AMES STUDENTS COMING.

Students and Professors will visit Denison May 4th.

Saturday, May 4, has been fixed by the students of the Animal Husbandry class of the Iowa Agricultural College to visit Denison. We understand they are to examine the premier herd of Aberdeen-Angus cattle and possibly pass on the show herd. The Ames party will arrive on the 1:30 p. m. train and it is desired that there be a number of volunteers with carriages to meet them and their show over appreciation of their visit to our city. Profs. Curtiss, Craig, Marshall and others will be of the number, and a general invitation is extended to all to meet these gentlemen. Let there be a good turnout and show our appreciation of their efforts in teaching the art of stock husbandry.

Start the Sprinkler.

The dust coming up the street the past few days would indicate that the street sprinkler would not be amiss. With the new well there is an abundance of water and we believe the business men would liberally subscribe to the support of the sprinkler. Start it going.

Dr. Schrader on Smallpox.

In another column will be found an interesting letter from Dr. Schrader of the State Board of Health, relating to small pox. This article appears in the April State Board of Health Bulletin. So many people are of the opinion that the doctors are keeping up this small pox scare because they are interested from a pecuniary standpoint. Dr. Schrader suggests a sure and practical method by which such doctors, if any there be, can be thwarted in their designs—that is by stamping out the disease in the next sixty days. We suggest that everyone read the article over carefully.

He purchased with the intention of coming here and taking personal supervision of the business. The mill has been changing hands quite often of late and the business has been unsettled but will be fully settled and established under the present management.
