Cough Caution
Never, positively never poison your lungs. If you cough—even from a simple cold—you should always heal, soothe, and ease the irritated bronchial tubes. Don't blindly suppress it with a stupefying poison. It's strange how some things finally come about. For twenty years Dr. Shoop's Chamberlain's Cough Cure has constantly warned people not to take cough mixtures or prescriptions containing Opium, Chloroform, or similar poisons. And now—a little late though—Congress says "Put it on the label, if you please." Very good! Hereafter for this very reason mothers and others should insist on having Dr. Shoop's Cough Cure. No poison marks on Dr. Shoop's labels—and none in the medicine, else it must by law be on the label. And it's not only safe, but is said to be by those that know it best, a truly remarkable cough remedy. Take no chance then, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and note the difference. No poison marks there! You can always be on the safe side by demanding
