HIS UNHAPPY TIME

When Father Pays for Good Things He Has Had.

Shadows Upon Life Are Not Always Caused by Financial Affairs—Health Specialist Occasionally Gets Busy.

Speaking about the influence of money on human happiness, and the fact that the lasting pleasures of life are totally unassociated with money, father is a very good example of the latter premise, writes Glenn M. Farley in the Seattle Post-Intelligencer. Father's very special health specialist has forbidden him to smoke his pipe before midday, and the pleasure of life has completely vanished from all his forenoons. More than that, father has been a prodigious feeder all his life, with emphasis at the breakfast hour, and the s. h. s. has cut off the breakfast at one fell stroke, and permitted him to partake of milk only at that hour.

However, these little breaks in the regular habit of the individual seem to be hygienically necessary. A man may, of course, mistreat himself shamefully, and still contrive to be up and around; but nobody cares to barely drag out an existence. Consider how many bales of tobacco father must have absorbed in perhaps forty years of uninterrupted pipe pulling! The health sharp comes along and tells him that he has enough surplus nicotine in his system to start a tobacco factory. And besides this there are about the same number of years given over to the indulgence of a farmland's appetite without the farmland's exercise. Father will put away a meal that would make a f. h. jealous, and then ride down town and sit in an office chair all day! He will stand this for 30 or 40 years, and then complain that he is not feeling just right, and he wonders what is the matter with him!

When we come to consider father we recognize, at once, that he ought to have a guardian. There is where the very special health specialist comes in. He steps in and takes father's breakfast and his pipe away from him, and it is stand-off if he does not also take his lunch and his dinner away from him before his rigorous course is completed. And when all is done, father is either stepping high, like a blind horse, and feeling his oats, or the boys around the office are chipping in to buy him a wreath. It is a long chance, but he has to take it. Having enjoyed his own flat-headed and entirely erroneous way for 40 years, it is high time somebody was stepping in and telling him what to do. The great mistake, with most human beings, is that their parents stop spanking them too early in life.

"Ever notice how some of these baby vamps mask their ears with seal-tops of hair?" "I can't say as I have, old dear." "Well, the hair comes down over the listeners like part of a waterfall, and is tucked up underneath or in the back." "My word!" "I've just found out how they do it." "How do they do it, tell me." "They make the bay windows stand out by stuffing little gobs of false hair inside." "How did you learn that?" "I know a lady who helps to sweep out a department store mornings." "My word!" "And she says the gobs fall out and clog up the vacuum cleaners."—Youngstown Telegram.
