The Dunlap Herald makes a feature of "The news of four counties." Judging from the news from Crawford this matter is clipped from exchanges and rewritten without credit being given. This is not the proper thing, brother Herald, your idea is a good one but your newspaper etiquette is a trifle out of date. In this rewriting queer mistakes sometimes occur. Last week the REVIEW requested any person having been swindled by lightning rod agents to send us information concerning it. Up to this time no one has responded. The Herald evidently rewrites the request for information saying "Several Crawford county farmers have been victimized by lightning rod swindlers." The facts seem to be just the contrary. Of course some may have been swindled but not the people who have the good sense to read the Great and Only.

At Dow City.

There was a very ugly scrap at a dance Friday night in which Jim Butler was seriously and perhaps fatally stabbed. These affairs show arising spirit of lawlessness which should be suppressed at whatever cost.

PASSENGER TRAINS COLLIDE.

Most Destructive Wreck on the Union Pacific Near Sidney, Neb.—Passengers Lose Their Lives.

Sidney, Neb., Jan. 9.—At Sunol, 15 miles east of here, the Union Pacific had a bad wreck at 4:45 o'clock a. m. Train No. 3, fast passenger which left Omaha in the evening, Engineer Charles Ell, engine No. 1804, and Engineer Reese, double header, ran into train No. 2, Engineer Dell Bonner. Bonner had orders to meet No. 3, and the brakeman was just in the act of opening the switch when the double header came thundering along at 45 miles an hour and nearly one hour late. Both trains were on the main track, the engines were badly demolished, and the entire train No. 3 was destroyed excepting the mail car and one sleeper. The composite car of train No. 2 burned up. Engineer Bonner was internally injured and had several ribs broken. Fireman Coleman was killed. Ell was scalded, but not seriously. Several passengers were badly hurt, and it is reported that some passengers lost their lives. It is impossible at this time to get definite information.

There were 320 passengers on No. 3 and all but two, an old man and a woman, are accounted for. They are supposed to have been killed and in the debris of the wreck. A Chinaman, name unknown, has several severe scalp wounds and is hurt in chest; cook on the dining car of No. 2, name unknown, broken arm. Dr. G. W. Dwinell, of Montague, Cal., was on the east-bound train, and rendered efficient services.

PECULIAR ANALYSIS.

A Very Singular and Novel Method of Separating the Products Composing Gunpowder.

Mr. Gillan, preparator at the Paris museum of natural history, has pointed out to us, says a French exchange, a very singular method of separating the products composing gunpowder. A small quantity of this substance had been left at the bottom of a glass containing water that sat near an open window, where it underwent the ac-

tion of cold at night and the heat of the sun in the daytime.

Some time afterward, when it occurred to Mr. Gillan to throw the powder away, he was surprised to see the rim of the glass covered with a deposit formed of crystalline elements whose whiteness contrasted singularly with the blackish deposit left at the bottom of the glass, the water having entirely disappeared. The nitrate of potash (or saltpeter) had separated from the charcoal and sulphur and crystallized at the top of the glass.

During the present century seven instances have been recorded in the British Isles in which the bride has married the best man by mistake.
