

"The Manager of The B & A"

By Vaughn Kester

This is one of the most popular railroad stories ever written. It is high grade literature. We have secured exclusive rights for this great story in Crawford County. It will begin the third week in July and will be published in installments of not less than

ONE PAGE EACH WEEK

American Story Depicting Railroad Life. Popular hero appeals to the reader. Full of action, keeping the interest at High Tention. Abounding in Dramatic Situations.

Will Appear in the Review during July and August

Do Not Miss The Opening Chapter of This Great Story

S. P. Jacobsen was a business visitor in West Side yesterday.

Arthur Green made a business trip to Vail on Thursday last.

A fine rain this afternoon is bringing smiles to the farmer's faces.

Tom Curry spent a few days with friends in Denison this week.

J. C. Saul left on Wednesday for a business trip to Douglass, Wyoming.

Mrs. Robt. Plimpton has been suffering from an attack of appendicitis this week.

Mrs. W. E. Bryce and children expect to leave on August first for an outing at Lake Okoboji.

Mrs. Cressler of Cincinnati, Ohio, is expected this week to visit her mother, Mrs. E. H. Wood.

Mrs. Lynn and son Denver, are the guests of Mrs. M. Morgan. Mrs. Lynn is a sister of the late Mr. George Catt.

Mr. and Mrs. G. L. Caswell and Mr. and Mrs. C. C. Vail are representing Crawford county at the editorial meeting at Cedar Falls this week.

Mr. and Mrs. Chas. Bollen intend to leave next Sunday for a two week's vacation to be spent in Denver, Colorado Springs and other Colorado points.

The two lectures delivered last Sunday by Rev. Chas. A. Killie were the most interesting missionary lectures ever given in Denison. The meeting was largely attended. The illustrations shown in the evening were especially fine and interesting.

The Presbyterian Sunday School held their annual picnic on Wednesday last at Marshall's grove. A large number of the little folks were in attendance, as well as quite a number of the older ones, and a most enjoyable time was had by all.

The directors of the Crawford County Telephone company held their annual meeting on Tuesday. The old officers were reelected, and J. F. Glenn re-employed as manager for the ensuing year. The affairs of the company are in a flourishing condition.

Arthur Cavett met with a painful accident at the creamery last Tuesday. He was badly burned by sulphuric acid, a bottle of the deadly stuff being overturned and falling on his head and shoulders. We are glad to say that he is recovering, although the pain has been intense.

Chase and Chas. Kemming are "baching" it while papa and mamma are away for a month's visit in New Mexico. They will visit Mrs. Kemming's brother, Frank Clough, at San Marcel and Mr. Kemming will take occasion to look up the interests of Denison people in the mines at Silver City.

THE REVIEW LIST.

The Review's county list is now the largest it has ever been and is not less than 500 greater than that of any other paper in Crawford county.

These are facts which the Review is willing and able to prove. If a merchant were having hand bills printed and one office offered to print two thousand for the same price for which another office offered to print 1500, we believe he would take his work to the two-thousand office. The Review not only offers to print your advertisement 2000 times for the same price that others offer to print it 1500 times, but it also agrees to distribute your advertisement to 2000 homes in Crawford county.

Just think it over, Mr. Business man. Let it soak in, as Secretary Shaw would say, and see what you think of the Review as an advertising proposition. If you want to go on spending your money in papers having from 500 to 1500 circulation, that is your privilege, but do not forget that the real money earning ad. is the one that goes to the people through the big Review list.

The best directory of Crawford county now in existence is the subscription list of the Denison Review.

Miss Edna Raine and her niece, Margaret Christiansen, left on Wednesday for a brief visit in Dunlap.

Mrs. Lillian Plimpton Black left this week for a visit with her sister, Mrs. Fegley, at Modale. From Modale she will return to her home in Washington. Her Denison visit was greatly enjoyed by her many old time friends.

Your attention is called to the announcement of the Memorial University at Mason City. It is a good school backed by the Sons of Veterans of the United States. Those interested should call on Mrs. Georgia Wade McClellan for information.

A PECULIAR FISH.

The Turbot's Ball and Socket Eye of Black and Gold.

Lying limp and slimy on a fishmonger's slab, or dry and sandy in the fishwives' baskets, the turbot is, perhaps, the least interesting of fish. When swimming in an artificial sea or lying on the sandy bottom it is the most attractive of all of the denizens of this mock ocean and whether at rest or in motion has an air of vigilance, vivacity and intelligence greater than that of any of the normally shaped fish. This is in part due to its habits and in part to the expression of the flat fish's eye. This, which is sunk and invisible in the dead fish, is raised on a kind of turret in the living turbot, or sole, and set there in a half revolving apparatus, working almost as independently as the "ball and socket" eyes of the chameleon. There is this difference, however, in the eye of the lizard and of the fish—the iris of the chameleon is a mere pinhole at the top of the eyeball, which is thus absolutely without expression. The turbot's, or "butts," eyes are black and gold and intensely bright, with none of the fixed, staring stupid appearance of ordinary fishes' eyes. It lies upon the sand and jerks its eyes independently into position to survey any part of the ground surface, the water above, or that on either side at any angle.

If it had light rays to project from its eyes instead of to receive, the effect would be precisely that made by the sudden shifting of the jointed apparatus which casts the electric light from a warship at any angle on to sea, sky or horizon. The turbot, though ready, graceful swimmers, moving in wavelike undulations across the water or dashing off like a flash when so disposed, usually lie perfectly still upon the bottom. They do not, like the dabs and the flounders, cover themselves with sand, for they mimic the color of the ground with such absolute fidelity that except for the shining eye it is almost impossible to distinguish them. It would appear that volition plays some part in this subtle conformity to environment, for one turbot, which is blind, has changed to a tint too light and not at all in harmony with that of the sand.—London Spectator.

POINTED PARAGRAPHS.

No man is as dangerous as his threats.

When some men have nothing to do they become reformers.

If a man asks a candid opinion from a friend and gets it, it makes him mad.

Some people invariably get the worst of it, because they are always demanding the best of it.

As soon as a man gets a notion that his employer can't get along without him he is getting ready to lose his job.

There is always the danger that every man will become the hired man and every mother the hired girl to their family.

When a young man begins to make regular visits to a girl, how it would knock out the romance if it were said that he was calling on her to make arrangements for hiring a cook.—Atchison Globe.

Where Kit Marlowe Was Buried.

St. Nicholas, Deptford, possesses richer literary, artistic and naval associations than most churches of the river side. It was the parish church of John Evelyn and his tenant, Peter the Great, who delighted to make the parson drunk, as well as of a long line of naval heroes. One of the many historic monuments quaintly commemorates Peter Pett, "the Noah of his age," who invented the frigate. A weird wood carving, representing the prophet Ezekiel in the valley of dry bones, is by Grinling Gibbons, who was "discovered" here by Evelyn. The parish register records the burial of Christopher Marlowe, "slaine by Francis Archer" on June 1, 1633.—Westminster Gazette.

SUBMARINE REEFS.

How They Are Located by the Naval Engineers.

Prior to the nineteenth century navigation, except on the high seas, was mainly that of the Irish pilot who claimed to know all the rocks in the harbor. "An' there's wan of thim!" said he as he struck.

On approaching land one needs to know how far he is from the lighthouse or headland in sight. Triangulation tells him. Two points on land being taken for the base of the triangle, lines from these points, representing the other two sides of the triangle, are drawn until they intersect. That apex of the triangle will be the point where the observer is. Then the distance from his point to the land can be easily calculated.

The maritime wars under Napoleon disclosed the dangerous ignorance of French mariners about their own sea-coast. French vessels were unable to break or run their enemies' blockade. After peace was established Beaupre-Beaupre was appointed as the organizer and chief of corps of engineers to chart the whole coast of France. His work was so well done that the other naval powers hastened to chart their own coasts according to his methods.

The head of a rock may easily escape ordinary soundings, or lie between soundings. When covered by ten or more feet of water and unmarked by ripples or breakers, it is hard to find. Even when known it is hard to get soundings. The lead may glide over it, so that even in well surveyed waters some unlucky ship out of hundreds passing there may "find the rock with its keel."

Groups of buoys with grappling irons are lashed together in long sweeping lines and sunk behind the small sounding boat until they touch bottom, and are then towed until they strike a rock. In calm weather rocks and reefs may be seen at great depths from great heights in balloons. Even after a rock has been discovered, its depth and position must be precisely ascertained. Fishermen, too, help make known these uncharted rocks, rewards being offered for all new ones discovered.

England, the United States, Spain, Italy and other maritime nations have adopted French methods. Japan for years has devoted to the subject its usual minute, trustworthy and masterful study, but has imitated the English crowded and complicated charts rather than the artistic execution of the French.—New York Tribune.

Toilet-Toilet.

In the "New World of Words," 1720, "toilet" is defined as "a kind of Tablecloth or carpet made of fine Linnen, Satin, Velvet or Tissue, spread upon a Table in a Bed Chamber where Persons of Quality dress themselves; a Dressing-cloth." A similar definition is given in Bailey's dictionary. The origin of the word is curious, for Cotgrave has: "See 'Toilette,' A toilet, the stuff which drapers lay about their cloths; also a bag to put nightgowns in." In the "Hape of the Lock," 1, 121, "toilet" seems used for the table and its contents:

And now, unvell'd, the toilet stands display'd,
Each silver vase in mystic order laid.

—Notes and Queries.

Giant Tomato Plants.

The largest tomato plants in the world are found in California. One grower has three plants which have reached a length of thirty feet. In three months from the time the seeds were planted the vines had climbed to the top of a twenty foot trellis. The trunks of these plants, says What to Eat, are one and a half inches in diameter and the foliage is thick and luxuriant. Enormous quantities of tomatoes have been picked from them and the fruit is of unusual size, possessing an extraordinary fine flavor.

Lava.

Lava may be blown into opaque bottles of gossamer lightness, and the harder sort makes a beautiful green glass of half the weight and double the strength of ordinary glass. But it is not always the same. Every volcano pours out its own special brand of molten mixture, disagreeable to walk on, but sometimes yielding precious products, as pumice stone. Lava, like all things, decomposes under the touch of time, as the fertile plains of Sicily testify.

Marriage.

"What I want," said the young man, "is to get married and have a peaceful, quiet home."

"Well," said Farmer Cornstossel, "sometimes it works that way, and then again sometimes it's like joinin' a debatin' society."—Washington Star.

IT WILL PAY YOU

to read this advertisement and go to Randall & Boylan to do your trading. Our line is complete in every department—consisting of Watches Clocks, Jewelry, Silver Ware, Cut Glass, China, Ladies Purses and Hand Bags, Albums, Mirrors, Pictures, Lamps, Jardiniers, Umbrella Holders, Kodaks and Kadack supplies, Sewing Machines, Edison and Victor Phonographs, and a nice selection of records for same. Pianos and Organs, Accordions, Violins, Guitars, Mandolins, Zithers, Banjos, and a dozen of other small instruments that space forbids to numerate. A complete line of supplies for all kinds of instruments. Also the latest in sheet music—both vocal and instrumental. If you want any thing in the above lines, or if you are contemplating buying a present, and dont know just what you want, come to us we can assist you, we take pleasure in showing our goods, knowing we have the best in quality and the cheapest in price. We pride our selves on our repair department—the efficiency of which cannot be excelled. Let us clean your watch, Once a Customer, always a Customer. Remember the place, 4th door north of Post Office.

Extra Special Excursion TO WYOMING

Through Cheyenne, On to Look-out—And best of all, A TWO DAYS FREE DRIVE Across the Laramie Plains and Mountains, Camping one night on the banks of the largest Irrigation Reservoir in America.

ONLY \$21.35 For ROUND TRIP.

It is a trip that you and your friends cannot afford to miss, combining as it does the ride over Sherman Hill, the highest point on the Union Pacific road, the matchless sight of snow-capped mountains in mid-summer and the drive of 70 miles across the Laramie Plains and Mountains, ending at Wheatland in the midst of the finest irrigated lands of the west; lands which are being sold at less money than it cost to reclaim them, yet on terms within the reach of all. Immense crops of Wheat, Oats, Spelts and Alfalfa will be growing for our inspection.

No charge is made for this 70 mile drive, use of tents and bedding and the three meals furnished on the trip.

I have personally inspected this country and have bought land there as I believe it is one of the cheapest and best land propositions in any country. I expect to accompany this excursion and shall be pleased to hear from any one who would like to go. The time is very short so write or phone me at Geo. Menagh's store as soon as you read this and I will tell you all about it. It will be a cool, delightful and restful trip at the lowest possible rate.

For Free Overland trip I must notify Company by July 14.
