PATTERSON WINS CASE IN HIGHER COURT

(Continued from Page One.)

Mrs. Hope and the brothers and sisters of Robert Patterson inherited directly from him, the plaintiffs sold their interest in the land to the defendant, Isaac Patterson, and gave him quit claim deeds which in form could only release to him the interest they might have had, but a significant fact in connection with the transaction was that Isaac Patterson paid the full purchase price of the land, which they accepted, and have never yet offered to return to him.

A few years after this transaction was had Margaret Patterson, the mother of Mrs. Hope, Mrs. Morgan and of Isaac Patterson, departed this life, and Isaac Patterson, realizing that his quit claim deed was not sufficient, requested the plaintiffs and Mrs. Morgan to make him a warranty deed, conveying their interests in the property to him. This was accomplished some thirteen or fourteen years ago and since that time Mr. Patterson has lived upon the land and claimed it as his own.

The plaintiffs contended that as they had no interest in the land at the time they made the quit claim deeds to Patterson and did not acquire any interest until after the death of their grandmother, Margaret Patterson, that Patterson acquired no interest whatever by the quit claim deeds, and that when they subsequently made the warranty deed, which they sought to set aside, it was obtained through fraud and deception on the part of Patterson and had no consideration whatever to support it.

The lower court, however, found that inasmuch as the purpose of all the parties was, at the time the quit claim deeds were made, to place in Mr. Patterson the ownership of the land for which he paid the market value at the time, that there was a consideration to support the warranty deed later on, and further found that there was no evidence of fraud on his part, that in the transaction he acted with perfect reason and fairness and took no advantage of his nieces or any one else and so finding judgment was rendered in favor of Mr. Patterson, and while the case was tried on its merits in the supreme court that body reached the same conclusion and vindicated Mr. Patterson's claim and upheld his title to the land as against the plaintiffs.

This ends a series of very disagreeable legislation in which the plaintiffs in this case have figured either directly or indirectly and it is a source of gratification to Mr. Patterson that in all of his litigation the judgments of the court have been in his favor.

Association Meet at Tama.

W. C. Rollins, secretary of the Iowa Transcontinental Route association, informs us that the next meeting of that association will be held at Tama. While the date of the meeting has not been officially announced, he is of the opinion that it will be called for June 13th. Mr. Rollins will officially call the meeting as soon as he hears from the president of the Commercial club at Tama. Denison should plan to send a large delegation of enthusiasts to this meeting and see to it that the proposed change in the route is not made at this meeting. While there is not much danger of this occurring, it would be well to look after our interests at the meeting and a goodly number of citizens should plan to be at Tama.

No doubt by the middle of June the roads will be in much better condition and it will be possible for a number of machines to make the trip overland. We understand that some of the towns on the western part of the route are planning on sending cars down to the meeting and Denison should have a number of cars make the trip.
