## Sup't. Smith to Graduating Class.

The following are extracts from the very able address delivered by County Superintendent, Miss M. V. Smith, to the 8th grade graduating class:

"You have laid a good foundation for the superstructure which you are about to build. You belong to a class that in a few years will be at the head of affairs in politics, religion and commerce, not only in your own town but in the state and nation. And I would that tonight you might pause as it were, and take one good look into the future and ask—'which place am I to fill? And as you look and behold the teacher's desk, the preacher's pulpit, the statesman's chair, the mechanic's shop, the merchant's office and the many other places to be occupied, I would have you ask—'what must I do to be ready to fill one of those places? And the answer must be—make preparation by continuing in the work in which you have been engaged for the past few years.

"You are endowed with God given powers and these must be developed if you become the men and women that you ought to be. If they are not developed you will lose even that which you have. 'For he that hath to him shall be given and he that hath not, from him shall be taken even that which he hath.'

The right kind of education will develop the powers of the mind and soul so that you will be able to think and do your best. 'What sunlight is to the eye, education is to the intellect.'

"In closing I would congratulate you on the good record you have made and say that we will expect great things of you in the future. The day is coming—yes, is now at hand—when the youth of Lewis and Clark will fill many of the places of honor and responsibility. And who can do it better? We believe in you. We believe in building up our teaching force from your ranks; in giving you places of trust as you are fitted for them. We believe in home talents, home products and home industries.

## SOME ADVICE.—AND A STORY.

There is a somewhat ancient lesson contained in the following from the *New York World*, but it is so excellent that the story is produced here:

"Don't advertise if you believe you are wasting money. Let your competitor waste his money on advertising, and perhaps in this way you'll soon put him out of business. Just stand back and laugh at him when you see him squandering his money for printers' ink. Once there was a boy named,—we think his last name was Wanamaker, or maybe Money-maker; anyhow, his name was John, with some sort of a maker attached yards of calico, three pairs of jeans, and a half dozen pairs of boots. He called this a dry goods store through a Philadelphia newspaper, and offered to sell a pair of socks for 30 cents. The don't-believe-in-advertising just laughed. Young John spent vertice just one time, and not less than \$100 worth of goods. He was cautioned by the merchants who 'knew it didn't pay.' It was through sympathy that they offered him advice.
