We were only able to briefly mention in the issue of last week as to the death of the little daughter of Mr. and Mrs. Lloyd Winans. Anna Charlotte Winans was born March 16th, 1907, at Deloit, Iowa, and died at her parental home on April 10, 1910, being only 3 years and 24 days old at the time of her death. Little Charlotte was a sweet and intelligent child dearly beloved by all who knew her. She had been sick for almost two weeks of whooping cough and pneumonia and death came as a relief to the little one. She leaves mamma and papa and two sisters, Leita and Loyal, two grandmas and a grandpa besides her uncles and aunts and other relatives to mourn her departure. The funeral services were held at the L. D. S. church Monday at 11 o'clock a. m., Rev. C. J. Hunt officiating to a large audience. The pure white casket which contained the lifeless form was borne to the cemetery in a white hearse. May they mourn not as those without hope for the Raviour has said, "Of such is the kingdom of heaven."

CATTLE.

Opening prices for fat cattle were very satisfactory this week, and there was a substantial advance on Monday and Tuesday. Receipts increased sharply on Wednesday and Thursday, and prices declined sharply on those days the net loss being 25 to 35c. There was a slight reaction on Friday, but closing prices for the week show a decline of from 10 to 25c. All classes of buyers have favored the fat, light and handyweight beeves and these show the least decline, while the brunt of the slump has been borne by the plain, heavy and unfinished grades. In cows and heifers there has been no great change from start to finish as supplies of this kind have been comparatively limited, while there has been a broad demand for all decent offerings. Good to choice grades are, if anything a shade stronger than a week ago, while the medium and common canners and cutters have been rather slow sellers. Veal calves are selling freely at firm figures, and bulls, stags, etc., are selling to somewhat better advantage than a week ago. Only a moderate business has been done in stockers and feeders, but prices have held fully steady for good light and medium weight stuff. Heavy grades are a little lower than a week ago, but everything has been well cleaned up.

HOGS.

The market has suffered one of the sharpest breaks in the history of the trade, and although there has been some reaction for the past two or three days, values are nearly half a dollar lower than a week ago, and \$1.50 lower than at the best time. Heavy receipts brought on the break and a let up in supplies has been largely responsible for the better tone of late. Eastern shippers have not been doing very much, and with provisions going down and eastern markets well supplied with hogs the packers have been able to force a heavy decline at all points. Heavy hogs are still preferred but weight has not cut so very much figure and the range is narrow. The strength in the market the past two or three days indicates that with continued light supplies at least a part of the big decline may be regained although the feeling in the trade is not over confident.

The following table shows the range of prices and average cost of the hogs for the past week:

Impossible to be Well

It is impossible to be well, simply impossible, if the bowels are constipated. You must pay attention to the laws of nature, or suffer the consequences. Undigested material, waste products, poisonous substances, must be removed from the body at least once each day, or there will be trouble. A sluggish liver is responsible for an immense amount of suffering and serious disease. Ask your doctor about Ayer's Pills. He knows why they act directly on the liver. Trust him. J.C.
