanding, tumultuous, it moves about like a beast at bay until a thinner place in the air above is found; then up it madly rushes, and into the vacuum left behind the lower atmosphere hastens from all directions, pushing and twisting and pouring upward until it has fallen into a regular spinning around a common center.

The cyclone, once formed, rushes away from the tropics toward the pole and begins its career of destruction, bruising, wrecking and sinking the luckless ships which happen to be in its path. More and more of the surrounding atmosphere is drawn into the whirl until the storm often covers an area nearly 1,000 miles in diameter. Sometimes it flings itself upon our Atlantic coast and tears fiercely through forests, fields and cities. Then, again, it sweeps away across the broad ocean and dashes itself upon the coasts of Europe. Once in awhile it so adroitly avoids the land that we never know it has passed until ships come in torn and broken.—St. Nicholas.

Hard on the Reporters.
"I had a strange dream the other night," said the major.
"What was it?" asked the young thing.
"I went to heaven and as an old newspaper man was interested in their journal up there. It was a miserable thing—not a well written story in it—and I told St. Peter so."
"What did he say?"
"He said: 'It's not our fault. We never get any good reporters up here.'"
—Philadelphia Press.

Why a Backbone Beats a Wishbone.

"Trouble with most fellers," says Uncle Si Simlins, "is that their backbone is mostly all wishbone."

Uncle Si's sage sarcasm applies to people in every town. Some of us in this town might study it with profit.

You wish you could succeed in business. You wish you could do as well as your neighbor who does succeed. You are overworking your wishbone. Give your wishbone a rest. It's tired.

YOUR BACKBONE NEEDS EXERCISE. IT'S BACKBONE THAT DOES THINGS—NOT WISHBONE. STRENGTHEN YOUR BACKBONE AND GO UP AGAINST COMPETITION.

Marshall Field had competition, but his backbone gave him the nerve to advertise big in newspapers when advertising was not known to be such a Necessity of Business Life as it is now universally recognized. John Wanamaker had the same sort of backbone.

Their backbone backed up their wishbone.
Backbone builds business by booming business.
Business is boosted by backbone.
And the backbone of business is newspaper advertising.
