ORGANIZE ASSOCIATION.

At the invitation of Prof. C. M. Evans of the Lenox College Agricultural department, the breeders of Holstein cattle in this part of the state met at Hopkinton last Saturday and organized the Northeastern Iowa Holstein Breeders Association.

The following officers were elected:

President, Prof. C. M. Evans, Hopkinton, Iowa.

Vice-president, Rudolph Bohren, Monticello, Iowa.

Secretary, T. J. Joseph, Hopkinton, Iowa.

Treasurer, Jacob Platt, Hopkinton, Iowa.

Dr. E. E. Reed and J. Platt of Hopkinton and D. Schmittler of Delhi were appointed as a committee to draft articles of organization.

The objects of the organization are to co-operate with the state and national association in boosting and improving the breed.

To secure foundation stock for beginners.

To meet annually for studying judging types and managements.

To co-operate in having official advanced Register tests conducted.

To co-operate in the sale of surplus stock.

The next meeting is called to meet at Lenox college next February during the agricultural short course at which time a special day will be devoted to a study of dairy herds.

If you live in Northeastern Iowa and are interested in Holsteins either grade or pure bred, send the president your name stating the number of cows kept and interesting information will be sent you from time to time.

After the meeting adjourned those present were taken over to "Urbanside" farm to inspect the fine pedigree Holsteins owned by Reed and Evans, J. Platt and others.

All present were enthusiastic as to the possibilities of the organization. Prof. Evans intends to push the organization of similar local organizations of various breeds of live stock to aid in improving the class of stock kept in the section of the country that is helping the Lenox college Agricultural department.

LOCUSTS SAID TO BE COMING

State officials have sent out a warning to Iowa farmers to be on their guard against the arrival in the spring time of the seventeen-year locusts, which will make their appearance in these parts shortly after a prolonged absence.

It is stated by authorities that some time within a few weeks the locusts will come from the south and deposit their eggs to be hatched in the early spring and even now the state entomologists are urging the farmers to give their trees a coat which will prove a benefit to them.

The farmers throughout the state are warned by the officials to guard against these destructive vermin and to put a coating of some material objectionable to the locusts that will drive them away. In their report the entomologists call special attention to the injury wrought by these pests, which have destroyed many trees and killed off hundreds of new orchards and nurseries.

Gypsy and brown tail moths are also other destructive insects that have of late made their appearance in West Virginia. These moths are generally found in England and they like locusts, prove very destructive to the fruit trees, and the farmers attention is also called in the report to keep a careful lookout for these insects.

Mennonites' Founder.

The Mennonites take their name from Menno Simons, born in Witmarsum, Holland, in 1492. He entered the priesthood of the Roman Catholic church, renounced Catholicism early in 1536. A severe persecution began to make itself felt against his followers, and having heard accounts of the colony established in the new world by William Penn, they began to emigrate to Pennsylvania near the end of the seventeenth century.

Mother Love Not Sufficient.

It takes far more than mere mother love to bring up children. It takes training, study, knowledge. It takes self-control in the parents themselves. The mother who spoils a child through weak indulgence does not truly love her child. She loves her own pleasure in going along the line of least resistance—Exchange.

Horses' Teeth Gold Filled.

There are valuable race horses in England which have teeth filled with gold. It is too risky to have such horses suffer, and go off their feed when racing time approaches.
