Some People Think

A Shoe is a Shoe and that's all there is to it. They praise or condemn a Shoe without examining into its quality, how it is made, the kind of leather, the way the sole is put on, how it will fit, the kind of leather in the soles, the kind of counters, whether it is sewed with silk or linen thread, and many, many other things to consider. That's the reason we ask you to come to a store that knows when all these things are or are not in a shoe. We know. We have been at it for sixteen years, buying and selling shoes. We know who make the good and know who make the bad. We stand between you and the bad and we sell only the good. We want you to come in and put us to test. We know when a shoe is good and you will get the best fit of it at

Kelley's Shoe Store.
