Fire drills have been inaugurated at the Denison schools since the horror of last week. Outside fire escapes should be erected at the West brick school especially. At present there is but one stairway, in the middle of the building, and that would become a regular flue in case of fire.
The new passenger service on the Illinois Central practically wipes out the small towns from the map. The inadequate train service does Denison merchants great harm and the Commercial Club should file effective protest at once, taking the matter before the Iowa Railroad Commissioner if necessary.
Mr. and Mrs. Joseph Scott left this week for a tour of inspection in Oregon and Washington. Mr. Scott will visit a brother whom he has not seen for over twenty years, and it is very possible that he will make the west his future home. This is one of the finest families Denison has known and there will be much genuine regret should they decide to leave here.
"Better late than never," seems to be the motto as to the use of the King drag in Denison. The dragging has done much good, but it would have done more if done last Friday. Prof. King says the one of the requisites for the King drag is m-u-d. The drag should be used in soft mud, not after the roads are nearly dry, if the best results are to be obtained.
There was a meeting of the directors of the city hospital board on Monday evening. They were making preparation for the annual meeting which comes the first Monday night in April. It is expected that the showing will be a good one. Many permanent improvements have been made in the past year, but now the hospital is well equipped and in fine running order. We are pleased to hear that the rooms are full most of the time.

The departure of Leon Cassaday brings to light that the Canada government will not allow stock to enter, unless duly inspected to insure exemption from disease. Happily for him the United States government has appointed Dr. Simpson of Denison an inspector, and his certificate will be accepted by the Canadian officials. Our county is fortunate in having a recognized scientist on veterinary matters living here.
Mr. Lee Gable returned to his present home at Genoa, Nebr., on Monday morning. While here he contracted for a large monument to be erected at the grave of his wife, in the Denison cemetery. Mr. Gable came to this county in 1858, and the reminiscences which he can relate of pioneer days are thrilling. As many know he was a hunter, a fine marksman, versed in the habits of game animals, a trapper of the fur bearing animals. Mr. Gable is now seventy-seven years old, but he does not act or look it. He makes it a rule to walk a number of miles each day, and so keeps himself in good health. He was looking forward to some duck hunting on his return to Nebraska.
