Mr. P. E. C. Lally has been engaged to deliver the Fourth of July speech at Jefferson this year. We notice that he was also billed for a speech at Smithland, but on consulting with him we are informed that it is a mistake, being engaged for the Jefferson speech he could not possibly accept an invitation to Smithland, however much he would have liked to have done so.

Unique Advertising.

Some of the Japanese tradesmen in the smaller towns of Nippon have a curious way of advertising their business. On their right forearms they tattoo figures—the shoemaker a shoe, the woodcutter an ax, the butcher a cleaver. Underneath these emblems are such inscriptions as, "I do my work modestly and cheaply," or "I am as good at my trade as most of my fellows." When they are hunting work they bare their arms and walk about the streets.

His Greatest Sorrow.

Burt—I have no doubt you are sorry about your uncle's death, notwithstanding it brought you into a lot of money. West—Yes; he was doing a good business, you know, and if he had lived a year or two longer he might have left me a good deal more.—Boston Transcript.

The Foxy Daughter.

Bel—Do you spend all of your allowance? Grace—No, I always save a little. The thrill of it pleases father so much that he always gives me something extra at the end of the month!—Detroit Free Press.

FIRE DAMAGES A DWELLING.

Dwelling House Near School Building Suffers From Fire. New Chemical Does Good Work.

The dwelling near the central school building owned by Dr. Garber and occupied by Mike Flahive and family was partially destroyed by fire last Thursday forenoon. It is supposed the fire started from a spark from the chimney, as a wood fire had just been started in the kitchen stove. The blaze was soon discovered and the alarm given. The fire department made a quick run and two streams of water, one from the city water and another from the chemical engine, soon placed the blaze under control and confined the destruction to the roof. The plastering on the walls was damaged considerably by the water but the entire loss on the building is covered by insurance.

The new chemical engine did splendid work. It was the first to play a stream of water on the blaze and by means of the double cylinder the stream was continuous.

I. C. WATER TOWER EMPTIED.

Water Pipe Torn Open by Train And Tracks Flooded by Contents of The Tower.

Sunday night at the Central depot, the pump-stock through which water is taken on by the locomotives, was struck by a train and torn from its foundation. The pipe leading from the water tower was forced open and the water rushed out emptying the tower and flooding the tracks for a distance of a hundred feet or more. The engine had just taken water and the fireman failed to swing the pump-stock back the proper distance. When the train started up it was struck by a box car with the result noted above.

John Little, a boy fifteen years of age, was brought before Justice McLennan Saturday on a charge of attempting rape upon the person of the four-year-old child of R. F. Biggs, a farmer living in Denison township west of town. The boy's mother is an inmate of the insane asylum at Cherokee, and his father has not been heard from for several years. He was working for Mr. Biggs as a farm hand. In the trial he practically admitted everything in the charges. He is now confined in the county jail and will be taken before the judge of the district court as soon as possible to be sent to the reform school.

Be Ready For the Emergency.

Good luck is desirable even when you have done your best to succeed, but remember that the most favorable circumstances or strokes of fortune are of little value unless you have prepared yourself to take advantage of them. Of what advantage would Hayne's fiery speech have been to Daniel Webster if he had not, with the instinct of genius, long before equipped himself for the assault which he repelled with such crushing energy? Had he not previously weighed and refuted in his own mind the charges of his opponent his reply, instead of pieces of oratory, might have only revealed his own weakness. Thousands of men had seen the prints of a horse's hoofs in the soil before Faust discovered by them the art of printing.

VIEWS THE ROSEBUD LANDS.

The Possibilities of the Rosebud Reservation as Seen by County Attorney P. J. Klinker.

P. J. Klinker was up at Yankton, S. D., last Wednesday looking up the situation with reference to the Rosebud lands, which will be opened to the public in a few weeks. In an interview Mr. Klinker said that Yankton is preparing to entertain more than half the people who come to register. There are four places of registering, Yankton, Chamberlin, Fairfax and Bonesteel. Yankton is a city of five or six thousand inhabitants and being so close to Sioux City will attract much larger crowds when the reservation is finally opened than any of the other places of registry.

It will be an easy matter for Denison people to register, as the trip up there and back can be made in one day. Leaving on the early morning train one arrives at Yankton at eleven o'clock and returns at two o'clock, arriving at Denison at 9:45 in the evening. It is estimated that about half the land to be opened is worth filing on.

Mr. Klinker brought home with him proper blanks and papers for old soldiers to have their names registered without going to Dakota and those desiring such papers can have them properly filled out by calling on him.

A NEW DENTIST.

Dr. R. O. McConnaughey, of Washington, Iowa, has decided to locate in Denison and has leased a fine suite of offices in the Warbasse block. Dr. McConnaughey is a graduate of the State University Dental Department, comes well recommended both as to character and ability in his profession, and he looks like a young man with the staying qualities to be a winner. We wish him good fortune and a successful here.

Mr. N. A. Johnson, of Kiron, was a Denison visitor on Tuesday. He says Kiron is improving steadily and that her business men are doing a good business.

On Friday evening, July 8th, Rev. A. M. Duboc will lecture at the Germania opera house on the "Eighth Wonder of the World," or the Louisiana Purchase Exposition. The lecture will be illustrated by fine stereoscopic views, showing the fine buildings of the exposition, and will undoubtedly be a very entertaining lecture. Among the many different subjects he will explain will be the origin and growth of the World's Fair idea, all its predecessors and point out the features of special interest. The proceeds of the lecture will go toward repairing the Baptist church, and the ladies of the society are anxious that a good crowd be in attendance.

The Humbolt Independent says that one way to check the beef combine is to set plenty of hens. Every poultry raiser throughout the land should prepare to do his best this season. If production is doubled over former years there will be a good market for every pound of poultry. We observe Arbor day very appropriately in this county and set trees; let everybody set hens.
