Class of Twenty Graduate From  
Denison Normal College.

#### LECTURE AT BAPTIST CHURCH

Prof. W. C. Wilcox, of The Iowa State  
University, Delivers Fine Address.  
Alumni Banquet at Cooper House.

Thursday evening at the Baptist  
church were held the annual commence-  
ment exercises of the Denison Normal  
and Business college. The night was  
beautiful, and a large audience filled  
the church to witness the graduation  
of the class of twenty and to listen to  
the annual address to the class given  
this year by Prof. W. C. Wilcox, of  
the Iowa State University.

The subject of the address was  
"America, an opportunity." The  
speaker held the close attention of the  
audience throughout the entire ad-  
dress and at the close there was not a  
person in the house who was not more  
proud of his nationality than when he  
entered. After the singing of "Amer-  
ica," the diplomas were presented to  
the class by Hon. J. P. Conner.

The address of the evening was one  
of the best on the subject ever given in  
Denison. Added to the scope of his  
theme the speaker possessed most of  
the traits necessary for the making of  
a good platform speaker. The many  
patriotic sentiments expressed, inter-  
persed with rare wit and humor made  
the address an entertaining and inspir-  
ing one, which held the close attention  
of the audience till the close.

He said there are at present in exist-  
ence 51 independent states, while but a  
few years ago the number was much  
larger. At the time of the French  
Revolution there were 250 German  
states each independent of the other,  
while today they all form one great  
empire. From ancient times every  
state which had an independent exist-  
ence thought it had a great mission  
in the world and would live forever; but  
of all these hundreds of governments  
51 only survive. The following rea-  
sons were assigned for the fall of na-  
tions: No nation has ever been wise  
enough to avoid all errors, nor upright  
enough to resist all temptations, nor

energetic enough to improve  
opportunities, nor strong enough  
from all calamities, and,  
is in nature a silent force  
of men, a power and intelli-  
gence which is passing over the destinies  
of history itself only den-  
ies not explain, a Creator  
over all.

After depicting in glow-  
ing words the wonderful extent and  
resources of our nation,  
enumerated a few good re-  
asons to expect to escape what has  
been the common fate of all  
passing into oblivion. For  
the character of our people is sure  
of other countries; sure  
of the century just clo-  
se that we are here to  
have worked out a new  
and useful experiments in gov-  
ernment were radical departure  
of the old world; fourth  
history reveals many  
tunes which we have p-  
other governments.

Relative to the super-  
iority of our people the speaker  
exists in our national  
distinction betw-  
wrong, and while othe-  
possess this faculty th-  
it as well as we do our  
no country which aff-  
tional advantages.  
of Europe maintain-  
of education than do  
but none but the oc-  
are privileged to atte-  
try the young man w-  
cation needs only  
Again we have a  
second thought. So  
think twice because  
once; others cannot t-  
they can think of  
thought exhausts t-  
are others who ea-  
their second thought.

With reference to  
past century Prof. Wilcox cited a large  
number of interesting statistics rela-  
tive to our increase of population, size  
of cities, manufactured articles, etc.  
He said of the four great sources of  
wealth, viz: agriculture, manufac-  
tures, mining and grazing, we lead the  
world in the first and last, and in a few  
years would lead in all of them.

Nearly all of the great experiments  
in government which we have under-  
taken have proven a success despite

imports and consequent  
revenue. We have not accomplished  
the equal distribution of wealth nor  
never shall until there is an equality  
of learning and wisdom.

Many other points of weaknesses  
were pointed out, but "the great object  
of American activity ought to be to  
make this country the best possible  
place for the average man to live in."

Education was offered as the solution  
of our problems; education of the body,

selection by the Denison orchestra,  
violin solo by Miss Genevieve Lilly,  
and a tenor duet by Messrs. Hoyer and  
Chamberlin.

For the past year the department of  
music has been under the supervision  
of Prof. M. C. Hoyer, assisted by Miss  
Essie Smith. Prof. Hoyer has now been  
in charge of the musical work of the  
college for several years and that de-  
partment of the college work has been

in a flourishing condition every since  
his severities have been engaged.

Miss Newcom, the graduate of the de-  
partment of music is a pianist of great  
skill and wonderful execution. Her  
playing on this occasion was very  
pleasing and was received with much  
applause.

Miss Brodersen has been a popular  
reader in Denison for two or three  
years. She has taken high rank in all  
the declamatory contests of the high  
school in which she has entered. She  
was at her best on this occasion and  
she held the close attention of the  
audience while she rendered two selec-  
tions of highly dramatic character.  
She has been under the training of  
Prof. John Dunn Martin who has had  
charge of the department of oratory  
for the past three years. Mr. Martin  
has been one of the most successful  
trainers in the art of reading ever  
coming to Denison, and we are sorry  
he is not to be with us another year.  
Next September he will begin work at  
the Simpson college as an assistant in-  
structor in elocution and we predict  
for him a successful career in the  
future.

#### SOCIAL NOTES.

The visit of Miss Brennecke to her  
friend Mrs. Kneibule, set the social ball  
rolling, and Denison was very gay last  
week. The weather was so fine, and  
June always lends itself to everything  
beautiful so that all the parties were  
very successful.

Penelope met on Tuesday with Mrs.  
Conner and had a delightful meeting.  
The hostess served an elegant three

ELMER MILLS.

FORD'S CALF MEAL—

ng his calves growing fast  
g from the start until they  
for the market, the farmer  
better returns than he does  
kind of feeding. Many sub-  
stitutes for milk have been tried, but  
none as satisfactory as Blatchford's  
Calf Meal. This meal contains an  
abundance of flesh, fat, bone, blood and  
tissue producing elements, and also all  
the elements of New Milk and Pure  
Dried Milk. By using Blatchford's  
Calf Meal the milk may be dispensed  
with when the calf is four or five days  
old. For particulars telling fully of  
this excellent meal call on C. D. Mil-  
ler, at West Denison Mills.

The trip will last about eight days and  
will extend as far south as Memphis.

The Rebecca's held an election of  
officers last week and the following  
were elected. Noble grand, Mrs. Peter  
Krauth; Vice grand, Miss Bayne; treas-  
urer, Mrs. P. A. Schlumberger; secre-  
tary, Mrs. M. A. Harding; financial  
secretary, Mrs. J. L. Warbasse.
