News and Comment About Iowa People and Events

BY J. W. JARNAGIN

J. N. Wilkerson, of Omaha, who figured for some time as a detective in Montgomery county, endeavoring to locate the parties guilty of the Villisca ax murder, was the victim of a vigorous assault recently when he called a young man named Follmer a liar. Wilkerson is now engaged in promoting an oil company which has some leased lands down in Louisiana. He has written to his erstwhile followers in Montgomery county urging them to contribute toward the success of his project.

An ordinary cat put several towns in darkness one night recently. Evidently some wayfaring dog got after the cat and in self defense she ran up a pole supporting a high tension electric wire. When her body came in contact with the live wire the electric current was impeded, the cat was speedily burned up and the wire was severed in two. It took trouble men several hours to locate the cause of the difficulty. In the meantime Oakland, Carmo and Hancock were in darkness.

James Deyo, of Kansas, has brought suit against his mother-in-law and stepfather, both of Belle Plaine, Iowa, for \$31,313.13 for alienating his wife's affections. The petition alleges that the plaintiff married Resta Woodruff at Ellsworth, Kans. April 17, 1916, and that a son, Lawrence Arthur, was born Jan. 20, 1917. That in August, 1919, his wife visited the defendants, her mother and stepfather in Belle Plaine and that they persuaded her to secure a divorce which was granted in the January term of the district court for Benton county.

After a vigorous lawsuit before the district court of Davis county in Bloomfield two plucky school ma'ams won from a couple of school boards in Soap Creek township who had withheld from the young women wages due them. The trouble grew out of the flu epidemic in 1918. Two country schools were closed for several weeks and the directors refused to pay for the time thus lost. The young women stated that they were ready to fill their part of the contract and the jury decided that they had the better of the argument and allowed them full pay and

taxed the cost of the suit to the school districts involved.

Boards of supervisors in several counties have purchased automobiles for the use of county nurses. The visiting county nurse is the outgrowth of Red Cross activities and is proving a most important factor in improving health conditions among rural children. Towns and cities have had such persons on duty for some time but it is new in country communities. Even yet there is prejudice against their seeming official results that have been achieved in the innovation as a reflection upon their ability and desire to give their children proper attention. In view of the splendid results that have been achieved in cities and cities there is no reason why children in the country may not be benefited also.

The Black Hawk County Young Men's Christian association, under the direction of County Sec. Dr. J. H. Stiles, Jr., has purchased a complete and portable moving picture outfit for use in the schools and the churches of the communities of the county.

Four hundred former army trucks have been delivered to the Iowa state highway commission for use on Iowa roads this summer. A great share of those have already been sent to the counties for use while a central fleet of 200 will be kept at Ames for emergency work. Of the latter number 150 are 3 ton trucks and the balance are lighter cars for inspection work. These trucks have been unloaded at Ames and are in charge of A. S. Miller, supervisor of machinery for the highway commission.

Hon. John Burke, treasurer of the United States, was a Des Moines visitor the past week. Mr. Burke is an Iowa product, having been reared on a farm in Keokuk county. He served two terms as governor of North Dakota and was appointed United States treasurer soon after the inauguration of President Wilson.

The development of what experts declare will be the greatest coal field in Iowa is now under way in Dallas county, near Waukeet, 11 miles west of Des

Moines. Hundreds of acres of fine farm lands have been leased and royalty on all coal mined will be paid at the rate of 6 cents per ton, gross weight, to the land owners. Records made by inspectors indicate that coal strata to be from 4 to 6 feet thick. It has been known for some time that coal existed in large quantities in that region. The great problem are now being solved by both the Milwaukee and M. & St. L. rail roads. The coal company has purchased the hotel in Waukeet to furnish a home for superintendents, foremen and the like. A large number of new houses are to be erected near where the shaft will be opened for the accommodation of the miners.

A young man accompanied by a young lady, both students at Des Moines college, formerly Highland Park were seen to leave society hall in one of the buildings near midnight recently. The nightwatch got the names of the couple and reported to the college authorities. The matter was referred to the governing student organization, the evidence of the victims was taken and a unanimous decision voted that the innocent but indiscreet act be forgiven after a reprimand had been administered. The disposition of the case remains a secret, as is the name of the faculty and the result was that four resignations followed: Dean Willard W. Bartlett, of the liberal arts college; R. D. Leshewsky, instructor in chemistry; Melvin Fred, biology professor; and W. Wester, professor of mathematics.

The four famous Buckler brothers, living in all parts of the country, have been invited to meet at Ft. Madison, the home of the oldest, James, and celebrate. For twenty-five years the four have not seen each other. The Buckler brothers drew the attention of that community when they stepped on the scales twenty-five years ago and sent the indicator around to 1200 pounds. It is stated that this record will be broken at the coming reunion, as each of the brothers has added several pounds since that time.
