

It Is Wireless!

The Rock Island "Gadet" Corn Planter!

THE MECHANICAL WONDER
OF THE NINETEENTH CENTURY

A Wireless Checkrower That Always Checks.

The principle of flexibility (lateral and verticle) is so pronounced and perfect in this machine that it works equally as well on side hills, across or lengthwise with dead furrows, through rough or unharrowed ground as upon smooth land. Lighter in weight and draft and easier to operate than a wire planter. Plants one-third more acres than by the old process. No stretching, reeling up or mending of wire. No changing of stakes, nor shifting of marks. No expense for extra wire. It has been thoroughly tested and is fully guaranteed. This is the machine you want this spring.

THE ROCK ISLAND PLOWS are too well known to need description. They maintain their lead as "The Best on the Market."

SEEDERS—Sterling and Hoosiers, agitators and force feed.	MOWERS—McCormick and Plano.	RIDING CULTIVATORS—Moline and Bradley Stem Winder.	Fairbanks, Gem and Dempster Windmills and Towers.
