Another favorite way of saving gasoline is to cut out those rides given to old ladies and the neighbors.

The Vail business men's club are considering the possibility of procuring electric juice from transmission lines from Denison. The Vail Observer last week had the following concerning the matter: Messrs Walker and McIntosh, of Denison were here Friday evening to meet with the business men's club, and talk over the proposition of running an electric light wire from Denison to Vail to furnish us with electric light.

The matter was discussed at the meeting and an expert lineman was here Saturday to make a plat of the proposed line. Vail is badly in need of lights, and the old gas plant is about played out and any money spent in repairing it would be a loss. We think a line from Denison would be better than a small plant at home. It would be cheaper in the long run and we would be always assured of plenty of light and power as Denison has one of the best electric light plants in this part of the state. The proposition will be taken up by the council and if possible to raise the money, the necessary steps will be taken to sell bonds to secure for Vail what it so badly needs—electric lights.

The boys won't feel in good form in their new school suits until they have rolled them around thoroughly in the dirt.

The only classes of people who have not demanded exemption yet are the grand army and confederate veterans and the boy scouts.

The teachers having spent a restful vacation doing housework at home, are now all bright and fresh, ready for 40 weeks of school work.

Record Era—Uncle Sam has been placing some large orders with army rifle manufacturers lately, and walnut is the wood specified for the gunstocks. The factories have had men scouring the country after walnut wood, and last week one of the men was in Ida Grove and his visit will net him two car loads of extra good material. W. C. Moorehead, owner of the grove bearing his name north-west of town, will supply thirty trees of the required size, and Esau Russell about a dozen trees. T. S. Snell also has several fine walnut trees on his place three and one half miles north of town, and just as soon as they can get the trees down and to town, they will be loaded and shipped east, about two car loads being purchased from these three men alone. The price fixed is \$25 per tree, so many feet of trunk being specified to bring that amount and they are measured before felling to see that they will meet the specifications.

Great stuff, the Russian army, where the officers do the fighting and the soldiers keep back out of harm's way and offer advice.

Some of our editors are in favor of the war, but against appropriating any money to fight it.

**WHY WE ARE NERVOUS**  
In perfect health we hardly realize that we have a network of nerves, but when strength is declining the same nervous system gives the alarm in headaches, tiredness, dreamless sleep, irritability, and unless corrected, leads straight to a breakdown.

Scott's Emulsion is exactly what you should take; its rich nutrient gets into the blood and so feeds the tiny nerve-cells while the whole system responds to its refreshing tonic force.

## car at the old prices SEPTEMBER 15th

at the close of business, the prices of Studebaker cars will increase--

The FOUR touring car will increase from **\$985 to \$1050**  
The SIX touring car will increase from **\$1250 to \$1385**

Large purchases and long term contracts for raw materials made a year ago enable Studebaker to delay this advance in prices long after all other manufacturers of cars in Studebaker's class have made an increase.
