

Your Boy's Life's Work

What Shall It Be?

CREDIT MAN?

Not a detective in the ordinary sense of the term, but one who makes himself familiar with the commercial integrity of the community and whose skill and trustworthiness in this delicate business are of the greatest service to merchants and others in determining the responsibility of prospective customers.

Of course, your boy is bound to be manager of the credit department; for what he has been preparing for, and this will come, perhaps, by the time he is 20 or a little less, according to the zeal and intelligence and keenness that he has shown in lower positions. From an investigator, or detective of promise, who is given some of the most intricate cases to handle, and when he earns probably \$50 a week, he is made assistant manager, if the establishment is of considerable size, at \$3,000 to \$4,000 a year, and then manager, which pays anything from \$5,000 up to \$10,000, according to the magnitude of the business.

By this time he is one of the most important men connected with the firm—some say the credit man is the most important—his opinion will be sought by the most important of anybody and everybody that wishes to buy goods, and he has become an authority on human nature. Frequently he will be able to read a man at sight, so great will have been his experience and the acumen that has resulted therefrom, and the exercise of this faculty will save his company thousands of dollars through the unwise extension of credit.

Of course such a man is bound to be a member of the firm, if he remains with it; but in this case he would be succeeded in the credit department by another direct manager, and himself would exercise only indirect supervision. If his ambition led toward continuing the credit line, he would be a likely candidate for the management of a credit association, either one of the large independent institutions, such as Bradstreet's or Dun's, or one that has been formed by merchants of others in a single general line for mutual protection, such as the lumbermen's, or the credit association of retail merchants in New York city.

In these cases his services would be almost invaluable; for it is with his powers to be one of the few men really competent to conduct such a business with absolute justice, protecting his firm or associates against deadbeats and irresponsibles, and at the same time being so just as not to lose custom. Some men are entirely worthy of credit for a few hundred dollars, but could not be safely trusted for two or three thousand; just as a man might be able to pay monthly instalments of, say, \$25, but could not afford to pay a single bill of \$50, though he might delude himself into thinking he could. The keen credit man, such as your boy may become, often knows men better than they know themselves.

Historic Spots Marked.

All of the historical spots in old Castine have been marked by tablets. The spots of the Cape Breton mission and St. Peter's chapel are marked by crosses and also descriptive tablets. These tablets and markers cover only the Pentagons, St. Castine, revolutionary and 1812-1814 periods, the municipal being left for some future time. The descriptions on the tablets have all been drawn from original sources of information. Together they record two centuries of conflict. It is the hope of Charles W. Noyes, who was chairman of the committee in charge of this work, that they will serve to give Castine a better appreciation of her ancient glory.

Usefulness of Feed Cutter.

Particularly Beneficial in Chopping Hay and Fodder, Because Quantity Can Be Measured.

No farmer who owns even three head of stock can afford to think of a feed cutter, although there are thousands of good-sized farms that have never yet introduced this useful little machine.

In England 90 per cent of all the farmers use cut feed, only 10 per cent being adverse to the use of the cutter.

The feed cutter is particularly beneficial in chopping hay and fodder, because the quantity may be more easily measured, and when chopped and mixed with a small amount of water all dust is prevented.

When hay is scarce, clean cut straw chopped with hay and mixed with bran meal, and slightly moistened, aids mastication and digestion.

Chopped feed is particularly good for work horses when they have but a comparatively short time in which to feed. A horse is unable to masticate a sufficient amount of roughage within a few minutes and where the feeding time is shortened by stress of work the feed should always be chopped.

These machines can be run by power or hand and are so inexpensive that the cost is no reason why every farmer should not avail himself of their use.

Perla of Today.

The population of Perla is believed by old residents to be about twelve or thirteen millions. The climate and general character of the country resemble those of Arizona and California, except along the north coast, which resembles South Carolina. The people are largely Mohammedans, but very friendly toward foreigners since the adoption of the constitutional system.

A Good Speaker.

"Is he a good after-dinner speaker?" "Splendid! He always begins his speeches by saying, 'The hour is getting late and I will not detain you.'"

"A lot of after-dinner speakers say 'I know, but he's good in that he never does detain them.'—Detroit Free Press.

Safe Chaperon.

Patience—your aunt troubled with insomnia?"

Patrice—No, indeed! You don't think Will and I would have her for a chaperon if she was, do you?—Yonkers Statesman.

Indians as Diplomats.

"I have often wondered why the diplomatic corps of this country did not employ Indians," said W. J. Ker-shaw in an address on "The American Indian" at the first fall meeting of the Wisconsin Archeological society.

"They possess the one supreme quality of diplomat—ability to control their tongues. In addition to this the American Indian is an orator of a mean quality. He is a good worker, and it will be found that as soon as the white man stops treating the In-

LIVE STOCK

BUILDING A \$5 HOG HOUSE

Low Cost and Ease With Which They Can Be Moved Should Recommend Them to Breeders.

The hog house shown in the accompanying illustration is ten feet long by five feet wide, the shed seven feet, and the open pen in front three feet. The pen is three feet high, the shed four feet at front, sloping to three at the back. Our corner posts, 2 by 4, three feet long, and two upright at front of roof, 2 by 4, four feet long; six boards one foot wide and 15 feet long make the sides and ends; boards one foot wide and seven feet long, cut from corner to corner, will give necessary slope to the roof. The roof may be of board, iron, or any roofing. If iron is used, it should be laid over building paper to prevent sweating, writes Stanley Wells in the American Agriculturist.

If made of pine these houses cost about \$5 each, but when made of native lumber they cost less. When a lid is put over the opening in front the same one-half inch holes are bored through the boards for the moisture to pass through. These holes should not be bored in regular rows as the wood is more apt to break out easier if the grain is thus broken, but by arranging so that no two holes are in a direct line along the horizontal length of board the planking will last far longer. The stall floor should have a slight slant to this point, and the gutter must have slope enough to drain all moisture outside to the compost heap.

The Hog House in Position.

Houses are weatherproof and safe for farrowing sows at any season. In extremely cold spells I have warned them with a small oil stove and made them as comfortable as a high priced, artificially heated house could be made.

Five ten-foot boards make a floor, which can be laid in seasons when one is necessary, and when not in use can be easily taken up and stored away for another year. Any man can easily move one of these houses with a stoneboat, and when they are to be moved a distance, two can be put on a hay frame. The low cost and the ease with which they are moved should recommend a house of this kind to the renter, who is liable to find poor facilities for hog raising on many farms.

FEEDING RACK FOR SHEEP

Illustration Showing One That is Very Convenient and Prevents Accidents in Slat.

The accompanying illustrations show the construction of a sheep rack that is very convenient and safe. It was made by M. A. Jones of Colorado at the Farm and Home. It often happens that in a carelessly constructed sheep rack the sheep get their necks caught in the slats and are strangled. This rack prevents anything of the kind from occurring. The slats are made of inch boards rounded at the top and about eight inches high. C is a movable side which may be dropped down to prevent the sheep from eating out of the rack. This side is regulated by a piece of strap iron, d, which fits into the slot in the side piece of the rack, a. E is a box-like projection in the center of the rack which keeps the sheep from getting their heads caught in it. The ends of this rack are hinged in such a way that they may be readily opened for cleaning.

Details of Safe Sheep Feeder.

Pigs With Mange.

For pigs with mange sprinkle a little coal oil down the spine, around the head and ears and under the legs. The next day scrub the entire pig with warm water and rosia soap. Mix a little hickory wood ashes in the water, rub dry, then grease with crude petroleum, which is the same as coal oil before it is refined. Clean out the pens, dust with air-slaked lime, then give bed of dry leaves. Mange comes from sleeping in hot manure or wet straw.

Sheep Are Profitable.

Sheep require less attention than any other farm animal. They do not have to be curried or brushed or washed; neither do they have to be tied with halters or confined with stanchions. All they need is good feed, clean water and absolutely dry shelter, and for this care they will return a better profit considering the investment than any other animal on the farm.

Handle Ewes Carefully.

Ewes should be handled very carefully and all openings where they pass through should be wide enough to prevent crowding. Many dead lambs are born when the ewes are compelled to pass through tight openings and kept in a crowded place.

Grow Hogs.

Every farmer should grow hogs, if only enough for home use. Of course, we would not advise the farmer to grow more hogs than he can properly feed and handle. The farmer must grow some class of live stock for meat, and the hog is about the easiest and cheapest to handle.

500 REFUGEES ARE BURNED

Chinese Villagers Destroy Wandering Bands of Hungry Plunderers Who Rob and Kill.

Victoria, B. C.—Rendered desperate by hunger and cold, and starting refugees are roving through the famine stricken area of China, plundering and killing, and a reign of terror prevails, according to persons who arrived here on the Tamba Maru, which reached port Thursday from the Orient.

At Kunshan, a walled village within 50 miles of Shanghai, the villagers, after a desperate raid in which stores were looted and many killed, meted out punishment peculiarly Chinese in its callousness to the raiding refugees. A band of more than 500 are reported to have been surrounded in a compound and burned to death.

Champion Johnson Is Fined.

San Francisco.—Paul Orchard, the world's champion pugilist, was fined \$100 by Acting Police Judge Conlan Thursday for driving his automobile at an unlawful speed. Johnson, at once served notice that he would appeal the case to a higher court.

Puts Negro in Federal Office.

Washington.—James C. Napier of Tennessee was named by President Taft Thursday to be register of the treasury. Napier is a negro.

Married in Jail Cell.

Chattanooga, Tenn.—Dr. J. W. Sherman, in custody here for the murder of his brother-in-law, Thomas Norman, was married in jail Thursday to Miss Cleo D. Lucas of East Chattanooga. Miss Lucas met Sherman just before the murder of Norman.

Naval Man's Son a Suicide.

San Francisco.—Paul Orchard, twenty-two years old, son of Capt. John M. Orchard of the cruiser West Virginia, committed suicide Thursday by drinking cyanide of potassium.

Winner of Nobel Prize Dead.

Berlin, Germany.—Prof. Jakob Heinrich Vanux Hoff, the chemist and author, died here Thursday. He was professor of chemistry at Berlin university and in 1901 received the Nobel prize of \$40,000 for research in chemistry.

Mathews (Ind.) Bank Robbed.

Marion, Ind.—The Farmers' State bank of Mathews was entered by robbers Thursday, the safe blown and a sum of money estimated between \$3,000 and \$5,000 taken.

KILL PARCELS POST

SENATOR BAILEY'S POINT OF ORDER AGAINST EXPERIMENTAL PLAN IS SUSTAINED.

EXTRA SESSION IS ASSURED

March 20 is Tentatively Fixed as Date for its Assemblage—Tariff Board Bill is Temporarily Withdrawn.

Washington.—The plan for an experimental parcels post was killed Thursday. Senator Bailey of Texas made a point of order against the amendment of the post office bill which authorized the plan, and the bill was killed. April 1, 1911, to conduct for one year an experimental parcels post system. On Bailey's insistence that this was new legislation, Vice-President Sherman ruled the point of order well taken and an amendment was eliminated from the bill.

March 20 is the date now tentatively fixed for the assembling of the extra session. A conference to be held between now and Monday will definitely fix the date. That the extra session is certain is the firm conviction of all the Republican leaders.

Representative John Dwight, Republican whip of the house, who all along has insisted that a special session would not be necessary, has capitulated and confessed his belief that it would be unavoidable.

Following a filibuster that lasted many hours, intended to emphasize the Democratic objection to the proposed enactment of the tariff board bill, the men behind that measure saw they were fighting against the inevitable and withdrew it for the time being.

Immediately the consideration of appropriation bills was begun and within twenty minutes four measures carrying an aggregate expenditure of \$102,000,000 were passed.

This relieved the congestion in the senate only a trifle and did not remove a single one of the snags that still are in the way of adjournment with the entire administration program carried out.

The measures thus passed were the pension bill, carrying \$153,658,000, the fortifications bill, the consular and diplomatic bill and the bill for the support of the military academy.

The Sulloway pension bill, which would have added \$50,000,000 to the annual appropriations, it is claimed, was offered by Senator Scott as an amendment to the pension bill and ruled out on a point of order made by Senator Lodge.

ITALIAN PRINCESS IS SLAIN

Lady in Waiting to Queen Helena Shot to Death by Baron, Who Attempts Suicide.

Rome.—Baron Paterno, a cavalry lieutenant, shot and killed Princess Clula Trigona, lady in waiting to Queen Helena, Thursday. The baron then attempted suicide, but was unsuccessful.

The lady took place in the Hotel Rebecchino, the trying place of the two members of the Sicilian aristocracy. Some time ago Prince Trigona realized that his wife was bestowing her affection upon Baron Paterno at clandestine meetings, and he instituted legal proceedings with a view to obtaining a judicial separation. Baron Paterno's decision was ready to be given out, but because of the high standing of the parties concerned, the presiding judge decided to attempt reconciliation.

It is said the prince was ready to pardon his wife's unfaithfulness if she would consent to renounce Paterno. The princess acquiesced. On her way to court, where the affair was to be finally settled, she stopped at the hotel for a last meeting with the baron.

According to the authorities, Baron Paterno decryed the princess to the hotel, where he demanded that she elope with him. When she refused he strangled her, afterward shooting her.

LIVE STOCK NOTES

For pigs, it is better to cook potatoes and mix them with corn chop, adding salt. The farmer must grow some class of live stock for meat, and the hog is about the easiest and cheapest to handle.

OUT OF A JOB.

Friend (consoling)—So you're lost your job, eh? Well, don't worry about it. I reckon you was only wastin' your time in a place like that.

Young Bill (sadly)—Yes, that's what the boss told me when I fired me.

COULD NOT STAND SUFFERING FROM SKIN ERUPTION

"I have been using Cuticura Soap and Cuticura Ointment for the past three months and I am glad to say that they cured me of a most annoying skin eruption. It began by my noticing red blotches appearing on my face and scalp. Although they were rather disagreeing, I did not think anything of them until they began to get scaly and dry and to itch and burn until I could not stand the suffering. Then I began to use a different soap, thinking that my old kind might be better, but that didn't seem to do any good. I went to two different doctors but neither seemed to relieve me. I lost many nights' sleep in continual scratching, sometimes scratching till I drew the blood on my face and head. Then I started in to use the Cuticura Remedies and in two months I was entirely relieved of that awful pest. I am so delighted over my cure by Cuticura Remedies that I think that my old kind might be better, but that didn't seem to do any good. I went to two different doctors but neither seemed to relieve me. I lost many nights' sleep in continual scratching, sometimes scratching till I drew the blood on my face and head. Then I started in to use the Cuticura Remedies and in two months I was entirely relieved of that awful pest. I am so delighted over my cure by Cuticura Remedies that I think that my old kind might be better, but that didn't seem to do any good. I went to two different doctors but neither seemed to relieve me. I lost many nights' sleep in continual scratching, sometimes scratching till I drew the blood on my face and head. Then I started in to use the Cuticura Remedies and in two months I was entirely relieved of that awful pest. I am so delighted over my cure by Cuticura Remedies that I think that my old kind might be better, but that didn't seem to do any good. I went to two different doctors but neither seemed to relieve me. I lost many nights' sleep in continual scratching, sometimes scratching till I drew the blood on my face and head.
