GENERAL GRANT'S MI. E.

From the Congress, (Chicago) News. When President Grant stopped at Idaho Springs for a few minutes during his recent flying trip to Colorado, a man, entered the parlor in some haste, approached the President, and in a few words told him he had been with him through the Pendular campaign and was present at the final banquet.

NEW HOP WESTERS.

Best site for a man—Exercise. Lo tied—Captain Jack in chains. The noisiest body of water—A sound. Sweeter than a moonlight night—Nitre. MacMahon smokes fifty cigarettes daily. John G. Sax is on the perilous verge of 60.

A Night at Bismarck.

In the evening I strolled around among the galleries. I found one trading floor which had made a sale of \$750 worth of goods the previous Sunday; for my San day is like every day in the week, only more so. Another firm had made sale of \$16,000 worth of goods in June, and in twelve months sold \$75,000. In the neighborhood, 6,000 acres have been reaped already, and the railroad brought \$28,000 worth of freight the first week it was opened to Bismarck, or 1,000 tons.

BISMARCK'S OPINIONS.

He is Credited with Remarkable Sayings. "The Empire Against the Church." "Let Men Worship the State." New York, July 18.—A correspondent of the World, under date of Berlin, June 20th, makes public a most remarkable conversation with Prince Bismarck, in which the Prince, after giving expression to his views of the spirit, is made to say: "The truth is, there are not a half a dozen men in Germany who are on our side—I mean who clearly comprehend the real meaning of the conflict in which we are engaged, and in which, notwithstanding our success thus far, I believe we shall be beaten. The Emperor does not understand it; if he did he would change sides in a moment. The Crown Prince perhaps does understand it, but he will not do so on the other side, if indeed he is not already there."

It is a fight of the State for the Empire

It is a fight of the State for the Empire; and the monarchy or a Republic against God; and in this fight the State will get the worst of it unless it succeeds in destroying the idea of God and placing itself in His place. Men say they must have something to worship. Well, then let them worship the State. Let it be all in all. Let it take the place of the deity as well as of the Deity—let it be the Deity. In two generations, if we had the faith wholly to ourselves, we could so concentrate the idea of God and of the imaginary rights bestowed on man by Him as His Creator, that the substitution of the church in His place would be effected and the State, as it is, in fact, would be ALL IN ALL.

A Grand Telescope

A million dollar telescope is projected. It is regarded as feasible. Thousands of dollars have been already offered as subscriptions to such a project. Dr. P. H. Van Der Wyde has consulted Mr. Alvan Clark, the great telescope maker of this country as to its practicability. He thinks if the rough glass can be produced a good object glass of four or five feet in diameter could be worked. He can not undertake such a work within two or three years. Dr. Van Der Wyde suggests that the work of obtaining subscriptions go on; that the telescope be built and mounted in the rainless and dry climate of Colorado upon some natural projection of the earth forming a secure foundation and which forms a part of a mountain. The telescope will be one hundred feet long, many many feet in diameter with a counterweight and moved by clockwork. He proposes that the site be selected, cut down and properly shaped so as to form proper support for the telescope and the colossal observatory dome to be built over it, the machinery built in time to have the mirror ground in the observatory and the first object glass cast in the observatory of our Independence, July 4th, 1876. This would be quite as worthy a way to spend our money as in the Centennial Exposition at Philadelphia.—Rural New Yorker.

She Was the Maid

A short time since a gentleman with long hair, whiskers, and dressed in the height of fashion, called at a hotel in Vienna, and requested the shop-woman who happened to be alone, to show him some colored shirts. Every variety of shirts was brought out, when he made his choice and requested that a parcel be made up for him. This being done, "What an idiot I am," he said; "I have not seen how the shirts look when on. Would you please put on by putting one on your own dress?" The shop-woman complied with his request. He then continued, "as to button the collar and wristbands, as I may get a thoroughly good idea of the effect. And now," he added, taking up his parcel, "allow me to wish you a very good morning!" and in an instant he was outside the door and had disappeared, the shop-girl, apparently surprised, not daring to follow him into the street on account of her singular costume.

The Bank Robbers—Not the Best Prof.

Stratford, July 18.—The man who lost his life by falling from the bell air balloon, at Iowa, Mich., on the fourth, was known as Edward La Monte. He was not the real Prof. La Monte who was killed at the battle of Gettysburg, but a man who had been in the same business for some time. He was a man of considerable means, and had been in the business for some time. He was a man of considerable means, and had been in the business for some time.
