CHIC COMBINATION OF LACE AND SILK ADORN GRAPE GOWNS

CHARMING GRAPE AFTERNOON GOWNS.

EVERYWHERE one sees taffeta this summer. It gives the color note to the smart costume of crepe, whether plain or figured, and is used alone or combined with lace in the embellishment of the summer gown. Illustrated here are two chic afternoon gowns, the one to the left of plain white crepe, the one to the right a figured fabric. The plain gown is fastened down the front, the row of round pearl buttons passing underneath the wide blue girle. The little taffeta coat is bordered with venise lace. The fullness of the skirt is quite marked, but it is drawn in just above the knees, where another touch of taffeta may be seen. The gown of figured crepe on the right has a suspender tunic of coral pink taffeta, which is bound about the waist with a high girle of the silk. A dainty ripple of lace finishes the neck of the gown.

should liked to have had a reporter so the pleasure of reading it. The song service, composed of five sopranos, those who were not present might have four altos, four basses and four tenors, with Miss Eunice Dobson at the piano, was grand, the double male quartet being beautiful. The reading by John Riggelman was good. The violin music by Mr. Martin and John Riggelman held the audience spellbound and the rest of the exercises were good. There were four old soldiers, Mr. Smith and J. W. Rickman representing the Iowa regiment, G. W. Landon the state of New York, and S. W. Streeter the state of Wisconsin. Before the exercises Mr. Smith and the other three old soldiers stood and faced the audience while Mr. Smith sang one of their old army songs. WHY WEAK LUNGS?

The toll of tuberculosis is claiming more than 350 victims every day in the United States, yet few realize their grave condition until the critical period arrives. Overwork, worry, weakness after sickness, catarrh, bronchitis, tender throats—all exert the weakening influence that invites consumption. To guard against consumption, thousands of people take Scott's Emulsion after meals because its rich medicinal nourishment strengthens the lungs, puts vigor in the blood, and upbuilds strength to resist tuberculosis. Scott's Emulsion is nature's strength-builder. Refuse substitutes,

In the Training Camps.

In the calendar of sports, March is the month when the ball players work out the creaks in their joints and stretch their muscles in the training camps. To the star ball players, it is very far from being sport.

To many young and ambitious ball players this is a crisis time. In some "bush" or school league, they made a showing so brilliant that they have found the chance to try out in fast company. More and more the big league management seem disposed to give young players a try even when they are only crudely developed.

But a few weeks in the stiff rule of the training camp reveals defects that are easily glossed over in the looser discipline of semi-professional or amateur work. Many supposed future Mathewsons and McGraws will soon be anxiously looking for a chance to enter the home town by the back door.

It is not absolutely necessary to get up a horse race in order to have Memorial day properly observed.
