EXCITEMENT FOR THRESHERS

Careless Dropping of Matches Causes Considerable Alarm Among Crew of Threshers Near Dow City

SETS FIRE TO A STRAW STACK Matches Carried Through Separator and Become Ignited—Happened at Jim Henry Place.

A careless act last Friday caused some little excitement among the threshing crew at the Jim Henry place. One of the hands accidentally dropped some matches among the bundles on his wagon. A search was made and it was thought that they had probably all been found and the bundles were fed into the machine. The matches became ignited by the working of the separator and the next moment the men were amazed to see the blower throw out burning straw. The high wind caused the fire to run quickly over the stack. All available hands worked desperately to move the grain and bundle wagon and separator out of the fire's reach and were not a moment too soon. The straw stack burned to the ground. The loss of this is no small amount for as large a stock feeder as Mr. Henry. The threshing outfit belongs to Suhrs.

DONE ON A WAGER OF \$3,000.00 To Win Wager Price Must Reach San Francisco February 1st—An Employee of Marshall Field

A traveler passing through the town Monday aroused considerable attention here. He gave his name as Ed. P. Price and is traveling from Chicago to San Francisco on a \$3,000.00 wager. He has a collic and a Mexican burro, the dog for company and the burro carries a complete camping outfit. The young man sleeps out every night. He is now 25 days out of Chicago and is ahead of his schedule a week. His greatest day's travel was 30 miles. He made 23 miles the day he reached Dow City, and had stopped an hour at Vail and one at Denison. He makes his expenses by selling postcards and by boosting Harry Von Tiller's song, "The Real Moving Picture of Life." To win his wager, Mr. Price must reach San Francisco by Feb. 1, 1915. He does not have to travel the Lincoln highway throughout the trip and had planned that when the severe winter weather came on, he would drop the Lincoln way and go farther south. Mr. Price has been an employee of Marshall Field & Co., of Chicago, for several years. He carried a coat of tan that makes him look as if he had never done a day's inside work. ELMER BRAZEL AUTO VICTIM

White Driving Single Horse Automobile Collides With Horse and Bug—Demolishing Buggy.

HARNESSES STRIPPED FROM HORSE Car Belonged to a Mr. Frederickson, Who Was Driving Without Lights and Who Takes the Blame.

Elmer Brazel was the victim of an accident last Friday evening that came near costing him his life, and could easily have done so. He was driving with a single horse and buggy near the Charley McBride home in Washington township, the hour being about 9:30 p. m. An auto belonging to a Mr. Frederickson, who was driving it, and which was running without lights, came down the road, meeting the Brazel rig. Mr. Brazel, watching a car in the distance, did not see the Frederickson car approaching, although the horse turned out as it met the auto. The impact stripped the harness from the horse like so many pieces of ribbon and the buggy, a new one, was completely demolished. Mr. Brazel was thrown from the vehicle and rendered unconscious. He was not badly hurt, however, although he received a bad cut on the hip and was much bruised. The horse escaped with but a single cut on the shoulder. Mr. Frederickson gave what aid he could. He greatly regrets the accident and takes the blame upon himself for it. He says he had such a short distance to go and knowing the road well he thought he could make the trip without lighting his lamps. It is indeed fortunate that the accident was no worse and we trust Mr. Brazel may soon recover from the effects of it.

at Lake View. They had a delightful time up till Thursday afternoon when Mr. Isenminger was run down by an automobile and was painfully injured. The car driven by a woman, was traveling quite fast and he was thrown about twenty feet. The driver of the car hurried away without stopping to ascertain how severe the injuries were. Kind hands picked the man up and he was hurried to the hospital. The next morning his ankle and leg were hurt, his right wrist was run over by a wheel and he was dreadfully bruised and sore. He hobbles out to the shop each day but it will be a time before he is as good as before.

The Palo Alto Club held their first annual picnic at the Cross Grove last Thursday. They assembled at 11 o'clock, three autos conveying them to the picnic grounds. Fires were built and coffee and potatoes were prepared there, which added greatly to the lunch which had been taken. Hammocks were taken and these with books and fancy work helped pass a pleasant day.

On account of the wet roads, the Manilla people were forced to come home on the train Monday morning.

The week was hot and generally dry the average daily excess of temperature being about three degrees, and the rainfall was much below the normal. There were, however, many local but generally light showers, which afforded slight relief from the severe drought and intense heat. Corn in the northern part of the state is holding its own remarkably well and gives promise of a large yield and early maturity. In some fields corn is beginning to dent. In the southern counties corn is steadily retrograding and the crop is being cut two to four million bushels a week. The scarcity of water is becoming serious. The drought is also severe on pastures, potatoes, gardens and fruit, and is preventing any fall plowing being done. Threshing continues under favorable conditions and is well advanced.

In the "Fatherland" but do not know when they will get away.

The above picture of the king of England was taken during the recent review of the home fleet of England at Portland, where there were 425 ships assembled. England takes great pride in her navy, and the prospects of a clash between her fleet and that of Germany was fraught with awe inspiring possibilities.
