Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed it is swollen and the inflamed condition can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

# Our new Des Moines factory has a yearly capacity of 1000 silos. INDIANA SILO. The Hargrove agency sold 120 Indiana silos in Iowa during the past month.

It is made of best lumber; they own their own timber land, and have their own Mill. It has the best ladder front door frame; the doors are made so they are absolutely air tight and no iron to come in contact with the ensilage. Hoops made of 5-8 round Iron.

The silo is no experiment but a necessity if you make farming pay on high-price land. There is only about 5 per cent. shrinkage on ensilage and you can carry from 40 to 50 per cent. more stock with the same amount of land.

Milk can be produced cheaper in the winter time with Ensilage than in the summer with pasture.

The round Stave Silo is generally considered by ensilage users to be the best style.
