COLOMBIA'S CONTRARINESS

Progress of the World Being Blocked by the Attitude of That Country on the Canal Question.

RIGHT OF EMINENT DOMAIN

Colombia Not Living Up to Agreement and the United States May be Forced to Radical Action.

Chicago, June 24.—Walter Wellman, in a Washington special to the Record-Herald, says:

Possibilities of international complications over the Panama canal give the administration some concern. A plain statement of the facts show that the situation is one which must cause anxiety until it is cleared up in one way or another. It is not true that President Roosevelt has threatened to seize the isthmus. It is not true that our government is intriguing to bring about a secession from Colombia by the state of Panama and its neighbor, Cauca, with a view to the ultimate acquisition of the canal territory of the United States. But this has occurred: The administration has taken a firm stand in favor of the general proposition that Colombia shall not be permitted to block the world's progress and that in one way or another that government must redeem its obligations to the United States. Various expressions to this effect, decisive, but temperate, have been made in the proper quarters and no doubt have reached the ears of government leaders at Bogota. Of course it was intended they should be transmitted thither. These expressions can not be regarded as a threat. No effort is being made to intimidate the Colombians with the superior power of the United States. But there is a desire that the intelligent men who are now assembling at Bogota shall be made to understand that they have some obligations to the outside world to consider and meet.

Must Redeem Obligations.

Members of the administration say Colombia is under obligations to the United States. At various times in the past the Colombian government through its diplomatic representatives here has made specific pledges as to what the state would do in case the United States decided to dig an isthmian canal upon Colombian territory. These promises were to make reasonable terms, to throw no obstacles in the way of the enterprise and to meet the United States fairly and generously in the fixing of all details. These pledges are a part of the records. They formed a condition precedent to the passage of the Panama canal bill by congress last winter. They were finally expressed in the treaty which has been ratified by the United States senate. Members of the administration say this is something more than a tentative negotiation. It is a compact. The United States has spent time and money on its part and has a right to expect a fulfillment of the spirit of the agreement at least on the part of the Colombians.

Must Black World's Progress.

There is another view of the case which has received attention here. The claim is made that no state has a right to throw itself in the way of the world's progress. The smaller the state the more unreasonable its attitude, an the more important the move which it tries to block the more acute the situation must be. For instance, savage tribes are not permitted to prevent the opening of continents to civilization and commerce, and backward nations which are advanced far beyond savagery must conform to the world's necessities.

Civilization's Right of Eminent Domain.

There is such a principle as civilization's right of eminent domain. For instance, if nature has placed in the Atlantic ocean a long strip of rock, standing in the path of commerce between the old world and the new, inhabited by a million or two of people who maintained a sort of government, and it was desired to cut a channel for ships, if that government stood in the way, either declaring it should not be done or attempting to exact exorbitant terms, how long would it take the governments of America and Europe to dispose of this obstacle?

Brutally Tortured.

A case came to light that for persistent and unmerciful torture has perhaps never been equaled. Joe Golobek, of Colusa, Cal., writes: "For 15 years I endured insufferable pain from rheumatism and nothing relieved me, though I tried everything known. I came across Electric Bitters and it's the greatest medicine on earth for that trouble. A few bottles of it completely relieved and cured me." Just as good for liver and kidney troubles and general debility. Only 50 cents. Satisfaction guaranteed by C. H. Williams, druggist.

LIPTON HERE AGAIN.

Noted Yachtman Hopes to Take Back the Cup With Him, but Will He? New York, June 25.—The Oceanic arrived in the Narrows flying from her mizzen mast the flag of Sir Thomas Lipton, the Shamrock. She was closely followed by the Erin and Mr. Corbin's yacht, the Corsair.

At quarantine Sir Thomas said he was glad to arrive once more. He said the challenger would have a spin outside on Saturday.

She is a remarkable boat. I know you people have a good one, but the Shamrock III is a remarkable boat," he said.

J. P. Morgan's time was taken up by representatives of his house, and he gave no interview at quarantine.

General Corbin, accompanied by General Chaffee and Major Bird, military secretary of Governor Odell,

President Urges the Attorney General to Make a Thorough Clearing of His Department.

SPECIAL COUNSEL RETAINED

Not a Guilty One Shall Escape if the President Has His Way—New Sensations Daily.

Washington, June 24.—The president has sent the following letter to the attorney general:

"White House, June 22, 1903.—Sir: As you know, the charges in connection with the postoffice department are being investigated by Fourth Assistant Postmaster General Bristow, who has had placed at his disposal by the postmaster general every resource of the department, including the services of Mr. Robb, whom you detailed from the department of justice at the postoffice department immediately after the removal of Mr. Tyner. As a result of this investigation a number of indictments have been already found and it is probable that others will hereafter be asked for.

"There can be no greater offense against the government than a breach of trust on the part of a public official or the dishonest management of his office, and, of course, every effort must be exerted to bring such offenders to punishment, by the utmost rigor of the law. The district attorney of the District of Columbia has faithfully and zealously seconded the prosecution in this matter, but the amount of work in the office is such as to make it difficult to devote all the time necessary to the prosecution of these cases.

"I suggest, therefore, that if you can not detail some of your present staff, you appoint assistants in these postoffice cases, not only to take up the cases in which indictments have been found, but to examine into all charges that have been made against the postoffice officials, with a view to the removal and prosecution of all guilty men, whether in the service or not, where the cases are not barred by the statute of limitations.

"Sincerely Yours,
"THEO. ROOSEVELT."

Carrying out these instructions, Attorney General Knox has appointed J. B. Bonaparte, of Baltimore, a special attorney to assist in these prosecutions, and upon his return here this afternoon Mr. Holmes Conrad, former solicitor general, will be tendered a like appointment.

Very Remarkable Cure of Diarrhoea.

"About six years ago for the first time in my life I had a sudden and severe attack of diarrhoea," says Mrs. Alice Miller, of Morgan, Texas. "I got temporary relief, but it came back again and again, and for six long years I have suffered more misery and agony than I can tell. It was worse than death. My husband spent hundreds of dollars for physicians' prescriptions and treatment without avail. Finally we moved to Bosque county, our present home, and one day I happened to see an advertisement of Chamberlain's Colic, Cholera and Diarrhoea remedy with a testimonial of a man who had been cured by it. The case was so similar to my own that I concluded to try the remedy. The result was wonderful. I could hardly realize that I was well again, or believe it could be so after having suffered so long, but that one bottle of medicine, costing but a few cents, cured me." For sale by C. H. Williams.

CONVOCATION ENDED.

Women's Auxiliary Immediately Called to Order for Business Session.

Butte, June 24.—The twenty-third annual convocation of the Episcopal church of Montana ended here this afternoon after a session lasting four days.

Immediately after the close of the morning session Mrs. J. L. Patterson, of Bozeman, called the woman's auxiliary to order, and it was found that 64 members of the order were present. The report showed that \$12,540.88 has been raised by the auxiliary in Montana.

During the afternoon luncheon was tendered the visitors at the Columbia gardens. The Episcopal church has decided to build an addition to St. Peter's hospital at Helena as a memorial to the late Mrs. Brewer, wife of Bishop Brewer, and the auxiliary of Bozeman to provide for the finishing of the rooms where the building is completed.

Bishop Brewer announced his appointment of officers of the auxiliary as follows: Mrs. S. B. Booker, of Dillon, president; Mrs. J. L. Patterson, of Bozeman, vice-president; Mrs. Clinton H. Moore, of Butte, treasurer; Mrs. J. B. Gible, of Butte, secretary.

At the afternoon session the committee to whom was referred the matter of making canonical provision for extra-diocesan courts of appeal in cases of the trial of clergymen, reported to provide for the consideration of the report was adopted. The convocation was closed with a prayer by the Rev. F. B. Lewis.

Treat Your Kidneys for Rheumatism.

When you are suffering from rheumatism, the kidneys must be attended to at once so that they will eliminate the uric acid from the blood. Foley's Kidney Cure is the most effective remedy for this purpose. R. T. Hopkins, of Polaris, Wis., writes: "I have successfully doctoring three years for rheumatism with the best doctors, I tried Foley's Kidney Cure and it cured me. I cannot speak too highly of this great medicine." Sold by McKeehan & Allan.

FOREIGN TRADE BOOMING.

Despite Large Purchases Abroad Balance is Still in Our Favor.

Washington, June 25.—The fiscal year will end with the present month. On July 1 the treasury officials will strike the annual balances. They have already completed their figures for the eleven months that ended with May, and will have only to add the trade abroad in June to complete the record of what promises to be a record-breaking year.

The Register and Leader has from time to time commented on the volume of imports and exports shown by the monthly balance sheets of the treasury department. For some time it has been apparent that we have been buying more abroad than ever before. Our May purchases bring the total for eleven months up to \$943,597,194, which is more than we have bought in any previous year, while our June purchases will be the first time put us above the billion dollar mark. This unusual buying is due largely to the inability of our home factories to supply the home demand, during the great building boom we have been passing through. Never has so much foreign material been demanded, because of scarcity of the home product. But high prices at home have had something to do with buying abroad, and flush times more.

During the eleven months we have sold abroad \$1,324,493,293. The balance of trade in our favor at the end of May was shown to be nearly \$400,000,000, in spite of our enormous bill of purchases. June's balance will not materially change the general total, and \$400,000,000 may be taken in round numbers for the balance in our

Dr. Gunn's Blood and Nerve Tonic.

There is not a woman in this land but at some time in her life would have been the better for the use of this Tonic. For diseases peculiar to women a better medicine was never made. It is composed of the ingredients from which the system has been deprived by disease, over work or disipation. It enters at once into the circulation, building up the tissues that have wasted, and making pure rich blood in the most direct way. For weak, nervous and unsteady people, today, pale or feeble people, it will make strong, steady nerves and give the complexion that wholesome look that indicates health. We have hundreds of letters that people have written us, saying they had gained in good solid flesh at the rate of one to three lbs. per week, while using Dr. Gunn's Blood and Nerve Tonic. It should be taken after meals, one or two tablets each time. Druggists sell it for 75c per box, or three boxes for \$2, or sent post-paid on receipt of price. We are glad to make reply to letters of inquiry, the advice we give you is plain, and easily understood. Address: The Bosanko Co., Philadelphia, Pa. For sale by Dezell Drug Co., Lewistown, Mont.

Night Was Her Terror.

"I would cough nearly all night long," writes Mrs. Chas. Applegate, of Alexandria, Ind., "and could hardly get any sleep. I had consumption so bad that if I walked a block I would cough frightfully and spit blood, but when all other medicines failed, three \$1 bottles of Dr. King's New Discovery wholly cured me and I gained 58 pounds." It's absolutely guaranteed to cure coughs, colds, influenza, bronchitis and all throat and lung troubles. Price 50c and \$1. Trial bottles free at Williams' drug store.

YALE WINS ALL THREE.

In Annual Boat Races Harvard Meets With a Triple Defeat.

New London, June 25.—The captain of the Yale university today demonstrated their superiority over those of Harvard by winning in superb style all the three events in the annual regatta. The Yale four took the first race by three comfortable lengths in 10:59 2-5. The New Haven freshmen in a closer race finished a length and three-quarters ahead of the Harvard youngsters in 9:43 1-5. In the big race of the day, Harvard, after leading for a mile, was finally and decisively defeated at the hands of Yale's men, who in the last half of the contest trolled the situation in unmistakable style.

It was the first time that Yale has won all three events since the regatta reached its present program. There were no accidents and nothing to mar the day's sport. Yale's time in the big race was 20:19 4-5, within 9 4-5 seconds of the record of the course. The freshman record was broken by Yale's time of 9:43 1-5.

Yale's three victories are attributed by the experts to the superiority of the stroke taught Yale by John Kennedy over that taught Harvard by her graduate coaches. So far as physical form was concerned, there was no choice between the crews, except with the possible exception that the Yale freshmen out weighed their Harvard rivals by over seven pounds to the man. The variety of the time in the big race was a surprise. The freshman race had been conceded to Yale, while the four-oared race was also given to Yale in the great majority of the predictions.

The greatest crowd that ever came to this quiet old harbor town, by rail and water, saw Harvard go down to defeat. It seemed as if an amount of bad weather and threatening skies could keep the people away from New London. The sky was dull and leaden, with the wind cold enough for overcoats, and the oarsmen at their quarters warmed themselves before great log fires in preparation for the struggles of the day. By half past 10 clear and sunny weather broke and o'clock the wind was blowing fresh and the air conditions were ideal for boat racing.

Over the last three miles of the variety course, 200 of the finest yachts that float in American waters were swinging at anchor gay with colors of Yale and Harvard.

No False Claims.

The proprietors of Foley's Honey and Tar do not advertise this "miraculous cure for consumption." They do not claim it will cure this dread complaint in advanced cases, but do positively assert that it will cure in the earlier stages and never fail to give comfort and relief in the worst cases. Foley's Honey and Tar is without doubt the greatest throat and lung remedy. Refuse substitutes. For sale by McKeehan & Allan.

favor for this year. His shows a continuation of the favorable trade conditions that have marked the past eight years. During the first eleven months we have sold abroad more than during any previous year, with the single exception of 1900 and 1901, and as our exports for June will be very nearly if not quite \$100,000,000, it is apparent that this is to be second as a prosperous year only to 1901, when we reached high water mark. Our sales abroad will exceed \$1,400,000,000.

The total commerce of the country is figured by the treasury department by adding the total imports to the total exports. It is interesting to trace the growth of our foreign trade. In 1880, at the beginning, we reached only \$182,000,000. In 1890 we had risen only \$318,000,000. In 1895 the total was \$687,000,000, and in 1870, \$828,000,000. In 1872 we crossed the billion dollar line with our total imports and exports. We reached the billion and a half mark in 1880, and the two billion mark in 1900. In 1901 the total was \$2,315,000,000. In 1902, \$2,285,000, while 1903 promises \$2,400,000.

For several years it has been freely predicted that there would come an end to this remarkable commercial activity, and that both buying and selling would show a decline. But the end has not come yet, nor is there any better reason for expecting it in 1903 than there has been in any previous year. If there is any present reason why the commerce of the country will not hold its own and continue to grow it is not now apparent.
