DENISON, IOWA, WEDNESDAY, NOVEMBER 16, 1904.

NO. 46

CHRISTIAN SCIENCE.

Lecture At Germania Opera House Thursday Evening.

MRS. LIVINGSTONE MIMS.

A Good Sized Audience Was in Attendance and Listened to An Address Both Interesting and Instructive.

Upon the above subject Mrs. Livingstone Mims, of Atlanta, Ga., delivered a lecture at the opera house last Thursday evening to an audience which half filled the hall. The lecture was given under the auspices of the First Church of Christ (Scientist) of this city, no admission fee being charged. Mrs. W. A. McHenry introduced the speaker of the evening who is a member of the Christian Science Board of the First Church of Christ (Scientist), Boston, Mass.

Mrs. Mims is a lady of mature years who presents a fine appearance on the platform and who speaks in a pleasing and convincing manner. She began by saying that Christianity is a science which can be proved to one's own satisfaction as well as mathematics or any other science. It is a science whose principle is God himself and which is the outcome of the reign of righteousness. The God of other churches, the spiritual God, who is omnipotent, omnipresent, and omniscient, is the God of Christian Science.

Where then is the difference? The only difference is that Christian Science stops to ponder this sublime definition of God. It reiterates the teachings of Jesus and is fulfilling the mission of the Comforter. It is an exposition of the glorious character, Christ Jesus, who walked humbly with the multitude, healing every manner of disease, raising the dead, spiritualizing and uplifting men. Christian Science is the fundamental law which has existed throughout all time: it is the law of right against wrong, which permeates all nature, all things and all persons. It is the work of Christian Science to bring about the millennium by the abolition of sin, disease and death through the return to primitive law. The exemption of the apostles from disease and harm is our inheritance.

ourselves of them; while to put on the new man, created in righteousness and in the image of God, is the work of Christian Science.

Mrs. Mims, who is a student and personal friend of Mrs. Eddy, paid a beautiful tribute to the Christliness of her character and far-reaching and beneficent influence of her life and work. She said that Mrs. Eddy was not only one of the world's greatest religious teachers and reformers, but that through her discovery of the Science of Mind, and that Christianity is a demonstrable Science, she has made the sublimest and most practical discovery of the modern world, and is, therefore, rightly entitled to as high a place among the scientists and discoverers, as among the spiritual teachers and reformers.

In defining material law, which it is the task of Christian Science to break down, Mrs. Mims said: "Mrs. Eddy tells us that the consensus of human opinions makes a material law; if physicians and others believe in contagious diseases that makes a law and we have its results in contagion. But let a strong, united Christian thought declare and hold to it steadily that God's law never ordained sin or suffering but that there is an ever-operative 'law of the spirit of life in Christ Jesus that hath made us free from the law of sin and death' (Rom. xiii) and humanity will gradually be redeemed from all evil and the sin that brings discord and death. It is for this that Christian Science is striving."

MANY FRIENDS ELECTED.

In a conversation with Mr. Carl F. Kuehne, he informed us that a number of his college chums and friends had been elected to office. Among them he mentioned Charles Burke Elliott, who was elected Supreme Judge of Minnesota. Mr. Elliott was a roommate of Mr. Kuehne at Iowa City when both were at the State University.

John L. Kennedy was elected to Congress from the Omaha District, defeating Editor Hitchcock. Mr. Kennedy was a class-mate of Mr. Kuehne at the Iowa College of Law.

Norris Brown, who was raised in Greene county, and who was a school-mate of Mr. Kuehne at the University was elected Attorney General of Nebraska. Mr. Brown is a brother of Mr. Leon Brown of the Des Moines Register and Leader.

Cyrus Beard, who was formerly a member of the law firm of Shaw, Kuehne & Beard, and who is a graduate of Iowa University, was elected Supreme Judge of Wyoming.

James E. Watson, of Indiana, who is a colleague of Mr. Kuehne in the Supreme Lodge, Knights of Pythias, was elected to Congress from the old Holman District in Indiana.

J. W. Sullinger, another colleague in the Supreme Lodge was elected to Congress from Missouri.

Judge Deemer, who was re-elected to the Supreme Bench of Iowa was a student at the State University while Mr. Kuehne was there.

W. D. Griffin, a law class-mate was elected to the state Senate in Nebraska.

E. D. Gould, of Walback, Nebraska, formerly of Crawford county, the son of Mr. and Mrs. H. W. Gould of Denison, was elected to the State Senate of Nebraska.

GUESSES ARE COMING

A Large Number Are After The Prizes.

MORE INTEREST THAN EVER

Many Pay as Much as Two Years In Advance in Order to Guess The Number of Feathers.

Now that the election is over, people are beginning to take renewed interest in our Rooster Guessing contest. Our rooster is the center of attraction to persons visiting Denison. He is such a fine bird that people say it is a shame to kill him. He is a thorough bred barred Plymouth Rock, costing us ten dollars, and if he were to die the death of an ordinary scrub rooster, butchered to make a "Yankee holiday," it really would be a shame. But he has been dedicated for the one grand purpose of assisting us in this contest and helping some one to win the buggy or the photograph.

When we first started this contest a great many people said it was impossible to count the feathers on a rooster, but since that time so many people have actually done it, that all doubts have been removed. One boy to make sure said he counted them five or six different times and got practically the same number each time.

Many of our subscribers who are paid in advance as far as July and August 1905 are coming in and paying another year in advance in order to get a chance to win a prize.

The fact is just this. We want subscribers; and you want a good paper and a fair chance to win either the buggy or the talking machine. For every fifty cents paid on subscription you get two guesses.

The buggy, the phonograph, and the rooster are all on exhibition at THE REVIEW office and you can inspect them if you wish before making your guesses. But the thing to do is to hurry up and get into the band wagon. Everybody has a fair and equal chance to win one of the prizes which we offer and you may be one of the lucky winners.

Guessing coupons for the contest can be secured at the following places in the county:

- Denison—THE REVIEW office.
- Manilla—Hackett & John.
- Charter Oak—D. H. McWilliams & Co.
- Dow City—W. H. Wiggins.
- Vail—Glynn Bros. Drug Store.
- West Side—West Side Drug Co.
- Schleswig—McGarvey & Schultz.
- Kiron—Clausen Bros.
- Arion—King's Drug Store.
- Deloit—Mrs. S. Horr.
- Buck Grove—Mrs. Fannie Bonney.

One of the most interesting plays of the last decade is Mr. Carter's powerful drama, "Her Only Sin," which will be shown to our theatergoers on Monday evening, Nov. 21. Mr. Carter has surrounded Miss Gray with a most excellent supporting company.

New York Apples

We have a car of New York Apples on hand now, and if you will come in and see them we believe you will not go out before buying a barrel.

Thanksgiving will soon be here. Don't forget about the candy and sweet meats that make the children happy. Leave your order for Buckwheat Flour. We expect to have another ton of Buckwheat flour in a few days of our own grinding, which we warrant absolutely pure.

Have you bought that Range and Heater yet? Remember cold weather is coming. Don't neglect it too long. The ones we have sold are giving excellent satisfaction, and we still have others to sell. Come in and let us please you.

Have Another Year of Good Bread by Using "WIZARD" Four.

CASH STILL PAID FOR BUTTER AND EGGS.
