

Patriotism

The stomach is a larger factor in "life, liberty and the pursuit of happiness" than most people are aware. Patriotism can withstand hunger but not dyspepsia. The confirmed dyspeptic "is fit for treason, stratagems and spoils." The man who goes to the front for his country with a weak stomach will be a weak soldier and a fault finder.

A sound stomach makes for good citizenship as well as for health and happiness.

Diseases of the stomach and other organs of digestion and nutrition are promptly and permanently cured by the use of

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY.
It builds up the body with sound flesh and solid muscle.

The dealer who offers a substitute for the "Discovery" is only seeking to make the little more profit realized on the sale of less meritorious preparations.

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the paper covered book, or 31 stamps for the cloth bound. Address: World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

WOMAN GETS CHIEF'S PIPE.

Me-Shek-Ge-Sig of White Earth Surprises Indians by Giving Away Treasure.

Duane, Minn., Aug. 6.—Me-shek-gesig, chief of the White Earth reservation Chippewas, is a convert to Christianity and yesterday he surprised his most intimate friends by presenting his long loved pipe to an evangelist, Mrs. Katherine Ginn, of Sioux City, Iowa, who is preaching at the Indian camp meeting here at the Methodist church.

In presenting this ancient pipestone pipe Me-shek-ge-sig explained in an excellent speech that this pipe was an emblem of peace. He said that although the chief did not understand all that the evangelist was saying when she spoke of the Great Spirit, Jesus Christ, it greatly moved him in his inner life. He explained that while the pipe of peace was originally used by the Indians as an emblem of peace, he gave it to Mrs. Ginn, not for her to use, but because of its deep and lasting significance.

Mrs. Ginn accepted the pipe as a memento of peace. She was glad to know the significance of the pipe, she said, and hoped that as Me-shek-ge-sig was a noble warrior against the Sioux, so now he would fight the battle of life for God—that her God was his God.

In an address in the church, the chief, in an eloquent manner said that there was long life to those who did good. When the Indians were heathens the young people listened to their parents and obeyed their teachings. Now as Christians they must obey, not only to live a long life on earth, but in heaven.

The above was clipped from the St. Paul Press and will be of interest to the people of Crawford county as Mrs. Katherine Huckstep Ginn was raised in the vicinity of Denison.

\$27,000,000 for Autos.

This is the showing Iowa made during the past five years in the way of spending money for autos. Secretary of State Hayward estimates that this amount has been spent from the records in his office. If the machines are as numerous all over the state as they are in Carroll county we believe the estimate too low. Figured at an average cost of \$1,500 each for the first three years of the six year period and at \$1,300 each for the last three years, 21,135 automobiles will have been bought since that time that represent an expenditure of \$27,573,000. These totals were arrived at from figures compiled in the office of the secretary of state by Henry T. Saberson, chief clerk, showing the number of automobiles bought in Iowa each year since 1905. These figures show a steady increase from 1905 to 1907. Since then the increase has been more rapid and the number already bought this year indicates that the total for 1910 will be more than double the total for 1909.

Licenses have been issued for 12,315 automobiles or motor vehicles, divided according to years as follows:

799 in 1905, total value, \$1,198,500;
1,022 in 1906, total value, 1,533,000;
1,945 in 1907, total value, 2,919,000;
3,166 in 1908, total value, 4,740,000;
5,512 in 1909, total value, 7,165,000;
7,938 in 1910, up to August 9, total value, \$10,319,000. Total for five years 21,315, with a total value of \$27,573,900.

According to these figures 2,426 more automobiles were bought in the first seven months and nine days than were purchased during the entire twelve months last year. The gain in cost up to August 9, is about \$3,000,000 greater than for the entire year in 1909.—Carroll Herald.

SCOTT'S EMULSION

is the only emulsion imitated. The reason is plain—it's the best. Insist upon having Scott's—it's the world's standard flesh and strength builder.

ALL DRUGGISTS

THE OIL WELL SHOOTER.

Sometimes Blown into Eternity With His Own Ammunition.

In certain of the petroleum producing districts it becomes necessary sometimes in opening an oil well—sometimes when the well has become clogged or apparently exhausted—to begin or renew the flow by exploding nitroglycerin at the bottom of the well. This explosive is employed because it explodes readily by the dropping of a weight upon it. A man who carries nitroglycerin from well to well for this purpose is known in the oil regions as a "shooter."

The shooter has a wagon in which to carry his explosives. A square box under the seat is carefully padded and when it has been solidly filled with cans of nitroglycerin, which is a molasses-like fluid, he fastens down the cover and drives slowly away to the well that he is to shoot. Usually he makes the trip very early in the morning to avoid the customary travel and so diminish the chance of danger.

For the most part the roads are bad and the wagon jolts along in a way to make any one but an old shooter decidedly nervous. If it is dark there is great danger that a wheel may drop into a hole with force enough to detonate the explosive. Several wagons bearing shooters and their loads have been blown up but no one ever lived to tell what sort of a jar caused the explosion.

In such a case little is ever found except the great hole in the ground which the explosion has dug, with possibly a wheel of the wagon a quarter of a mile away in one direction and another in the opposite direction.

The shooter generally takes from 80 to 240 quarts of nitroglycerin in his wagon. The smaller amount is quite enough if it should explode to leave no trace of the driver of the vehicle.

When the shooter reaches the well which is to be treated long torpedo tubes are placed within the casing of the well and the nitroglycerin poured carefully into them. The well may be 1,500 feet deep and is seldom less than a thousand. When one of the tubes is filled it is lowered with the utmost care to the bottom of the well. This operation is repeated until the shooter is satisfied that the load is heavy enough to accomplish the purpose. When all is ready a bar of iron, known as a "go-devil," is dropped into the well. The instant it leaves his hand the shooter takes to his heels, seeking a place of safety.

Suddenly the earth trembles; there is a crash, followed by a snap; a muffled sound arises and becomes louder and louder until a column of oil and water shoots from 75 to 100 feet into the air. The country for hundreds of feet around is filled with clouds of spray floating to leeward. When this subsides the well is in operation and the shooter receives his fee and drives away.—Harper's Weekly.

Nerves at High Tension

Slight extra strain means collapse—Restoration obtained by using DR. A. W. CHASE'S NERVE PILLS.

The successful men and women are often of the high-strung nervous type—keen and active—but with too little reserve force.

A little extra worry and anxiety and snap goes the nervous system. Weeks and months are often required before energy and vigor are regained.

Rest helps, so does fresh air and exercise, but the blood must also be made rich and red by use of Dr. A. W. Chase's Nerve Pills.

Mrs. P. G. Haines, Rossburg, Oregon, states: "Dr. A. W. Chase's Nerve Pills have done me a great deal of good in building up the nervous system. For over twenty years I suffered with my nerves, and doctored with several doctors. I can say that I have received more benefit from these pills than from all other medicines taken. I have gained nine pounds in weight."

NO BACTERIA IN THIS BED

There was a time when the iron bed was considered a luxury, but time has taught us different; we have found it to be the bed we have been wanting and needing. They are cool, sanitary, and have great advantages over the wood beds. If once tried, always used. The cost is less than wood beds, a low price wood bed looks cheap, but the iron bed looks neat and fills the place well.
