Adjust the Cause! Chiropractic is the philosophy, science and art of things natural. It is a system of adjusting the articulations of the spine by hand for the elimination of the CAUSE of disease. Disease is an effect—every effect must have a cause. The cause of disease is the lack of life currents, or mental impulses, going from the brain to all parts of the body. Lack of mental impulse is caused by an impinged nerve. Impinged nerves are due to subluxated vertebrae (displacement) of the spine. The subluxated vertebrae may be caused in a great many ways, such as falls, strains, overwork, draughts, introduction of poisons, or to violation of any of Nature's laws. The Chiropractor, by a quick, scientific movement of the hands, adjusts the subluxated vertebrae, thus putting it back into normal position, removing the pressure from the nerve, permitting mental impulses to flow over the nerve from the brain to all parts of the body.
