The city council met last night and discussed the question of sprinkling the streets. It was talked that if the merchants would pay for the water the city would see that the streets were sprinkled. According to a ruling of the Attorney General it appears that the city has no right to use the city water for sprinkling purposes. It was thought that the general fund might be used as the dust and dirt flying on the business streets form a decided menace to the public health.

Schleswig Leader: The Denison Review says that "now that the water in Schleswig has been tested and found pure, the authorities should send in a sample of the beer and have that examined also." Dr. J. J. McWilliams of Charter Oak was in Denison last week to visit his uncle, Mr. Sam Loney, who is still seriously ill. While in Denison Dr. McWilliams received the new Klaxon noise maker which he had ordered for his auto. It is certainly the most diabolical thing we have ever heard. It sounds like a cross between a charivari and a Wagnerian overture, with a cat fight in the middle distance and a boiler factory on the side. The theory is that if a team scares at the auto, you sound the Klaxon and this so paralyzes them with fright that they can't run.

The best remedy we know of in all cases of Kidney and Bladder trouble and the one we always can recommend, is DeWitt's Kidney and Bladder Pills. They are antiseptic and at once assist the kidneys to perform their important work. But when you ask for these pills be positive that you get DeWitt's Kidney and Bladder Pills. There are imitations placed upon sale to deceive you. Get DeWitt's. Insist upon them, and if your dealer cannot supply you—refuse anything else in place of them. Sold by Lamborn Drug Co.
Most appropriate for this season when bathing is all the go, is the frontispiece of our magazine representing a young woman in her bathing suit ready for a plunge. Of course those who are having the magazine have noted the excellent short stories and illustrated articles from week to week. The inside history of some of the circus fakes will prove interesting to many who remember what a stir there was over bearded women, savages just from Africa, sacred white elephants and other freaks in the days of Barnum and showmen of his kind. The way smuggling is done and the means taken to detect it furnishes the subject matter for a good article. The suggestions as to "How to see Europe" are very witty and full of things to make one laugh and the essay on the moon is not bad.
