LALLY RESIDENCE STRUCK.

Lightning Visits Residence of Prominent Attorney While Family is at Okiboji for Their Vacation.

It would be hard to make any one in Denison believe that lightning never strikes twice in the same place. The Lally residence seems to be the special objective of all the lightning that plays about the vicinity of Denison. During the severe storm on Tuesday noon the building was struck for the third or fourth time since its erection. The damage inflicted was slight, the chimney being struck, a hole burned in the roof but the heavy rain extinguished the fire even before the fire company could get to the grounds. Two years ago this same chimney was destroyed a large fragment being hurled to the ground on the spot where one of the children had been playing but a few moments before. This time the entire family was away, having gone to Okiboji for their summer vacation. It oddly happened that an insurance adjuster was in town and he adjusted the loss before leaving, making it a record case in time of settlement. We cannot imagine why the Lally residence should be so particularly attractive to lightning. It cannot be Mr. Lally's personal magnetism for he was absent. We are inclined to believe that the house is built upon an iron mine and that a fortune awaits the prospector who shall find it.
