HEAVY DEALS IN DIRT.

March Shows an Enormous Volume of Real Estate Transfers.

On another page the Review prints the real estate transfers up to last Saturday evening. These transfers will be of interest to many although dry reading to some. The Review believes in keeping things as near up-to-date as possible however. The large volume of transfers shows that Crawford county realty is still at a premium. The prices are uniformly high, and while many are seeking the cheap lands of Dakota there is no danger that the fertile hills of Crawford will remain un-tilled.

A Crawford county farm is the best investment on earth. The prices paid indicate the general prosperity of the country. Were times hard prices would be much lower. In this manner every farmer of Crawford county, be he democrat or republican has benefited by the measures and policies of the republican party which have fostered and made possible the abounding prosperity of to-day. In passing, let us remark that the Review is the only paper in the county which keeps the real estate transfers up-to-date.

COLLEGE NOTES.

Miss Brackney the teacher of oratory, has been sick with the grippe for a couple of days but is better now.

Miss Margaret Weaver was called to her home in Breda on Saturday to take care of her sister, who is threatened with pneumonia.

On Saturday the boys did considerable work in fixing up the ball grounds. A back stop was put in place and a fence begun to keep teams from driving across the grounds. It is a pity that the grounds can not be enclosed with a tight fence. It is the only good place in town, conveniently situated for athletic sports. Two or three fences have been built around lots for ball parks and in a short time the fences have been practically given away to some one to remove them. If this field were enclosed there would be no reason for ever disturbing the fence. It is needed, for the town has no ball-park and the expenses of the games cannot be met unless grounds are enclosed and visitors be compelled to pay for the pleasure they have in viewing the game. Will not some of the public spirited citizens give the boys a lift in the matter?

Miss Matilda Noonan of Kenwood was in town Saturday and arranged to enter the spring term. She has been teaching the past fall and winter.

The Gentlemanly Leopard.

The cheetah has a reputation as one of the most gentlemanly of beasts. A story from Ootacamund shows what fine manners the animal has. Three Calcutta visitors to the hill station were out on a tramp when they were overtaken by a thunderstorm, accompanied by sheets of rain. They spied a cave in the side of the hill, and into it they rushed. When the rain stopped they came out and, to their surprise, found a cheetah sitting licking the heavy wet off his waistcoat and his paws. It was his cave, but rather than deprive his visitors of their shelter the polite creature had sat outside in the driving tempest. With a friendly mew and gracefully wagging his tail, the cheetah bade adieu to his guests and walked with dignity into his house.—Asian Magazine.

How to Succeed in Literature.

The qualities which I consider most conducive to success in literature are imagination, coupled with a great knowledge of the world, concentration, the willingness and ability to work hard, a considerable knowledge of business and a firm determination to ignore the instructions of literary and other agents with regard to what the reading public may be supposed to require. If any author once loses his independence in writing he may be called finished, so far as any career is in question.—John Oliver Hobbes.

Now is the Time Here is the Place To get your Spring Farm Machinery

This is the planter that cannot even be imitated, so strongly is it protected by patents. For the past four years the leader of all Edge Drop Planters.

Plants 2, 3 or 4 Kernels in a Hill With One Set of Plates. The ONLY Corn Planter That Will Do It.

Remember, you can get any drop desired; two, three or four in every hill—or two in one hill, three in the next; three in one hill, four in the next. You can secure either combination, consecutively or alternately, without change of plates.

Plates are furnished for seed of various sizes, and after selecting the plates to match your corn, no changing of plates is required. By this means the fertile or barren portions of a field will receive the proper quantity of seed without vexatious delays when your time is valuable.

By means of a continuous revolving shaft the plates are operated at only one half the speed required in other edge drop planters. This prevents cracking the corn and insures steady running, as the shaft, revolving continuously, does not stop and start with a jerk.

The Canton Edge Drop Planter excels in every respect—it is strong, simple and compact, with the latest and best labor-saving devices.

We are selling this planter because it is the best one we can buy.

Come in and let us demonstrate its merits. Seeing is believing.
