MEDICAL.

JOHN BULL'S MPOUND BEEN AN

BITTERS,

The Latest and Most Important Discovery of the 19th Century

JO man's name is more intimately connected with the history of Materia Medica of be United States, or more favorably known as a plo neorin medical discovery, than that of Dr. JOHN
BULL of Louisville, Ky., His inimitable prepara-tion of Sarasparrille, has long stood at the head of the various compounds of that valuable drug. His Compound Pectoral of Wild Cherry has become a househole word throught the west and South, and his Worm Losenges in less than a year after their in reduction attained a reputation as wide spread as he continent of North America. But the crowning discovery, or rather combination, for he does not claim to be the discoverer of CEDRON, which is the besis of the bitters now offered to the public. That honor belongs to the native inhabitants of Central Amelera, to whom its virtues have been known for sore than two hundred years. Armed with it the ans bids deflance to the most deadly malaria, nd handles without fear the most venemous ser

pents. It is a belief with them that while there is breath left in the body the Cedron is potent to cure, no matter what the disease may be. While Dr. Buil is not prepared to endorse this extravagant pretension, he is nevertheless satisfied from a thorough examination of the evidence relating to its virtues, that as a remedy and preventive for all diseases arising from exposure either to changes of weather or climate, or to the miasmatic influences, it stands without a rival, and justiy deserves the reputation it has so long in Central America and the West Indies. In

DYSPEPSID, And its attendars train of symptoms, it acts more like a charm than a medicine. There is nothing in the range of the Materia Medica, that can for a moment bear a comparison with it in this direase.

A full account of this wonderful plant may be found in the 11th edition of the U. S. Dispensatory, pages 1987 and 1388. A series of experiments in which Dr. Bull has been for years engaged, has just been brought to a successful termination, and he is now enabled to effer to the public a combination of Cedron with other spproved tonics, the whole preserved in the best qual-try of copper distilled Bourbon which, which he is confident has no equal in the world.

He might furnish a volume of certificates, but the public have long since learned to estimate such things at their true value. The safest plan is for

every one to test for himself the virtue of a new med-CEDRON BITTERS One trial and you will never use any others.
It is not necessary to publish a long list of discusses for which the Cedron Ritters are a specific.
In all discusses of the Stomach, Bewels, Liver or

Kidneys;
In all affections of the Brain'depending upon Deangement of the Stomach or Bowele;
In Goat, Khenmatism and Neuralgia;

trertment for Cancer, permit me to say that it is the most wenderful discovery ever made in medicine. It is the great desideratum so long sought for by the Medical Profession and the afflicted with cancer, .to operation is truly amountshing, without a parallel, and is the only known antidote to cancer, and all cancerous affections; the modus eperandi of the antidote is apparently by entering into the chemical composition of the cancer, caucorous, malignant or unhealthy growth, thereby removing all life and vitality, actidoting, killing and destroying the cancer, A Lady's or Misses fine Balmoral Gaiter, Lace every particle root ann fibre belonging to it, without pain or the use of the knife; without consciousing or burning; without the lose of blood, or in the least affecting the sound firsh. It can be applied to the naked eye or an open wound, as easily and freely as water. By this means large cancers can be removed from vital parts, the eye, large blood vessels, &c., where no ether treatment could possibly be used; and in doing so we feel assured of making permanent ourse when all other treatment fails. The medical fraternity and all interested are invites to call, and I will exhibit a large number of cancers that I have thus removed and preserved, and if desired will refer to humreds of cases cured throughout the country.
