### Anthracite Coal Miners Prepare for a Bitter Struggle That Will Paralyze Industries.

### NATIONAL CONVENTION WILL DECIDE.

### Extension of the Strike to All Coal Miners in the United States, Involving 449,000 Men, is Contemplated—Some Doubt the Success of Such a Movement.

Hazleton, Pa., May 17.—The anthracite mine workers in convention Friday, in order to win their strike, unanimously decided upon a plan that if carried into successful operation, would practically tie up the industries of the country, paralyze business and inconvenience the people throughout the United States. It is their desire that a special national convention of the United Mine Workers of America be called as soon as practicable for the purpose of endeavoring to have all the bituminous mine workers, both organized and unorganized, involved in the anthracite miners' struggle. This announcement was officially made at noon Friday by President John Mitchell in a statement giving the result of the deliberations of the delegates in convention. This statement is as follows:

**Statement Issued by Mitchell.**  
"At this morning's session the convention petitioned the national officers to issue a call for a national convention of all miners employed in the United States for the purpose of considering the situation in the anthracite field. If the desire of the anthracite miners is carried into effect a national suspension of coal mining will be inaugurated. All questions of detail as to the direction of the strike in the anthracite field were referred to the district and national officers. Definite plans will be outlined within the next few days. For the present the engineers, firemen and pump runners will continue at work. All mine workers were advised to remain at their homes, abstain from frequenting saloons and under all circumstances observe the law."

**Effect Far-Reaching.**  
If a special national convention is called and the miners succeed in their object it would directly affect 449,000 men, who are employed in and about the coal mines of the country. Coal would soon become scarce and this would ultimately result in the tying up of railroads and all sorts of industries that use large quantities of the fuel. It is doubted by some interested persons here who are closely watching developments that such a stupendous movement could be brought about, for the reason that the business interests of the country would not stand idly by and permit such a plan to be put into effect.

**No Disturbances.**  
Notwithstanding that 145,000 men have been idle for the last five days, no disturbances of any kind have been reported here. The region is extremely quiet. All the delegates left for their homes Friday and Hazleton presents a deserted appearance. All of the local unions throughout the coal field held meetings Friday afternoon or night and received reports from their convention delegates. Steps were taken by most of the "locals" to give relief to the members, if needed. They expect a long strike.

### GIFT TO UNITED STATES.

### Emperor William to Place Statue of Frederick the Great at Washington.

Wiesbaden, Hesse-Nassau, May 17.—The German emperor Wednesday, May 14, telegraphed as follows to the president of the United States, at Washington:

"I am still under the deep impression created by the splendid and cordial reception of my brother, Prince Henry, by the citizens of the United States of America. In the speeches with which he was greeted the fact was often mentioned that my ancestor, Frederick the Great, maintained a friendly attitude towards the young American republic during the course of her formation, thereby laying the corner stone of the friendly relations which have always existed between our two countries. The example set to me by the great king I intend to follow.

"I wish to commemorate the visit of Prince Henry by a gift to the people of America, which I request you to accept in their name. I intend to present a statue in bronze of Frederick the Great to the United States, to be erected in Washington on a place you will kindly choose. May this gift be looked upon as a lasting sign of the intimate relations which have been successfully fostered and developed between our two great nations."

(Signed) "WILLIAM, I. R."

# STILL IN VIOLENT MOOD.

### Streams of Lava Continue to Pour Down the Sides of Volcanic Mont Pelee.

### ENTIRE ISLAND IN STATE OF PANIC.

### The Desolation in St. Pierre is Appalling—A Majority of the Victims Were Killed by Gas—Island of St. Vincent Ruined by the Soufriere Volcano—Supplies for Needy.

St. Kitts, B. W. I., May 16.—From an officer of the steamer Solent, just arrived from St. Pierre, it is learned that Mont Pelee is still in eruption. Lava flows in broad streams down the sides of the volcano. The entire island of Martinique continues in a state of panic.

In St. Pierre the desolation is appalling. Bodies are being burned in a great pyre, upon which kerosene is steadily sprayed. In spite of this it will be weeks before the place can be cleared of the dead. Physicians who have made exam-

been able to approach within eight miles of the new crater of the Soufriere volcano. But, judging from what can be seen from a considerable distance, the old lake at the summit of the mountain has disappeared. Scientists who have reached the island from Trinidad predict a more serious volcanic eruption within a short time.

**Destruction Prevails.**  
Owing to the destruction of several estates the sugar and arrowroot industries of St. Vincent are seriously injured. Destitution prevails among the laboring classes, who are without homes, without clothes and hungry. Nearly 3,000 deaths on the island have been reported.

**A Mission of Mercy.**  
Washington, May 16.—It is stated at the war department that the supplies and stores shipped to Martinique and St. Vincent on the cruiser Dixie from New York and on the collier Sterling from San Juan undoubtedly will be sufficient to meet the urgent needs of the suffering people for fully a month to come.

**Situation on Island of St. Vincent.**  
Washington, May 17.—Late Friday afternoon the navy department received an unsigned cable, dated at St. Lucia Friday, and apparently from Lieut. McCormick, of the Potomac

### THE LATEST AMERICAN INVASION.

inations say that in most cases death was due to asphyxiation and that the fire came later.

**Killed by Noxious Gas.**  
It is now believed that Mont Pelee threw off a great mass of some exceedingly heavy and noxious gas, something akin to fire-damp, which settled upon the city of St. Pierre and rendered the inhabitants insensible. This was followed by the sheet of flame that swept down the side of the mountain. This theory is accepted by the few survivors who were taken from the ships in the harbor, as they say that their first experience was one of faintness.

### Refugees Are Starving.

Great suffering continues in Martinique. Food is being received, but not in sufficient quantities to feed the crowds of refugees that have flocked to Fort de France. The steamship Madianna, with food supplies purchased by the New York chamber of commerce, left here at night for Fort de France.

By those who have arrived here from Martinique it is said that the dumb animals were wiser than man. Mont Pelee long ago gave warning of the storm of fire which it was storing up to hurl upon the island. Residents of St. Pierre saw and heard the warning, and they refused to heed them. They remained, and the danger which had long confronted them brought death to 30,000.

Even before Mont Pelee began to rumble, late in April, live stock became uneasy and at times were almost uncontrollable. Cattle lowed in the night. Dogs howled and sought the company of their masters, and wild animals disappeared from the vicinity of Mont Pelee.

### Little Islands Engulfed.

Fort de France, May 16.—Several small islands near Martinique have been entirely swallowed up by the sea since the great eruption of Mont Pelee on May 8. Martinique is daily shaken by earthquake rumblings. There was a landslide near Le Precheur Thursday which engulfed plantations and several houses. Scientists here predict greater disasters.

### Pelee Again Active.

Fort de France, Island of Martinique, May 17.—Great flashes of very bright light were emitted from Mont Pelee between 10 and 11 o'clock Thursday night. They were visible from here. Thick, glowing red clouds, interspersed with flashes of light, are now issuing from the volcano. Showers of cinders, lasting for 20 minutes, accompanied the activity. The people in the districts of Lorrain, Marigot, Sainte Marie and La-Trinite are panic-stricken.

### ST. VINCENT RUINED.

**Large Estates Are Desolate and the Eruptions Still Continue.**  
Kingstown, Island of St. Vincent, B. W. I., May 15.—No person has yet

It read as follows: "Island St. Vincent devastated north of line Georgetown east, Chateau Delair west. Sufferers country people. Dead, 17,000; destitute, 5,000. Immediate relief supplied by local government. Destitution will continue several months."

### Hits Prohibition Law.

Des Moines, Ia., May 16.—The Iowa supreme court decided that agents for liquor concerns in other states can legally sell liquor in this state. The effect of the decision is feared by temperance people.
