QUEEN of the HARVEST FIELD

The Hodges Queen Binder

Season after season of use has proved to the farmers that this is the BEST, MOST DURABLE and LIGHT RUNNING BINDER MADE today. We can refer you to scores of satisfied users among your neighbors. We do not need to go away from home for endorsements of its good merits.

The Only Binder having 3 Packers

This is an important feature, as the third packer reaches farther up the grain than with any other binder. Every farmer will appreciate this good point. Still more important—the

The Packers Stop when Needle is Tying the Bundle

This does away with the continual hammering of the packers and enables the HODGES QUEEN to turn out the neatest, cleanest bundle made by any binder. We say this without fear of contradiction. With other binders the bundles are all tangled up—with the Hodges Queen they are not.

The Butter is of Steel

Not of wood or canvass as in other machines. There are scores of other good points, which we will show you if you will call at our warehouse, where we also exhibit a fine line of MOWERS and HAYING TOOLS and DEVICES. A visit will interest you and give you pointers as to the latest in farm machinery. Give us a call.

The game was not interesting for our boys were not in practice and were beaten by the Cowboys 14 to 3. But the performances of that horse attracted attention. With a man on his back he tried once to dash through a five foot barbed wire fence. This was a warning to some in the crowd to beware, and well it was, for soon the animal made another rush and this time went through without a scratch on its body. It dashed into a baby cab from which Mrs. Frank Binnell had but a few moments before taken her child. The enraged horse tore about on Main street and finally made a dash for home two miles south. It was a seeming miracle that none of the spectators were hurt.
