

The Grange Movement.

The present century has been extremely prolific in bringing forth numerous societies and organizations for the purpose of fostering some special interest or promoting some particular object.

If the general good can be advanced by the formation of societies representing special objects or interests, enough has already been done in this direction to secure the desired end.

The organization of the Patrons of Husbandry claims to be a public benefactor. It places itself upon higher moral ground than any of its predecessors ever presumed to do.

The financial rings of Wall street, the railroad combinations, the labor unions, and whisky rings, each lay out a mode of procedure for its own special benefit, without any regard to the rights and prosperity of any other branch of business.

The laborer, also fixes his wages, not according to the actual amount of service rendered, but according to the emergency that makes his labor necessary.

Unlike all these combinations the Patrons of Husbandry act on the principle of "live and let live." Their proposed principle of business is that laid down by the Apostle Paul, "Look not every man on his own things, but every man also on the things of others."

The Patrons have been represented as being opposed to every industry but that of agriculture, as being the enemy of the merchant, manufacturer, transportation companies, &c.

As already stated, the Grange organization is a public benefactor. Upon the prosperity of the farmer depends that of every other profession, trade and industry.
