SINS OF OMISSION.

It seems that no matter how hard an editor may try to get every bit of news into his paper, it is practically certain that he will leave undone those things which he ought to have done. Last week the fourteen pages of the Review were fairly overflowing with news, but nevertheless several matters were omitted some of which the editor greatly regrets. The most important of these was the neglect to mention the opening of the hospital to the public on Sunday last and the invitation to assist in the Linen Shower for the institution on Monday. The hospital management was much disappointed as it was felt that in no other way could the people be so effectively reached. The Review has always felt the kindest possible interest in the hospital and has done all that it could to promote its welfare. It was thus a great disappointment to us that mention of the opening was omitted in the rush of work on Tuesday.

We also forgot to mention the "Ladies Night" to be given by the Commercial Club the first Monday in April. The club members will try to show the ladies a royal good time. This meeting will be exclusively for members of the club and their ladies.

Although mentioned in our Kiron correspondence, there was no mention in our local news of the return of Swan Johnson, from his visit to Sweden. After a delightful visit Mr. Johnson has returned, more in love than ever with the land of his adoption. On the return journey he was accompanied by his sister and her family, making a party of eight to cross the Atlantic. They had a rough voyage

and were somewhat delayed in passage and were exceedingly glad to get on terra firma. A large number of Mr. Johnson's friends and neighbors showed their pleasure at his return, by tendering him a jolly surprise party at his home in Milford.

Sins of Commission.

These are so many that the busy editor hardly has time to apologize. They are inevitable and the best one can do as a rule is to say nothing and try to avoid them in future. Last week a comical mistake was made by our ad. man however. In setting the advertisement of Dr. Weber the wrong cut was used and Fred Soehl was pictured as the unfortunate youth, born without tear ducts. So far as we know Fred's tear ducts have always been in good working order, though we hope for his sake he has little occasion to use them. Fred seems to be particularly unfortunate in print. Some years ago this paper reported his death at Manning, but he came up smiling to give us the lie. Having forgiven us for murder, we throw ourselves with confidence on his mercy in so small a matter as the loss of a few tear ducts.

After all however last week's Review was a great big fourteen page paper, all home print, and with less than three columns of "plate". It was a credit, not only to the Review management, but to its many correspondents and to the splendid support of the business men and local advertisers of Denison. A succession of such papers can but benefit the entire county.
