We had the pleasure, yesterday, of meet ing the gallant gentleman, who commands this famous regiment, who is in our city on a short visit to his relative. Cant A. L. Hough, of the 19th U. S. A.

Col. Merrill is a fine looking officer and bears in his countenance unmistakeable marks of the energy and earnestness which has rendered the name of his command so conspicuous in connection with the war in Missouri.

His command is scattered through various parts of Northern Missouri and has been most active in breaking up rebel camps and capturing rebel prisoners.

The Colonel gives us the most hopeful accounts from Missouri, and assures us that the rebellion is very nearly played out in that State north of the Osage. The bridge burners and Railroad depredators are being fast picked up, and the certainty of condign punshment being meted out to them, has rendered this sport very dangerous business. All communications with Price's army from the North has been cut off and hundreds are daily coming in voluntarily and asking to have the

oath of allegiance administered to them. Col. Merrill corroborates what we have often heard before, that the rebels in Missouri, generally consists of the very dregs of society, while the better class of citizens, landholders and slaveholders, are generally loyal but have been overawed by the rabble outlaws. Those who are secessionists and and slaveholders have been extrely cautious not to allow their slaves to be used by the cebel army in Mirrourl, since the confiscation act of Congress was parend. He has no doubt but that the large force now pone against Price at Springfield will easily succood in driving him and all his army from the

RESALD'S DISPATCH. The select Committee on the fortifications the great lakes and rivers are premired to make a report. They will recommend the erection of such fortifications at he waw, as will make it the Gibesher, as if really is the key of our North Western frontier. Their report will provide also for the estab lishment of a Navai Depot and National Armory upon Lake Michigan, probably at or near Chicago, and that preparations will be immediately made for the accumulation of necessary arms and munitions to arm the whole of the American vessels engaged in the commerce of the Northern Lakes. It estimated that there are in this trade, 12 00 American vessels to 300 British, and 15. 000 American saliors to 3,000 British.

It is represented by the Committee that the associate of the population of the level Stack is west of the Alles heavy Mountains—that the lineof Lake count exceeds the whole length of our Atlantic coast, and that our commerce on the Likes is greater than our whole foreign trade.

To complete the defences, and render communication with all parts of the Northwest secure from interruption by a foreign foe, it will also be recommended that a military Railroad shall be immediately constructed from the mouth of the Menomonee River, or Bodinoquet, on Lake Michigan, to Marquette on Lake Superior, and that a Ship Canal shall be built from Chicago to the Mississippi, River. Iche said that these recommendations have been approved by Gen McClellan-The report will probably be made on Tuesday. It is known that a number of Southers ecessionists are in Canada whose business is to collect money from sympathizing friends and to forward receive dispatches from Eu-
