Martin Burke et al to Louise Ecker-

Afraid of Ghosts

Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terror it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink.

The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a hollow cheek, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. It increases the vital power, cleanses the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. "Golden Medical Discovery" contains no alcohol, whiskey or habit-forming drugs. All its ingredients printed on its outside wrapper. It is not a secret nostrum but a medicine of known composition and with a record of 40 years of cures. Accept no substitute—there is nothing "just as good." Ask your neighbors.

ADVANCE FARM CENSUS SCHEDULE

FARMERS TO BE FURNISHED COPIES OF QUESTIONS BEFORE CENSUS BEGINS APRIL 15.

TIME SAVER FOR ENUMERATOR

Four Million Copies of the Schedule Will be Printed and Distributed Among the Farmers. Postmasters to Help.

A great increase in the accuracy of the census returns from the farmers, a considerable saving of the working time of the farm enumerators, and the removal of much of whatever misapprehensions and prejudices may exist among farmers with regard to the census are the important results expected by the United States census bureau to follow the use of the advance farm schedule, which has been adopted and will be circulated through the rural postmasters among the farmers a short time before the actual census taking.

The employment of this advance schedule is a distinct innovation in census methods. It is the logical and practical outcome of the census bureau's persistent effort for some time past to give the farmers a clear and comprehensive preliminary knowledge of the farm census questions and to induce them to keep written records of their farm operations and equipment in readiness for the call of the enumerators, beginning April 15 next.

Four million copies of the schedule will be printed, and this distribution of them among farm owners and tenants will be entrusted to the farm enumerators soon after they are commissioned, about April 1.

Postmaster General Hitchcock has promised the assistance of his department in the effective distribution of the schedules, and he will issue instructions relative thereto to the rural postmasters.

They will be required to address and forward to the farmers receiving mail at their offices the advance farm schedules supplied them by the enumerators.

In a note to farmers on the front page of the schedule, Census Director Durand states:

"In accordance with the act of Congress, the census of the population and farms of the United States will begin on April 15, 1910. On or soon after that date an enumerator will call at your house for the purpose of obtaining the required information concerning your farm.

"Many of the questions asked you concerning the equipment and operations of your farm cannot be accurately answered by you without considerable thought and the making of careful calculations or estimates. Therefore, this form has been sent to you in advance, so that you may study the questions at your convenience and have the answers written down before the enumerator comes. You are earnestly requested to read this form and instructions carefully, to write down the answers to all questions that apply to your farm, and to keep it until the enumerator comes. By doing this you can save yourself much time and contribute greatly to the success of the agricultural census.

"Besides the information concerning your farm, the enumerator will also ask you the names, ages, and other facts concerning the members of your household."

"Plague" Bothers Engineers. The "red water plague" is a matter which is receiving attention from engineers in different parts of the country, and while they have shed considerable light on the matter, there is much yet to learn about it. The trouble consists of a discoloration of the hot water with a rusty sediment, the cold water at the same time being much less affected, although not entirely unaffected. Under the hot water faucets marble bowls become reddened and the first rush of hot water from the faucet after it has been shut off for a few hours has a distinct rusty appearance. Copper wash tanks and metal balcocks are affected seriously where the discoloration of the water is more marked.

DROPPING FROM THE CLOUDS

Australian Aeronaut Describes How it Feels to Descend with a Parachute.

How it feels to drop from the clouds in a parachute is thrillingly described in Popular Mechanics by Capt. Penfold, famous Australian aeronaut. He says: "Glancing up at your parachute to see if the cords are disentangled you grasp your trapeze rope by one hand, your cutaway line with the other, cross your legs around your trapeze bar, collect your thoughts, and pull the knife. At once the wind rushes past you the trapeze seems not to hold your weight, you fall as if pushed, unprepared, from a high stage into the water at the baths. You look overhead to see the parachute open, the parachute cloth is dropping in a bundle to reach you as it were, but before it does, your weight tells and pulls the cords straight, the wind catches under the cloth of your canopy, you have a few anxious moments as it slowly unfolds like a huge umbrella and with a slight tug as if a fish were running away with your fishing line you are supported like a feather, and you experience a feeling of satisfaction and safety. Down you float to terra firma like a bird on outstretched wings, and if it is a calm day, your descent is almost vertical at the rate of eight to ten feet a second. When nearing the ground the earth seems to rush up to meet you, and what at a height of 1,000 feet seemed a small box in an allotment, turns out now to be a good-sized house. You reach the ground as if in a free drop from a height of about four feet."

WOULDN'T TAKE MUCH SPACE

Johnny Poe's Fifty-four Pieces of Luggage Could Easily Be Stowed Aways.

From a friend of Johnnie Poe, one of the greatest half backs that Princeton ever boasted, the state department has learned that the adventurous collegian had undergone a strenuous time in Honduras, but had been rescued by an American gunboat. The friend wrote that Poe, who was a general in command of a one-gun battery, struck for the coast when things began to look black with peace and there was little to do. He found the American war vessel and promptly asked for transportation home.

"Sure," said the commander. "We'll be glad to have you. Come aboard when you want. We'll probably lay up here for two or three days."

"Thank you, old man," said the former football star, warmly, "I'll be aboard before you sail."

"Bring your luggage," said the captain, warmly. "If it isn't too elaborate, I'll be glad to give it room."

"Thank you again!" said Poe. "I'll sure do that. 'I have only 54 pieces.'"

"What!" exclaimed the commander, springing from his chair. "I'm not running a freighter!"

"Oh, well, don't get excited," purred Poe; "my 54 pieces consist of one pair of socks and a pack of playing cards."

The state department learns that the football star reached New York in safety.

Twitching of the Nerves

Wonderful cure brought about by DR. A. W. CHASE'S NERVE PILLS.

It is only by watching the symptoms of nervous exhaustion and applying restorative treatment that you can ever hope to ward off locomotor ataxia and paralysis.

Mr. J. H. Garrison, North Fairfield, Ohio, Route No. 2, writes: "My health failed me and I became a victim of nervous debility. I was weak, nervous and irritable; my arms and legs would jerk and twitch, and as I was 62 years of age did not expect to benefit much by the use of medicine."

"Great was my surprise, however, when I began using Dr. A. W. Chase's Nerve Pills, for it was not long before my nerves were as steady as clockwork and my system began to build up. I cannot begin to express my appreciation for the benefit. It is the best medicine I ever had in the house."

Such cases as this prove the wonderful efficiency of Dr. A. W. Chase's Nerve Pills. They cure in Nature's way by enriching the blood and for this reason their benefits are lasting. 50 cts. a box all dealers, or Dr. A. W. Chase Medical Co., Buffalo, N. Y. Get the genuine.

LIFE-SAVING DOGS IN WEST.

St. Bernards of Alpine Stock Which Have Made Records in the Rocky Mountains.

Few people are aware of the fact that there are a number of St. Bernard dogs of Alpine stock in the Rocky mountains which have enviable records as life-savers. Prof. E. C. Lindemann writes most entertainingly about one of these dogs, in the Suburban Life. He says: "Leo's affection for children seemed to be a passion. At one time he broke down a fence when he heard the cries of a small boy who was receiving castigation at the hands of his mother, and put a stop to the proceedings. He had been very attentive to this little boy when he was ill with typhoid fever and lived in a tent in our garden on the recommendation of his physician. Leo never forgave the mother for her chastisement of the boy, and as a consequence of his obvious dislike, the parents finally moved out of the house. It was Leo's daily habit to conduct a number of children to the school house in the mountains, and go after them, without being commanded to do so, when it was time for the session to close."

Diocese Defined. When Rev. Ethelbert Talbot, bishop of central Pennsylvania, was in London not long ago his fame as the "cowboy bishop" brought thousands of young boys and girls to hear him speak wherever he went. In one of his talks to the youngsters, he held them spellbound by telling them of his diocese in Wyoming, which was more thickly populated in the old days with bears and Indians than with Christians.

When he had finished with his description he asked the English children if any one knew what a diocese was. One of them promptly raised his hand. "What is it, my lad?" "A diocese, my lord, is a body of land with a bishop on top and the clergy underneath," was the answer.

Dr. B. A. Stockdale

The noted specialist of Des Moines, will visit Denison at Hotel Deason, Wed., April 20th, From 10 a. m. to 6 p. m.

Returning every 4 weeks

DR. STOCKDALE wants every person who suffers from a chronic disease—makes no difference how bad their case is or how long they have suffered, or who has treated them and pronounced them incurable. He will make a thorough examination of their case, tell exactly what can be done for them, whether they are curable or not, how long it will require and all about it. He treats only chronic diseases. He has devoted twenty years of his life to the treatment of such diseases as Dyspepsia, Indigestion, Stomach Troubles, Liver Disease, Constipation, Rheumatism, Bladder Troubles, Diseases of the Kidneys, Bright's Disease, Chronic Catarrh in all its forms, Heart and Nerve Troubles—in fact, every variety of chronic disease.

DR. STOCKDALE has originated a system of treatment which he believes is the best treatment known for chronic diseases. He is able to cure many chronic cases that have resisted other treatments—that are considered incurable. He wants it distinctly understood that he does not undertake any case that he thinks incurable, and will tell the patient candidly when he has made the examination.

HE HAS A SPECIAL TREATMENT FOR GENERAL WEAKNESS OF MEN, WHICH HE WOULD LIKE TO EXPLAIN IN PERSON. HE WILL EXAMINE EVERY CASE THAT CALLS ON HIM OF THE ABOVE DATE ABSOLUTELY FREE OF CHARGE. If for any reason you cannot call visit him personally, write him for examination blank at his home office.

Address: DR. B. A. STOCKDALE, Utica Building, Des Moines, Iowa.

The Doctor can be seen in his Des Moines, on Mondays, Fridays and Saturdays.

madam! Don't be misled Cheap and Big Can Baking Powder is Only Big in Size - Not in Satisfaction - Not in Economy

A large can and a small cost does not make baking powder cheap—or even less expensive than Calumet—the high-quality, moderate-price kind. It certainly cannot make it as good. Don't judge baking powder in this way—the real test—the proof of raising power, of evenness, uniformity, wholesomeness and deliciousness will be found only in the baking.

CALUMET BAKING POWDER

the Happy Medium

is a better baking powder than you have ever used before. And we will leave it to your good judgment for proof. Buy a can today. Try it for any baking purpose. If the results are not better—if the baking is not lighter, more delicious, take it back and get your money. Calumet is medium in price—but great in satisfaction. Free—large handsome recipe book, illustrated in colors. Send 4c and slip found in pound can.

Calumet Received Highest Award—World's Pure Food Exposition
