ANOTHER EARTHQUAKE PREDICTED FOR SICILY
Expert Declares Other Planets Are Stretching This One.
Messina, Sept. 28.—Frank A. Perret, the American volcanologist, believes from his scientific deductions that this part of Sicily will again be the scene of seismic disturbances.
"September 29 is the date most favorable for earthquakes or eruptions," said Perret. "At that time the sun, earth and moon are in line with each other, and the moon also is in its nearest approach to the earth. This combination occurs frequently, tending to produce gravitational distortion of the earth's form."
"This extra strain often acts upon the weak spots in the earth's crust, causing them to give way and thus producing earthquakes or volcanic eruptions."
"On Wednesday it happens that the planet Mars also is nearest to the earth and also almost directly in line with the earth, sun and moon, while Saturn is not far from the same line. Jupiter, although far on the other side of the sun, is also in a line with the earth."

Sept. 28.—In a divorce case filed in the Menominee court, Mrs. Margaret Van Ripper of this city charges that her husband, Richard Van Ripper of Calumet, induced her to borrow money from a friend and that after she had obtained it from him and given it to her husband, he accused her of having committed a grave offense in order to obtain it.

Where the Honeymoon is Long.
Marriage among Moslems in India is followed by other ceremonies. The bride with the bridegroom is taken back to her father's house after four days, then again she comes back to her husband's home after ten days, stay, and then after a stay of 20 days returns to her father's house for at least six months. Thus instead of having a short period of honeymoon they make it last almost a year.
The Terror of the Meter.
With a family of half-grown children it is often difficult to keep the gas bills within reasonable limits. We hit upon the plan of sending each child to look at the meter while the gas is burning. The steady tick-tick-tick of the indicator moved around the dial impressed upon their minds the idea that burning gas is burning money, and a decided improvement has been shown.—Harpers' Bazar.

OPENING OF THE STANDING ROCK AND CHEYENNE RIVER INDIAN RESERVATIONS
Registration at Mbridge, Lemmon or Aberdeen, S. D., October 4 to 23.
The opening of the Standing Rock and Cheyenne River Indian Reservations in South Dakota and North Dakota in October will give about ten thousand people 160 acres of fertile farming lands for a small sum per acre. The government has appraised these lands at 60 cents to \$6 per acre.
If you intend to engage in farming or are now farming and wish to change your location, why not register for one of these farms? You may be successful in the drawing for these lands.
Aberdeen, South Dakota on the Chicago, Milwaukee & St. Paul Railway, and Mbridge and Lemmon, South Dakota, on the Chicago, Milwaukee & Puget Sound Railway, are points of registration. You can register any day from October 4 to 23. The drawing will take place at Aberdeen on October 26.
The land in the counties to the east of these reservations now sells at \$25 to \$30 per acre.
This land opening will also give you a splendid opportunity to see the wonderful country opened through the construction of the new line to the Pacific coast, at small additional cost over your railroad fare to points of registration.
