There was a large number present and Mrs. Kirkup's well known hospitality made all her guests feel at home. A delicate luncheon was served. Union Memorial services preparatory to Memorial Day will be held in the Baptist church next Sabbath, May 28, beginning at 10:30 o'clock. Services will be conducted by Rev. Bateson, assisted by the ministers of other churches. It is hoped that all loyal people will attend this service and pay respect to the Soldier living and honor and reverence to the Soldier dead. The G. A. R., W. R. C. and S. of V. will meet at McHenry Hall at 9 o'clock to proceed to the church in a body.

Prof. DeMotte's lecture at the Methodist church Sunday evening was a most helpful one. He said people must be judged by the work they do, work is the result of the amount and character of the potential energy stored. The storing of good energies is the great question for youth. The brain reaches its highest development at the age of 35. The hope of the nation is therefore in the training of its youth. Reformers, churches and police cannot do the work alone. The great thing is to follow up the the gospel message. Train up a child in the way he should go and when he is old he will not depart from it.

"Expansion is bloodshed" quoth the Bulletin. The fact is that in this life no great gain or advancement is made without its losses or its struggles. The man who refrains from effort goes to the poor house and the nation which refuses to take its part in the world's struggles falls into decay. Anti-expansionists point to Rome and Greece as horrible examples. These countries had at least a history and led a life that was worth living. Expansionists may point to China. It has never expanded. It has slept through all the centuries, it is about to die unhonored and unsung, a relic of the past. While we do not favor unnecessary bloodshed, still we do believe our country must play its part as assigned it by Providence or else prove recreant to its trust.

Anton Gaester of Paradise township brought seven wolf scalps into the auditor's office yesterday, receiving the bounty of \$14 therefor. This reminded the office boys of some wolf stories, one of a prominent farmer who bought a young wolf for a pet. His wolflet got along all right until one day an old sow fearful of her litter got after him and killed him. The farmer brought the wolf scalp in to get his bounty. In order to get his bounty one must swear he killed the wolf himself. The farmer said he did not kill the wolf, his sow killed him. He was willing to swear the 'sow committed the murder, but gave up the bounty rather than swear to what was not strictly the truth. Judge Gary remarked that the farmer was a free silver man, and we thought it a pity that such a good man should have been so misled. The second story was of a young fellow who brought in twelve young wolves in a sack. They were alive and the deputy said they were not running a musee and only paid for the scalps of dead ones. The young man then took his sackful of wolves out to the back door of the court house, grabbed them one by one, by the ears and deliberately dashed their brains out against the side of the court house. The deputy recorder almost fainted when he saw the awful slaughter, and the court house had to undergo a thorough cleaning, but the young man got his bounty.

RAILROAD NOTES,

Laying of Track Commenced.—New Freight Depot Location Decided On.

The track laying on the Boyer Valley Line is going on in earnest at the Wall Lake end. The first spike was driven by the Assistant Engineer last week. At the Denison end the work will not start for about two weeks, when a temporary line will be laid across the north end of the yards to allow a construction train to pass. McArthur Bros., who have the contract, expect to have the entire line laid by July.

Work on the yards and the change of main line track will commence about the time the track laying begins.

The location of the new freight house has been decided on, and it will be directly west of the present depot.

The recent heavy rains have delayed work on the grading badly on both roads, and several small cuts near Deloit were washed full of dirt.

The end of May will see the grading done on this end of the line with the exception of McAhren's yard work at Denison and the yards at Deloit.

D. C. Dunlap, resident engineer of the Boyer Valley Line, was in town Saturday.

A NEW CHURCH.

The German-Methodist Association Ready to Build a New Church

Rev. Claussen informs us that work on the new church will begin immediately. Some \$2,000 has already been subscribed. The church will cost about \$3,500, and will be built where the present church is located. The old building will be moved east on the grounds and a parsonage built from it. We congratulate Rev. Claussen upon his success in building up this association, springing as it has from a mere handful of people, the congregation has constantly increased until now the old church is entirely inadequate.

THE DEMOTTE LECTURE.

The lecture Saturday evening was one of the best if not the best lecture of the course. Professor DeMotte's subject was "Python Eggs and the American Boy." His lecture was illustrated by an unusually good stereopticon.

The Professor began by describing the python and its habits. His first illustration was the skeleton of the head of a python. This showed the peculiar structure of the jaw which the monster can dislocate when necessary to swallow its prey. When once it seizes its prey it never lets go, and after its feast it is dormant and harmless for a season.

This illustrates the effect of our thoughts and acts upon the brain in the formation of habits. He showed the condition of the brain when the cells were over charged with blood as a result of any passion. After this has been discharged by the indulgence of the passion, for a season there is quiet, but the strange result seems to be that there is a desire or tendency for the same cells to become congested again and repeat the same act, and if this is allowed to continue, the time comes when it is beyond the control of the individual to resist this impulse. Consequently passions must not be indulged in the least. Beware of the python which never lets go when once it seizes its prey.

He showed the condition of the brain cells at the beginning of any activity and the change which attends weariness. He stated that it takes two hours and a half of sleep for nature to remove the waste products produced by mental labor, and five hours to rebuild the cell. Woe to the man that endeavors by stimulants to force the brain to act when it is wearied. On account of the need of this time for repair of nervous tissue no person can walk 1,000 miles in 1,000 consecutive hours, walking no more than one mile in a single hour.

The lecturer declared positively that there never has been a genuine case of mind reading. As for mediums, clairvoyance, palmistry, etc. they were such arrant humbugs that they were not worth considering.

The grand climax of the lecture, which was a continuation of the one given last winter was: Formation is better and more easily effected than reformation.

Among those who are in attendance at the Prohibition convention at Des Moines from Crawford county we mention E. A. Stone, F. L. Johnson, Robt. Craft and Chas. Larson. We also note that in all probability the name of Mr. Wm. Plimpton will be presented for Lieutenant Governor. He has many friends in Denison—his old home—who would be glad to see him thus recognized.

A sad romance was heard over the phone this morning. A young man at Clarion very insistently called up a young lady at Carroll. He was informed that the young lady could not come to the phone at that time, as she was at the church getting married. He said replied that he guessed he didn't want to talk to her.—Fort Dodge Messenger.

We heartily approve of the manner in which the management of the Omaha Exposition have taken in regard to advertising the exposition this year. The head of this department is in good hands, and old time printer and newspaper man, Mr. Cutright, and he knows how such things take among newspapers. The management is paying for all space used, and also making free use of tickets to editors and publishers.

McClure's Magazine for June will give the untold story of the negotiations between Admiral Dewey and the Spanish commanders that resulted in the final surrender of Manila without anything more than the merest show of a fight on the part of the Spanish land forces. The story is told by Oscar King Davis, the Manila correspondent of the New York Sun, from the diary of M. Edouard Andre, the Belgian consul, who conducted the negotiations.
