Political Horoscope.

The two "veteran editors of Montana," to use an euphonious expression of one of them as applied to the other, are after office "hotter than a wolf." Major John P. Bruce will receive the nomination of the Democratic party for member of Congress from Montana, and in view of the manifold blessings he has designed to bestow on the farmers and others in the Territory, who will doubt that he will eagerly rush to the polls and elect him by such an overwhelming majority that he who has dared to run in opposition to him will feel as though he had been drawn through a small knot hole.

Judge E. S. Wilkinson is to be nominated by the Democratic party for Probate Judge of Gallatin county, and by reason of his strong claims on his party, in that he has labored incessantly for thirty-eight years in the editorial harness endeavoring to elevate and instruct his superiors, and has never as yet succeeded in procuring the office of his unequalled integrity and honor, he lays his claims before the party praying that he receive his first reward. He will get it. His unexampled integrity all through life, and his late successful career in collecting the interest on what he owes, are sufficient guarantees that he will mete out justice in the judicial chair, and, no doubt, the hearts of the widows and orphans will leap for joy when their interests are confided to his care.

Our Mystic Lake Trip.

As we left our office last Thursday morning for a trip to the much talked of Mystic Lake, we were reminded of a story our distinguished prototype, Horace Greeley. It is related that on a certain occasion, when the front portion of the Tribune building was undergoing repairs, and it was impossible for people to reach the office by the usual route, Mr. Greeley wrote "Entrance on Spruce St.," on a slip of paper, which he sent by an office boy to a painter to paint a small sign and nail up at the front entrance to the Tribune building. The boy delivered the message and slip, and returned to his office. When he returned to his office, the painter picked up the slip and endeavored to decipher it. He was puzzled for nearly an hour before he succeeded. He then painted the sign and nailed it up as instructed. The mingled feelings of surprise, anger and mortification that overcame Mr. Greeley can better be imagined than described, when, on passing that way the next morning, attracted by the crowd in front of his building, he walked up and read, "Editor's a Speec."

The fact that for the first time in eleven months we were about to absent ourselves from our office for a longer period than twenty-four hours, might lead some of our old acquaintances to think we were on a spree; but, while on the hurricane deck of a bob-tailed cayuse we might have felt somewhat exhilarated, we can cheerfully testify to the fact that we did not feel any of the depressing effects that invariably follow even a moderate indulgence in artificial stimulants.

There were just ten of us, and leaving town about ten o'clock, Thursday last, on the Fort Ellis road, immediately after passing the residence of Mark Burton we turned to the right and took a road that leads directly to the foot of the mountains, from which point we followed a tolerably distinct trail to Mystic Lake. We arrived at the lake early in the evening with no mishap, save the loss by one of the boys of a bottle of beer. It was found, however, by some Good Templars in the rear, who, when lunch time came, managed in some mysterious way to dispose of it. How so few Good Templars could manage to get on the outside of so much beer in a very short time is what completely stumps us; but, there must be something in the absence from civilization that demoralizes some Good Templars and makes them awfully thirsty.

We camped on the south side of the lake on a nice, level spot of ground, and had mountain grouse for supper. It rained that night and remained cloudy all the next day. The fish not biting well, we took advantage of the occasion and picked huckleberries most of the day from the sides of the surrounding mountains. The weather the next night and day was comparatively the same, and while some of us devoted our attention to catching fish, others explored the surrounding country, visiting other lakes in the vicinity, etc. After noon half of our party decided to return home, fearing a heavy storm that night, and got started for town soon after one o'clock. Those remaining camped, however, climbed the mountain west of the lake and had a nice view of the surrounding mountains, gorges, etc.

That night it rained somewhat heavier than before, but the next morning the sun shone clear, and we flattered ourselves that we would catch lots of fish. The men in our party all went fishing, but were not very successful, the fish being a little too sharp to be taken in. While fishing, however, several flocks of ducks came flying in from various sections and settled down on the lake. While it may have been their regular meeting day, and some would consider it a sin to disturb the exercises, our crack sportsman, Ed. C. Alderson, considered it too good an opportunity to be lost. He got his shot gun, and going out on the lake on a small raft, in fourteen shots, killed sixty five ducks in less than three hours.

After cleaning the ducks, and salting them and the fish we caught, we ate our dinner and started for town, where we arrived early in the evening.

We were absent from town nearly four days, had all the huckleberries (both black and red), strawberries, serviceberries, fish, grouse and ducks we cared about eaten, with huckleberry short-cake every day for dinner, and a good time generally; and brought home with us, for future use, over 20 fish and 61 ducks, thus making it both a pleasant and profitable trip.

School District Elections.

The last Saturday in August is School District election day. School Boards are required to give notice thereof by posting three notices not less than six days in advance. But, should they neglect this duty, the people may hold the election without notice. Go to the polls, and elect your best men, and you, who may be elected, study well the educational interests of your district; do your best and pay no attention to lateral growths.—New North-West.

Hayden's Expedition.

Mr. James Stevenson, of Prof. Hayden's Exploring Expedition, was in town this week, purchasing supplies for the parties now en route. The five parties composing the expedition are expected to meet at the Springs about September 1st. From this point, after receiving their supplies, they will separate. One party will work in the north, and the other four on the east, west, north and south sides of it. It is the intention of Prof. Hayden to make a thorough survey of the Park, establish lines, etc. An atlas, showing the geology, topography and economic features of the Park and Montana, will also be prepared and published at as early a date as possible.

Clarks' Fork Bottom Locals.

Hay, oats and wheat all in the stack. Oats average fifty bushels to the acre this year, without irrigating.

Pleanty of ripe water melons here. Make us a visit, Gallatin folks, and we will share with you.

Grass fine, game fat! Mr. Brockway brought in, the other day, one of the finest and fattest antelope I ever saw. There are but very few head of cattle on the bottom but what are fat enough for beef. An unlimited amount of fish in the Yellowstone here, and in this connection it is not out of place to remark that Mrs. Welverton and Miss Newman are the most successful fishermen on the bottom.

Robert Gray passed down yesterday from the Hart mountain mines. He has had enough of them, and thinks he can do better hoeing potatoes.

Mr. Wells passed down last week, en route East, with a very fine lot of beef cattle, purchased on the Muscleshell. He will drive them as far as Cheyenne.

Meeting of the Presbytery—Religious Services.

The Presbytery of Montana will convene Friday evening of this week, at 8 o'clock a. m., and will be opened with a sermon by Rev. M. L. Cook, of Missoula.

There will be a baptismal service at 3 o'clock Saturday afternoon, and preaching at 8 p. m., by Rev. J. D. Hewitt, of Helena. Sabbath services at the usual hours morning and evening.

Communion of our Lord's Supper in the morning, and Rev. J. R. Russell will preach in the evening.

Fort Custer Letter.

Thompson's Visit.—Row at Miles City. Weddings.—Reported Indian Attack.—Mails.—Local Matters, etc., etc.

The Chief Quartermaster for this Department, Chas. Thompson, was here for five days inspecting buildings, etc., and seeing what is required by the Post. It is understood that he made many suggestions for improvements, and stated that he considered this a more important Post than Fort Keogh. He was much surprised to see how far advanced was the erection of buildings, which is due to the watchfulness and activity of Gen. Buell, together with having good Quartermasters who see that orders are carried out to the letter.

Mr. Burop, Post trader, is erecting a residence for himself at the Post. I hear a rumor which gains credence to the effect that a soldier at Keogh went to Miles City a few days ago and got into a row, in some den of iniquity, with a citizen, the result of which was the soldier was shot and killed by the citizen. The report spread to the Post that the citizen was in the wrong, and as the soldier was much liked, a lot of his comrades, determined on avenging their brother-in-arms, went to the scene of action and found that the citizen had, in the meantime, been arrested and locked up. They completely riddled the jail with bullets, but the citizen miraculously escaped being hurt. General Miles set down a company or two of Cavalry, and quelled the disturbance. I hear there were about three soldiers and the same number of citizens killed. I merely give this as a report in circulation here, and unfortunately it seems to be true.

Major Gordon, 2d Cavalry, recently lost one of his children through typhoid fever.

Lieut. Read, our Post Adjutant, recently tied the knots uniting in the bonds of wedlock Sergeant McFarrell, Co. C, 11th Infantry, to a Mrs. Farrell, the Corporal Egan, Co. H, 11th Infantry, to Mrs. Brown. (Can't you send us a few widows from Bozeman?)

A detachment of the 5th Cavalry, which came in from Fort McKinley, reported being attacked by Indians. General Bittel sent Co. M, 3d Cavalry, Captain Mix commanding, to scout the country. They returned and reported only having found trails of a hunting party of Mountain Crows.

The runner still gains credence that Gen. Buell and his four companies of the 11th Infantry will go down the river this fall or early next spring to Lower Brule Agency and Fort Randall, General Buell to have charge of the Indians in the Department of Dakota.

The Chief Quartermaster and Maj. Gordon have left here to select a site for a one company post between this place and Terry's Landing.

There is an immense quantity of freight at the landing now. It is being brought tip here under Mr. Edward Fenlon's contract.

The mails run now from Sherman and Hamilton to this place. The mails, by late accounts, have been tampered with, I hear, somewhere between Huntley and Bozeman. The mail bags were held back at the station where the discovery was made, for investigation. It remains to be seen what will be brought out by the search.

Indians run their horses every day for blankets, etc., and create no end of amusement.

The steamer General Sherman arrived at Terry's Landing yesterday.

Lieut. Tiffany, 11th Infantry, has left on leave of absence. They say he left a perforated heart behind him.

Weather hot in the extreme; but our supply of ice is good.—The flies in this section are very troublesome at present.

The hay contractor is putting in large quantities of excellent hay at short notice. Yours, very truly,

HAWKSHAW.
