Tokyo's Name. Tokyo, Japan's capital, was not always known by that name. It was originally Yeddo (meaning estuary gate), but when the mikado took up his residence there in 1868 he rechristened the town Tokyo (meaning eastern capital), distinguishing it from Salkyo (meaning western capital), which town it practically superseded.

Natural Result. Magistrate—What happened to the prisoner after he had been in the water for half an hour, as you say, clinging to the pike? Policeman—He was very wet, yer anner.—Exchange

HUGO MUNSTERBERG. Harvard Professor Says England Couldn't Afford to Crush Germany.

Damascus Swords. It is seldom that a really good specimen of a Damascus sword can be obtained, for the art of working and engraving the kind of steel of which they are made is lost. These famous swords were made of alternate layers of iron and steel so finely tempered that the blade would bend to the hilt without breaking.

Southern California of Argentina. Mendoza is the southern California of Argentina. Irrigation has long been successfully applied to its vineyards, which produce more wine than the combined vineyards of the entire United States of North America. The whole of the province lies at an altitude of more than 2,000 feet. Italians are for the most part employed in the cultivation of the grapes, the whole family accompanying husband and father to the field and assisting in tending the vines. The babies are put to sleep in improvised tents while the elders work.—National Geographic Magazine.

Eggs in the Nest. All birds have a systematic arrangement in depositing their eggs in the nest, and there are very few species, if any, in which some peculiarity is not to be seen if careful observation is made. Many birds so plainly and invariably show a tendency to a set arrangement that their habit is generally known.

He Got the Raise. "You want more money? Why, my boy, I worked three years for \$11 a month right in this establishment, and now I'm owner of it." "Well, you see what happened to your boss. No man who treats his help that way can hang on to his business."

Tea Production. No accurate figures of the world's total production of tea can be given, but the quantity in exchange between nations amounts to about a billion pounds, worth to the producers about \$150,000,000 and costing the consumers over twice as much.

Unprofitably Occupied. Teacher—Well, Henry, are you learning anything? Henry—Please, no, sir; I am listening to you!

PRACTICAL HEALTH HINT. Neglect of the Nose. An organ whose unhealthy condition is much neglected by the public is the nose. The interior of the nose is really very complicated. It is divided down the center by a septum, and each half of the nose contains various small chambers formed by delicate shell-like bones covered with mucous membrane and richly supplied with nerves and blood vessels. Any part of this complicated organ may suffer from various forms of catarrh, congestion and inflammation, the least expression of which is a more or less constant and very tiresome cold, but which may develop into more serious difficulties.

GENERAL VON STEIN, Recently Selected by Kaiser as Germany's Minister of War.

Fancy Diving. Probably no form of athletic exercise is so full of thrills for the spectators and so remarkably fascinating for the athlete as is fancy diving. The dives are not so very hard, for the average young person to learn, and the plain front and back dives are really very simple. For the athlete who has practiced tumbling diving becomes very easy indeed. There is little or no danger from a springboard if there is sufficient depth of water under it.—Outing.

In the Bud. "My son is a budding poet." "Now is the time to nip him, old man."—Philadelphia Bulletin.

Dance at Deloit Hall, Deloit, Iowa, SATURDAY, December 2. Vail Orchestra will furnish Music. Come Out and Have a Good Time. Supper at the Hotel. H. P. Grill, Mgr.

Far From Unanimous. Old Flintsplinner—This beautiful weather makes me feel glad just to be alive. Young Outspoke—That's queer. It doesn't make any one else feel glad you're alive.—Washington Star.

Playing Safe. "Close is what I call a financial pessimist." "What's a financial pessimist?" "A man who's afraid to look pleasant for fear his friends will touch him for a loan."—Pittsburgh Dispatch.

An Extremist. They were discussing love and the extraordinary things which that powerful emotion compels otherwise sensible people to do. Mr. Simpkins was mentioned as an instance. "An extreme case his is," said Robbins. "He is so much in love that he has become a postman, so he can get the girl's letters an hour or two earlier."—Exchange.

OUR MISTAKES. The mistakes of today are lessons for tomorrow. Let's be nice to think that tomorrow is a new day with no mistakes in it yet?—L. M. Montgomery.

Just as Easy. He—But, tell me, are you going to marry me or make a fool of me? She—Why not both, dear?

Shetland Ponies. That hardy little creature, the Shetland pony, is longer lived than the horse.

Something That Will Interest You
If You Expect to Buy A Car Next Year
The price of nearly every make of automobile is GOING UP. Many have already announced a raise. Now, how can you protect yourself against this raise? The answer is simple. BUY NOW. But you say I need that money now and do not wish to put it into a car till spring, even if it will cost more. Very well, I have a little plan that will take care of that nicely and with but LITTLE red tape. If you are a responsible person who can afford to own and maintain a car you may secure one by paying a small part of the purchase price down and the balance on terms to suit your convenience. In this way you have the use of both the car and the money between now and spring at a rate of interest below what you would have to pay if you borrowed the money and paid me the cash. Many of you know that you will buy a car in the spring. You also know that prices on automobiles are going up and that you can save money by buying now. So lets get together, folks. It will pay you.
I have a complete line of Reo cars on display which I will be glad to show and demonstrate to you. I would also like to go into this new time payment arrangement more fully and show you where you can profit by acting now.
Consider me "AT YOUR SERVICE."
Clarence Chamberlin
P. S. I expect a raise in price from \$50.00 to \$100.00 to take effect either December 1st or 15th, with no change in the 4-cylinder model and only minor body changes in the 6 cylinder model. Act now or forever hold your peace about the raise in price. I am doing all I can for you.
