## ENJOY OUTING AT LAKE VIEW

Free Mission Sunday School of Kiron Enjoy a Day Picnicking at Lake View—Trip Made by Autos

MORE THAN EIGHTY ATTEND

Young Lady Friends of Miss Lena Lindquist Tender Shower in Honor of Approaching Marriage.

KIRON, July 18—Special—

The Free Mission Sunday school held its outing on Tuesday last at Lake View, and the affair was a success, enjoyed by all participating. Children and others to the number of eighty made the trip overland with autos, arriving at the lake shortly after nine o'clock, after an enjoyable trip. The forenoon was spent in fishing, boat riding and social visit, and at the noon hour the company gathered in the shade under the trees, where a splendid picnic dinner was served. Shortly after dinner the largest portion of the children and the elder ones took to the water, where for over two hours the bathing and the playing about in the water was enjoyed, especially by the children, who voted it the time of their lives. At 3 o'clock a steamboat ride was taken around the lake with a ten minutes stop at Cottage Grove resort. Late in the day the return trip was made, all tired from the day's outing which will be pleasantly remembered for a long time. Not a mishap with cars or at the lake happened to mar the good time. Had not the farmers been so busy with their work nearly twice as many would have gone.

Quite a number of her girl friends gathered unannounced at the home of Miss Lena Lindquist Monday evening, tendering her a shower of miscellaneous kitchen utensils and to spend the evening with her once more before she leaves her ranks to step into the matrimonial files. Her guests came prepared to have a good time, which they did have before returning to their homes. If dame rumor can be relied upon, ere the Review will make its appearance this week, she will have changed her name, which event we will tell about next week.

## HARVESTING HALF CENTURY AGO

Much Harder Job Than Nowadays, Yet There Was a Charm Wholly Lost to Present Generation.

CRADLERS A BEAUTIFUL SIGHT

Hard Work Lightened by Charm of Social Life—Real Community Interest—Music of Farm Bell.

W. H. Wonder in the Onawa Democrat:

Harvesting fifty years ago was a harder job than it is now, and yet there was a charm about it that is wholly lost to the present generation. The publisher of the Democrat was then a young boy on a southern Indiana farm. The reaper was then in its infancy. Well we remember the first one, a McCormick, that came into the county. It was as much of a curiosity as the automobile was twenty-five years ago, or the flying machine of ten years ago.

The early McCormick was not a binder. All it could do was to cut the grain, which fell on a platform or table and was raked off by hand by a man who had a seat on the machine. The reaper was followed by four men who did the binding, each man taking a station.

Most of the fields in that country of fair women, universal sociability and a host of God's common people had either too many stumps or rocks to give the reaper a swing. It took many years for the reaper, even in its perfected state, to displace the grain cradle of our fathers. But it has passed—it could not withstand the evolution of agricultural development.

But somehow memory loves to recall those days. They are like old paintings which are rich in many ways—and fill the chambers of the soul with recollections of scenes and days embellished with all that was needed at that time to give life its sunshine, its penetrating rays of love and gladness, as fair as ever fell in the valleys of the Alps or the mountainsides of sunny Italy.

The harvest days were not days of mere irksome toil. Farmers worked in groups, helping each other, taking the ripest fields first. What a beautiful sight, a half dozen cradlers in line with as many rakers, not infrequently the young women of the community followed by stalwart young men as they worked with each other in keeping up their part of the work.

Hard work, certainly, it was, but this was lightened by the charm of social life. While the breezes played and moved over and through the ripened grain, frequently there were young hearts whose emotions, laughter and joy lit up love's dreams that ripened into the binding of two joys into one.

The older, with less romance, nevertheless made of it a real community interest. While men worked, plans of community betterment were being discussed and brought into action, plans which through process of evolution and advancement have given the great surroundings of the present.

It was not thought at all improper in those days to follow St. Paul's advice to Timothy, to take a little brandy for "thy stomach's sake." All the old Hoosiers have a distinct recollection of the old fashioned distillery where pure peach brandy was made, and this was carried to the harvest field as a suitable tonic and preventive against chills and fever.

To the boyish heart there was no sweeter music than the clang of the

Trim Hoofs of Colt.

When the feet of the colt running in pasture are not trimmed, the result is often an unsound animal, says the animal husbandry department of Iowa State college. Iowa farmers lost a good deal of money in this way every year. The neglected hoofs break off, or there comes a crack in the hoof. The result is a lame horse or a horse with a hoof on one side longer than the other. Thus the horse does not stand squarely on its feet, it can't move straight and it cannot work well. The feet won't wear off in the pasture. It is necessary to have a pair of pincers and a rasp and keep them square.
