

"Teach Them To Shoot"

Remington UMC
22 Caliber Rifles

THE American father today has pretty much forgotten the old notion that any chance rifle "will do" for his boy. The known facts about rifles point as strongly to Remington UMC in the 22 calibre arm as in the big game rifles.

Every year, thousands of boys the country over are given a Remington UMC 22 Cal. Rifle and are taught how to use it by their fathers. It is a good investment with any developing youth.

Remington UMC 22 Cal. Repeating Rifle with the famous Remington UMC Side Action and Solid Bolt—barrelless and safe. Shoots 15 Shots, 12 Loads or Long Rifle Cartridge (without reloading) and takes apart without tools.

Remington UMC 22 Cal. Autoloading Rifle—15 shots, handling Remington UMC Autoloading 22 cartridge (removes) Hammerless. Magazine in stock. Take-down without tools.

Clean and oil your gun with REM. CO. the combination Powder Solvent, Lubricant and Rust Preventative.

Sold by your home dealer and 517 other leading merchants in Montana.

Remington .22 Repeating Rifle Model No. 12

640-ACRE BILL NOT YET A LAW

GRAZING HOMESTEAD MEASURE PASSES BOTH HOUSES BUT MUST GO TO CONFERENCE. BE IN OPERATION NEXT SPRING

From numerous reports throughout the public land states many have been led to believe that the "grazing homestead" or 640-acre bill has become a law. This erroneous rumor is founded upon the fact that this bill did pass both the house and the senate. However, there was a number of amendments attached to the bill during the closing hours of the senate, which, of necessity, must go to conference and did not reach that point when the house finally adjourned. In order to correct this erroneous rumor, the department of the interior has issued the following circular:

"The newspapers throughout the country announced immediately after the adjournment of the recent session of congress, that a law had been enacted allowing homestead entries for 640 acres of grazing land.

The newspaper articles were based on the fact that during the last day of the session the senate passed H. R. 407, 'A bill to provide for stock raising homesteads, and for other purposes,' but with various amendments. The house of representatives thereafter took no action on the amended bill and hence the measure was not submitted to the president for approval.

The amended bill will probably be considered by a conference committee of the two houses upon reconvening of congress next December.

From the above it will be seen that it is more than likely the 640-acre bill will become a law sometime during the winter session, and will probably become operative during the summer of 1917.

This rumor has become so persistent that many applications have been offered at the local land office, which were necessarily, rejected.

RUSH WORK ON GYPSUM PLANT

UNITED STATES GYPSUM COMPANY TO OPEN BIG MINE UP SPRING CREEK. GYPSUM AVAILABLE IN FERGUS

Will V. Shoemaker, local representative of the United States Gypsum Company, was in from the workings on the Clara Daily ranch about one mile east of Heath Thursday and informed the first set of timbers had been erected in the slope. This would indicate this company will soon be ready for business so far as their underground operations are concerned. Several days ago the Milwaukee railway company's engineers made a survey for the spur track which will be built at once, and just as soon as that track is completed building materials for the plaster plant will start to arrive. When asked the capacity of the plant that would be built, Mr. Shoemaker stated he had no definite information in the premises since all the plans were being prepared in the Chicago office of the company, but emphasized the fact the plant would be modern in every particular.

At this time they have twenty-five men employed in the camp and this number will unquestionably be increased when construction of the mill commences.

Mr. Shoemaker came here last December and spent a great deal of time prospecting before he finally selected the place for their operations. The company now has under lease 300 acres which contains a 14-foot vein of which 8 feet is easily workable, and they place an estimate of the gypsum available at 7,000,000 tons.

The man in charge of this work, Mr. Shoemaker, has been affiliated with this company in Virginia, New York and Montana, and has been engaged in doing their development work for some years, but maintains the body he is now working on is the best grade of gypsum he has ever developed.

FERGUS WINNER

Judith Basin Carries off Honors at the Montana State Fair. BEST GRAIN EXHIBIT

For the Fifth Time Fergus County is State Fair Winner of the Honors on Best Exhibit of Grain, Winning the Prize of \$200, Together With Many Awards in Industrial Lots, Places Fergus County in the Lead of the 29 Counties Exhibiting—Also Receives Prize for the Best Display and Arrangement of Exhibit.

HELENA, Sept. 29.—Fergus county is five times state fair winner of the honors on best exhibit of grain, it was decided by the judges in agricultural hall this afternoon. With that glory goes a prize of \$200. Scarcely second in important winnings is Fergus' victory in the contest for the best display and arrangement of exhibit, also awarded today. These triumphs, together with many awards in individual lots, places Fergus county in the lead of the twenty-nine counties exhibiting.

The awards in four of the county collective exhibits announced this afternoon follow: Best exhibit of grain, Fergus, first; Park, second; Missoula, third; Sweet Grass, fourth. Best exhibit and largest variety of grasses and forage crops, Park, Beaverhead, Madison and Cascade. Largest variety of grains and grasses and vegetables, Lewis and Clark, Madison, Yellowstone and Park. Best display and arrangement of exhibit, Fergus, Park, Cascade and Missoula.

Today's attendance at the state fair swelled by crowds of Great Falls visitors who were special guests, exceeded by 1,200 the gate figures of Friday last year and brought the total for the week far ahead of the first five days of 1915. Tomorrow's crowd may be exceedingly sparse and still this year's attendance figures will stand as a record.

Today's prize winning stock paraded before the grandstand. The sleek horses and cattle represented more than a million and a half dollars and made a procession half a mile long.

Some awards were made today. To T. S. Bullard of Three Forks, was awarded the Stimpert Implement company's special premium of a three-horse power gasoline engine valued at \$100 for the best single head of oats raised on a dry land farm. W. V. Talbot of Armington, Cascade county, won the state fair special on oats with five sheaves and a bushel of threshed Scottish Chief. His threshed bushel weighed 49 pounds, exceeding by three pounds any other bushel on the judges' tables.

Prize winning grain, grasses, forage crops and vegetables were arranged today for display in the Montana booth at the Northwestern Land Products exposition in Seattle, October 4 to 14. Most of the counties exhibiting here contributed to the general collection. Montana is sending a worthy representation of products to enter in competition with five other northwest states. A large booth has been obtained in the big exposition hall and those promoting the display are confident of taking down the trophies.

THE GOOD JUDGE SETTLES A MISUNDERSTANDING.

WILL YOU FOKE ANY MAN IN THE JAW THAT SAYS THE REAL TOBACCO CHEW IS NOT THE REAL TOBACCO CHEW? COME CUT IT. THE REAL TOBACCO CHEW IS NOT THE REAL TOBACCO CHEW. WAIT, BOY, YOU'RE BOTH RIGHT. THE REAL TOBACCO CHEW IS NOT THE REAL TOBACCO CHEW. BOTH ARE THE REAL TOBACCO CHEW. NOW SHAKE HANDS.

YOU want to remember that the same fine stock is used in both W.B. CUT and Right-Cut. The difference is that one is long shred and the other is short shred, both seasoned with a bit of salt. You will know real tobacco satisfaction when you cut out the old kind and take up either one of the Real Tobacco Chew twins. A little chew lasts and satisfies.

WORLD'S SERIES WILL BE PLAYED BETWEEN BOSTON AND BROOKLYN

NEW YORK, Oct. 3.—The Boston American league club and the Brooklyn Nationals will meet in the 1916 world's series, the opening game of which will be played on the National league field at Boston next Saturday, Oct. 7. The teams will remain in Boston over Sunday and play the second game of the series there Monday, Oct. 9, weather permitting, after which they will go to Brooklyn for two games at Ebbet's field on Tuesday and Wednesday, Oct. 10 and 11. The fifth and sixth games, if necessary, will be played Thursday, Oct. 12 and Friday, Oct. 13, at Boston and Brooklyn, respectively. Should a seventh game be necessary to decide the series, the place of the contest will be decided by the toss of a coin, as in years past. All these details were arranged at a meeting of the National Baseball commission today.

The umpires were announced tonight as follows:
American league—Dineen and Connelly.
National league—O'Day and Quigley.

BRANCE STANTON RECEIVES THE CONTRACT FOR THE DORMITORY

The contract for the erection of the new high school dormitory was awarded Monday by the Fergus County Improvement company. All work was let to the lowest bidder, Brance Stanton receiving the contract for the erection of the building on a bid of \$15,500, and the Kane company the plumbing on a bid of \$4,262.50. The following bids were received for the erection of the building: S. C. Ditty, \$18,162; Sound Contracting company, \$16,594; Rude and Seares, \$16,594; I. Aven, \$16,297; Brance Stanton, the successful bidder, \$15,500. The installing of the plumbing bids were as follows: Kane company, the successful bidder, \$4,262.50; A. A. Stapleton, \$4,538; Winters & Sullivan, \$4,560.

MRS. BAKER HAS BUSY DAY.

Monday was an unusually busy day in the office of County Superintendent of Schools Baker, six hearings being held, three for the change of boundaries of districts and three for the creation of new districts. Districts 26 and 29, 31 and 33, and 41 and 43 were changed their boundaries in a manner which will make the schools more accessible for the pupils, and residents of districts 29, 29 and 41, 39, 41 and 39 wish to create new districts.

CONTESTS FILED.

A contest has been filed at the land office by Peter Halpin of Lewistown against Fern E. Skunkin for land in abandonment of same by eminent domain. C. E. McKohn is attorney for the contestant.

Joe Rathe of Roundup has filed against Isaac J. Biston of Mildred for abandonment of land in 26-11-23. C. H. Tyler is contestant's attorney.

LOCAL CHEESE FACTORY ONE OF LEWISTOWN'S LARGE INDUSTRIES

The hope that Lewistown may at some time become the dairying and dairy products center of the state became one step nearer realization Monday when the local cheese factory, for the first time since it started operation, was able to bring its output beyond the quantity required for home consumption. Monday 8,000 pounds of cheese from the home factory was hauled to the Milwaukee freight station for shipment to Butte. It is hoped this shipment will be epochal in the history of the cheese industry here.

INDICATIONS OF RAPID GROWTH

STATISTICS OF MONTANA POWER CO. SHOW LOCAL POPULATION IS ON THE INCREASE. MANAGER IS MORE THAN PLEASED

That Lewistown is substantially growing in population has no surer indication than the fact that the Montana Power company's office in Lewistown has installed seventeen new meters during August and fifty during September. From the present outlook October also will show a phenomenal increase. This fact speaks more than well for the town itself from any viewpoint considered.

Is Strong for Lewistown.

Manager Schmidlapp, who came here recently from Livingston, made the statement yesterday that Lewistown has far exceeded his first expectations in the amount of business he found to be actually carried on here. He says that in his estimation this town undoubtedly is the biggest little city in Montana. He is perfectly satisfied to be identified with the unlimited resources of the Judith basin and its undeniable future growth and prosperity.

New Line Progressing.

Mr. Schmidlapp reports very satisfactory progress of the new power line which his company is constructing from Rainbow to Two Dot, Harlowton and Lewistown. With the stations at Lewistown, the new line will afford this city the best power service of any city in Montana as the town will derive electric supply from three distinct sources. With the new line completed there will be little or no possibility of power being entirely cut off in Lewistown.

Slip a few Prince Albert smokes into your system!

You've heard many an earful about the Prince Albert patented process that cuts out bite and parch and lets you smoke your fill without a comeback! Stake your bank roll that it proves out every hour of the day. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

There's sport smoking a pipe or rolling your own, but you know that you've got to have the right tobacco! We tell you Prince Albert will bang the doors wide open for you to come in on a good time firing up every little so often, without a regret! You'll feel like your smoke past has been wasted and will be sorry you cannot back up for a fresh start.

You swing on this say-so like it was a tip to a thousand-dollar bill! It's worth that in happiness and contentment to you, to every man who knows what can be gotten out of a chummy jimmy pipe or a makin's cigarette with Prince Albert for "packing"!

THE Prince Albert side and in fact, every Prince Albert pack has a real message to you on its reverse side. You'll read "Process Patented July 30th, 1907." That means that the United States Government has granted a patent on the process by which Prince Albert is made. And by which tongue bite and throat parch are cut out! Everywhere tobacco is sold you'll find Prince Albert awaiting you in its red tin, its handsome gold and half-pound tin humidors and in that clever crystal-glass moisture trap that keeps the tobacco in such fine condition—always!

COMFORTABLE HOUSES SMALL COAL BILLS

The Reason

In the ordinary heater the draft enters the front, passes up through the fire and out the flue at the top. In this way only about 60 per cent of the burnable properties of your fuel are consumed, the rest passes up the flue unburned in the form of gases and smoke. In the

WILSON HEATER

the Hot Blast Down-Draft enters from the top, circulates throughout and over the fire and produces perfect combustion, which consumes all of the burnable elements in your fuel; thus the Wilson will give you 40 per cent more heat with a given amount of soft coal than any other heater, or in other words, your fuel bill will be reduced 40 per cent.

Is this worth considering?

\$2.50 to \$37.50
