While Senator Kenyon regards it "unthinkable" that the state of Iowa should replace Cummins with Connolly, nevertheless he proposes to make "a speaking campaign of two months" in the interests of his colleague, says the Sioux City Journal.

"Mr. Meredith can now understand why Dave Hill (in cartoons) always wore in his hat a feather inscribed, 'I am a democrat,'" remarks the Des Moines Tribune.

"One of the most shameless campaigns ever conducted in Iowa," is

what the Vinton Eagle calls the late Connolly-Meredith contest.

"Naturally a few Iowa citizens will scan the primary returns with a feeling that the state is on the direct road to the bow-wows," observes the Des Moines Tribune.

The Ottumwa Courier reminds those who did not vote at the party primary they "are not qualified to condemn the nominees."

"The primary has been tried in both homeopathic and allopathic doses and the results have been so indifferent that the body politic is still far from being free of pain," says the Des Moines Capital. "The next legislature it is safe to predict will undertake a radical modification of the present statute. We are yet in the crudest stages of electoral reform."

"Republican success in Iowa means something to republicans this year," says the Webster City Freeman-Tribune. "The party is trying to get together nationally and it will retard the movement to have Iowa slip into the democratic column this fall."

The Ames Times offers as "one reason why 'the machine' usually controls politics," the following remark of a Story county farmer: "A day's plowing on election day is worth more to the farmer than any two men who can be elected to office."

PUBLIC CONTROL OF COAL.

A new issue, or rather a new phase of an old issue, is presented in the demand of the Pinchot party of Pennsylvania that the hard coal ownership be declared a public service corporation and be regulated by law.

There is, of course, no fundamental distinction between what are and what are not public services. The public right of regulation over all public service is one of the oldest tenets of the common law. We have been slow about fitting old rules to new conditions, and the first inclination will be to halt at this proposal with regard to the anthracite coal trust.

But why should the public be so insistent upon owning and controlling the highway that leads to the mine, and then leave it to the selfish interests of the mine owner to determine whether the people shall have coal, and at what price?

Because we have become accustomed to a free public highway we should have out the militia if a serious obstruction were attempted by private interests. But private interests might deliberately deprive the people of their winter's fuel without interference from the constitutional authorities.

Governor David Bennett Hill started the country when he proposed to confiscate the mines some years ago, and he was promptly set down as a dangerous populist. The governor acted as a shock absorber for this later Pinchot proposition. The Pinchot proposition will at least be debated calmly. It will not startle the country.—Register and Leader.
