The Misses Mary and Lizzie Smith returned from an extended visit to Sioux City Friday evening.

Lute Peterson left Saturday evening for Manila, where he has secured work. If he likes it he will have his family follow him or as soon as he can get a house to rent.

When the report that R. J. Moffitt had sold out his general stock and store here it came on the community as a great sorrow. Mr. Moffitt is one of the oldest settlers here and his father, Samuel Moffitt, had the first store in Buck Grove to which business Mr. Moffitt succeeded when his father retired several years ago. Mr. Moffitt traded his store and stock for a half section of improved farm land in Minnesota. He seems well pleased with his bargain and is making preparations to move immediately to his new home. Mr. Burghart is the owner of the store, but will not run it himself. Mr. Lee J. Jacoby will probably have charge when Mr. Burghart goes away. The new firm says that they will run the store on the same basis as Mr. Moffitt and that the reports that prices will be raised and no credit extended are not true. Credit will be given to all responsible parties and that means everybody around here as we have the finest people and the best neighborhood to

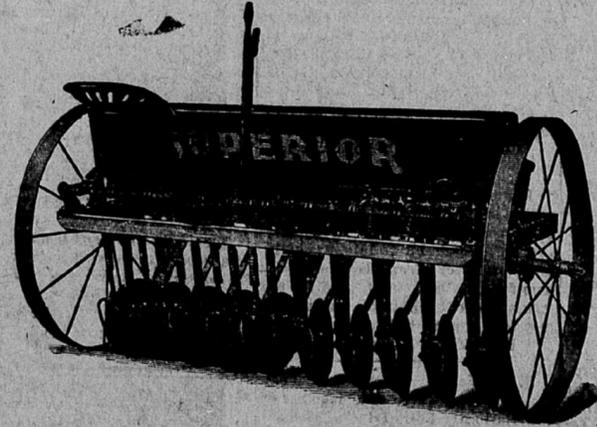

Spring is Almost Here.

We carry the largest stock of Farm Implements in Crawford County. We have just received 4 cars of spring goods of the very best manufacture. We extend a cordial invitation to the farmers who are in the market for the best machinery at the lowest prices, to call and look over our immense stocks.

CORN PLANTERS--Janesville, Gretchen, P. & O.

The Gretchen can be operated both hill or drill drop. It meets the demand for a thoroughly reliable combined planter. No expense has been spared to make it a first-class machine in every detail. The P. & O. corn planter is a planter of medium price, but along the simplest lines, and for these this type of planter will prove a most satisfactory one. There are no complicated or intricate parts to get out of order or puzzle the farmer to put in shape for work.

Superior Grain Drills

DRILLED GRAIN MEANS:

1. Once over the ground with the Superior, seed all planted at an even depth. Seed all covered. Just one operation. Let it rain. Your seed is in the ground and it's even and covered well.
2. Even sowing means even growing, uniform ripening and high grading.
3. Well rooted plants withstand hard winds, hot sun, drouth and freezing.
4. A good stand of clover, because it is sown between the grain rows and gets plenty of light, moisture and air. Takes less seed and is not planted too deep.
5. Saving of seed of from 50 to 75 cents per acre.
6. Increase in yield and better quality.
7. You can make the price of a Superior Grain Drill on 40 acres in increased yield and saving of seed.
8. You can reseed pastures and meadows with a Superior Disc Drill, and get the seed in the ground, under the sod, and relieve the sod bound conditions.
9. It increases your profits.

BROADCAST GRAIN MEANS:

1. Three times over the ground. First, disc the field, 2nd, then broadcast, 3rd, then disc again. Some seed planted out of sight, some not covered. What, if no rain?
2. Uneven sowing means uneven growing; some ripe one time, some another, low grading of grain.
3. Shallow rooted plants go down in hard winds, when hit by frost, by the sun or drouth.
4. Clover seed broadcasted with oats is frequently smothered, because it grows slower and consequently is shut off from sun and air. Takes more seed. Some is planted so deep it never comes up.
5. Loss of seed from 50 to 75 cents per acre.
6. Loss of from 5 to 10 bushels per acre Poor quality.
7. That on 40 acres you loose the price of a Superior Drill, because you waste seed and get fewer bushels per acre.
8. You can broadcast the clover seed on top of the sod, waste costly seed, do the sod no good and fail to increase the forage of your hay tonnage.
9. You waste seed, time, labor and money.

Gang Plows, Rock Island, Liberty Foot Lift. Every meritorious feature of plow construction is found on the Liberty, and with its new style bottoms and special shares and partially curved mold boards, is in a class by itself.

Stirring Plows—Moline, Janesville, Rock Island and Morrison

J. H. TAMM, Denison, Iowa

be found anywhere right in this section. Will Moffitt will stay with the new firm and so will Lura Moffitt. They both received very flattering offers for their services which have been accepted so it will still seem like Moffitt's store.

There will be an election of town officers on the 28th of March for mayor, treasurer, five council men and other officers.

There will be mass here in the Catholic church next Sunday March 13th, at eleven o'clock.

Mrs. P. Collins is now located in the Knott residence recently occupied by Ed. Smith and family.

Miss Dora Schroeder spent Sunday at her parental home. Miss Ruby Mullinger spent Sunday with her.

Mrs. Alpha Hadley visited in Defiance Saturday with her sister, Mrs. Ike Van Metre.

Miss Deveta Mills visited in Manning Friday with her friend, Miss Allela Rogers, who came home with her Saturday and spent Sunday here.

Ed. Smith and family are now located in the Barber residence recently vacated by S. M. Sogn.

Sterling Plowcut, Rock Island and Bonanza

The advantages embodied in the Sterling Plowcut have made it a leader in the disc trade. The Sterling Plowcut has always been a success, and four years experience in harrow building are exemplified in the modern Sterling Disc Harrow.

The Bonanza is a double lever harrow. Each gang is controlled by a separate lever and either gang can be given any desired angle without affecting the other gang.

Important Points to be considered before Purchasing an Engine.

For the purposes enumerated, no line of gasoline engines have given more universal satisfaction under all conditions than the International Harvester Company line. These engines are made in many styles and sizes from 1 to 25 horse power.

Fanning Mills

Weber and Hawkeye will clean all kinds of small grain and grade seed corn.

Sulky Plows, Good Enough, Gangs have a world wide reputation, attained solely on their merits. We also have the Rock Island and Oliver.

Disc Harrows—Janesville

Mr. Farmer: When a manufacturer turns out something specially good his competitors are soon "on to it" They see the public demanding that particular thing and so they fall to imitating the successful manufacture.

And that's why you are so often offered something "just as good." "We don't keep such-and-such but we've got something just as good."—that's the way it goes.

Well, maybe it is just as good, but you are taking chances, aren't you? Why not insist on getting the original article? Then you're sure.

Grass Seeds of all Kinds

Disc Cultivators
Janesville and Moline. They mean better, more thorough cultivation and better crops. Keep that in mind. They are the best.

Buggies—Keys Brothers,
Henney and Marshalltown
1910 styles.

Windmills—Eclipse, Sam-
son, Baker, Fairbanks and
Goodhue.

Scales
Moline, Lightning and Beck-
man. These scales are steel
frame and pitless.

Woven Wire Fence
Pittsburg Electric Weld
and Ellwood Diamond Mesh

Incubators
Des Moines and Petaluma

Grinders
International Power Grin-
der, Lightning and Sterling
Sweep Grinders.

Cream Separators
Empire and U. S.

Manure Spreaders
Corn King and the
Mandt Endless Apron.
Machines that are no ex-
periment, have been on
market for years with
very few changes.

Manure Loader
Universal. Loading
manure by hand has al-
ways been considered one
of the greatest drudgeries
of the farm, besides
it takes days of hard la-
bor to accomplish by hand
what could be done in a
comparatively short time
by horse power.

Wagons—The old reli-
able Studebaker, Old Hick-
ory, genuine T. J. Mandt
