

WALL LAKE ITEMS

On Thursday evening of last week Fred Wunschel and Elizabeth Jarl, of Boyer, were married at the Lutheran parsonage by Rev. Ad Schwilger. Henry Wunschel, brother of the groom, and Pearl Jarl, sister of the bride, were the witnesses. After the ceremony they drove to the home of the bride's parents near Boyer, returning here the following day and began housekeeping at once on the Wunschel home farm, which the groom and his brother have been working. Their many friends here wish them a long life of happiness.

Miss Leona Kelley returned Monday from a week's visit with relatives in Buena Vista county.

Chalons post of the American Legion here received their new furniture and held a housewarming party on Monday evening of this week, at which eighty-three members were present. A rousing good time was had by all, a banquet served and the evening's festivities were closed by about fifty of them going to the home of Ernest Wicker, where Mr. and Mrs. Harold Long were staying (having arrived from Council Bluffs that evening), and noisily and cordially welcoming them home. The boys have nearly reached their objective of a hundred members and the post is flourishing and the only thing that we could suggest to them is the formation of a woman's auxiliary, service star legion or something of the kind.

Harold Long and Marjorie Cooley went to Council Bluffs Saturday, October 2d, and were married by Rev. E. L. Wilson, president of the Presbyterians, in a seminary, at the home of Mr. and Mrs. Chas. L. Lee. Mrs. Cordelia Baker and the Lee family were the only witnesses. Mr. Long has purchased the house owned by the DeWail estate on Second street and they have it all ready for occupancy. They are both well known and liked here and we are glad to have them settle down in our midst.

Mrs. Blanche Clothier will entertain the Priscilla Embroidery club at her home south of town on Saturday afternoon instead of on Friday, according to the calendar.

EXPLAINS CAUSE OF COLDS

Lowered Vitality, Due to Many Conditions, Frequently Responsible for Annoying Ailment.

Colds are caught by a combination of two conditions, first, the presence of certain germs in the nose and throat, and second, by a change in the blood supply to the membrane of these parts.

Rosbach found by experiments on rabbits that chilling the outside of the body drives the blood inward, causing congestion of the air passages.

Recently some authorities have demonstrated a lack of circulation in the nasal passage produced by chilling. The final effect, however, seems to be the same whether the condition is congestion or bloodlessness.

In a perfectly healthy person these conditions are controlled sufficiently by vasomotor action of the blood vessels to prevent injury to the membrane. If, however, the action of the blood vessels is not up to normal, these conditions may continue until the membrane is injured by inflammation, so that it loses its resistance and even the germs commonly present obtain a foothold. This abnormal action of the vasomotor system is caused by chronic catarrh, adenoids, enlarged tonsils, nasal obstructions, general nervousness, indigestion, lack of exercise or proper rest, in fact anything which lowers the general vitality or the local vitality of the membrane.

A careful canvass of the farmers near one county seat in the seventh district disclosed the names of over fifty farmers normally democratic who intend to vote for Senator Cummins this year as a business proposition. They want the transportation facilities of the country rehabilitated as quickly as possible.

Senate committees will be named by John Hammill and they will have a great deal to do with shaping Iowa legislation.

It may be that control of the United States senate will depend on the Iowa vote for senator.

People who wonder why government costs so much might reflect on the reasons why a public office is referred to as a "plum."

The open season for October wedding couples is now on and all kinds of weapons are permissible except flame.

A lot of people don't seem to be doing much work, but anyway they hang onto their tools so no one can run away with them.

If they don't repeal prohibition pretty soon great fear is expressed lest a lot more of the jails will have to close up.

The desire of young men to display their vocal gifts appears to have somewhat declined since prohibition came in.

Children and Malaria.

Dr. C. C. Bass of New Orleans, the great authority on malaria, says that in this disease the dose of quinine for children less than one year old is one-twentieth of the adult dose, and from one to fifteen it is one-tenth of the adult dose.

Glass of Hot Water Before Breakfast a Splendid Habit

Open sluices of the system each morning and wash away the poisonous, stagnant matter.

Those of us who are accustomed to feel dull and heavy when we arise; splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, lame back, can, instead, both look and feel as fresh as a daisy always by washing the poisons and toxins from the body with phosphated hot water each morning.

We should drink, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to flush from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary tract before putting more food into the stomach.

The action of limestone phosphate and hot water on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. A quarter pound of limestone phosphate will cost very little at the drug store, but is sufficient to make anyone who is bothered with biliousness, constipation, stomach trouble or rheumatism a real enthusiast on the subject of internal sanitation.—Adv

A new kind of overshoe for farmers

The "U.S." Walrus: watertight as a rubber boot— as warm and easy to slip on as an arctic

THE combination you have always needed—something to keep your feet dry and warm and yet easy to slip on and off! Here it is—the new U. S. Walrus.

This new overshoe slips on and off easily over your leather shoes. Its warm, fleecy lining keeps your feet comfortable in the coldest weather. And its smooth rubber surface can be washed off as quickly and cleanly as a boot.

The comfort and convenience of this new overshoe are backed by real strength. Made by the oldest and largest rubber manufacturer in the world, the U. S. Walrus is built for the roughest wear. Its sole consists of five layers of the finest rubber. All other points where the strain comes are reinforced.

Ask your dealer to show you the U. S. Walrus. After you've worn them you'll realize why farmers everywhere are buying them.

Other types of "U. S." Footwear—built for rough service

U. S. Boots have the wear and comfort which the accumulated improvements of 74 years have given them.

U. S. Booters lace on over the sock like a leather shoe. You can wear them all day long in the wettest weather. Your feet will stay dry and comfortable.

There is a U. S. model for every need—arctics, rubbers, "overs." Every one has been designed by experts—every one is backed by over half a century of experience. Always look for the U. S. Seal—it means solid wear and long service for your money.
