The high price of pork isn't bothering some congressmen so much as the fact that they are not getting any.

UNCLE JOSH SAYS:

By heck the fool notions what sum people hev about these here noospapers clean disgust me with the intelligence of the masses. There's people what used to trade with me afore the new court house was built what go to other stores regular now jest because they read them fool ads in the Review. It looks like everybody in Crawford county read that paper, spite uv the prediction made that it ud bust higher 'n a kite, an' jest cause everyone reads it seems like these here dealers what hev the impudence to want the trade that belongs to me, think they've got to patronize it. Sez I, ef an editor gits so tarnal independent that he won't take what we offer him fer advertising an' won't ask for it 'umble like, then, by heck, let him starve, sez I. That's the way we used to do, by heck, and a fine and infloesional class uv editors we hed too, even if nobody did read their papers. What did we care whether people knew Denison were on the map or not 'long ez the farmers hed to do ir tradin' with me. It's an outrage to hev a paper what educates the farmin' community an' the people uv town to take their trade to the people what advertise lower prices and leaves me with these goods what I bought afore the panic of '97 on my hands, by heck.

ANOTHER BEAN SCARE STORY

If You Should Happen to Eat a Calabar Bean, Belladonna Will Save You

According to a local physician, there is a far more deadly bean that finds its way to American shores, than the Burma bean of which Crawford county people have so often been warned of late.

This bean is called the ordeal or Calabar bean and comes from the west coast of Africa. Each seed contains two creamy-white cotyledons.

In talking to a Review reporter, the doctor stated that the bean is very common with the profession, being used to produce contraction of the pupil of the eye, and in tetanus, neuralgia and rheumatic diseases.

There is a pretty story told, that in Calabar the superstitious natives have a form of duellitag with these deadly seeds. Two opponents chose a bean. Each eats half. Often both die. But they believe God will decide who is guilty and who is innocent.

However, Crawford county people are not apt to mistake the Calabar bean for the common navy or lima beans.

Our idea of zero in usefulness is a scare crow in a field where the corn failed to come up.

The decline of the German mark won't bother the women of that country who dearly love a mark-down, the same as they do in other lands.

THE CORRESPONDENT

The Correspondent sat him down upon a goods box in the store, and with a stub of pencil and sheet of paper brown Composed himself to write, amid the Fourth's expiring roar.

The doings of the day applied to people of the town

Four runaways had taken place, caused by the blaze and noise; An arship at the fairgrounds fell and crippled seven men; The premature explosion of a cannon killed three boys; The mayor's wife had licked a man for calling her a hen.

The jail was packed with citizens all steaming hot and sore; A brick had struck the cop, and bounced from off his head.

Wherefore the Correspondent, with his tongue out yards and more, Sat down and wrote his copy for the mail—and thus it read:

"The Young People's Society of the First Christian church had its picnic at Fern Grove today. A good time was enjoyed by all."

We don't believe you can make the King of Greece believe that he has a fat job.

When you see a man hanging around the entrance to a store half the afternoon, don't assume that he is a German spy. It may be that he is waiting for his wife inside to match a piece of goods.

There is a terrible drouth in Germany but it is nothing to what the Prohibitionists want to create in this country.

It may be that so many druggists have gone into the lunch counter business in order to boom the pill market.

The street costumes the ladies are wearing nowadays are making it very difficult for them to create any especial sensation in a bathing suit.
