The Whole Secret of A Better Tire
Simply a Matter of the Maker's Policies
This you will realize—once you try a Brunswick—that a super-tire is possible only when the name certifies that the maker is following the highest standards.
For tire making is chiefly a matter of standards and policies—cost plus care. Any maker can build a good tire if he cares to pay perfection's price.
All men know Brunswick standards, for Brunswick products have been famous for 74 years.
Formulas, fabrics and standards vary vastly in cost. Reinforcements, plies and thickness are a matter of expense. And these variations affect endurance. It rests with the maker how far he wishes to go—how much he can afford to give.
For there are no secrets nor patents to hold one back.
