Getting Up in the World

Is a harder job for some folks than getting up in the morning. We'll guarantee that you'll get up on time from that good, sound, refreshing sleep if one of our alarm clocks is in hearing distance. The market is full of cheap makes—we saw one the other day with lead pivots—but we don't keep that kind. There's only a few cents difference in the price, and the satisfaction we do up with the clock doesn't cost you cent.
