"You had better get out of here, you don't want trouble.

"I've got something to tell you. If you don't want trouble yourself, you had better listen to me." "What! Threatening me, are you Vamose, or I'll quicken up that dog

trot habit of yours considerably. Git!" and Martin Bayne made a run for the doorstep where his rifle lay. With a dejected air, but quite sprightly, ragged, limping Coyote Pete hastened his steps from off the Bayno domain. He had disappeared by the

time its proprietor had turned around ready to carry out his threat. Bayne shrugged his shoulders and resumed tightening the girths of his horse. He had acted brusquely for good reasons, he told himself. It was the frontier Montana rule. To his way of thinking Coyote Pete and his ilk belonged to the rubbish heap, so he had made short work of him.

"Why, father, wasn't that rather rude?" inquired his daughter, Ruth, stepping through the doorway. She was pretty as a picture. Her sleeves were rolled up, and her shapely arms showed dimpled and smooth. Her long, neat apron was flecked with flour, for this busy maid was both mistress, and cook of the lonely Bayne home.

"Rude!" repeated the ranchman carelessly. "It's the only way to treat such cattle as that. There isn't a worse loafer on the range. He's been wire-cutter, raider, and is a beggar when he isn't on the verge of the delirium tremens. It's all your fault, his coming here. You encourage him by giving him a snack whenever he takes the fancy to wander by, and now he's making a regular station of it. I'll be back before midnight. Expect your company about dark, don't you?"

"I think so; I hope so," replied Ruth with a quick blush and brighten-

"I understand your young man and some friends are coming through on the stage this evening?" "Why—yes," replied Ruth slowly.

ed that during some recent storm a large tree had been bent over and half uprooted by the force of the wind. The roots had been partly broken, but in sinking back to its old position the top of the tree had caught under the heavy branch of another tree a hundred feet distant. This held the inclined tree as in a vise,

but at a tugging tension. In the hole formed where the roots had given way the men Pete had described were hiding awaiting the coming of the stage coach.

Ruth crept cautiously around to the spot where the top of the tree was caught. Her experienced eye told her that this, once released, would shoot back to its original position with catapult force. She had a long, sharp knife in her belt. She climbed the smaller tree and endeavored to cut through the limb that held the larger tree captive. For nearly an hour she hacked and clipped. Suddenly in the distance she heard the echoing hoots of the stage coach horn saluting some lonely mountain cabin. She could see the men in the tree hole getting ready to rush out when their anticipated vic-

times came within sight. "Oh, I must hurry! hurry" breathed Ruth ardently, in breathless excitement, and renewed her endeavors with redoubled ardor with blistered

bleeding hands. R-rip snap crash! Like a stricken giant rising from the dust, the great tree at last tore free from its fetters. There were shouts of dismay and frantic yells of pain as the roots sank back into place, shutting the baffled plotters into a sure prison.

Again the winding horn. Ruth ran out into the road. She stood in its center, a statuesque and heroic figure in the white moonlight. The stage coach came to a stop. Her lover sprang out, and Ruth was enclosed in his loving arms.

It did not take long for Ruth to explain. The driver and passengers managed to dig away the sandy loam from the disturbed tree roots. Crushed and subdued, the outlaws were dragged out and secured. Ruth had saved the passengers injury and her lover the little fortune he carried with

Long before the wedding, the out laws were convicted. Then Pete be came the handy man about the Morse place, where his greatest satisfac tion seemed to be to enjoy the loving happiness of Rodney and his frontier

bride. (Copyright, 1913, by W. G. Chapman.)

Couple Gave Up Struggle for Some thing That Really Was Not Worth All It Was Costing.

The night that a young man and his wife decided to quit the struggle for social position is described in Harper's Bazar in "The Confessions of a Climber" as follows:

Hardest Work That the Farm Horses Are Called Upon to Perform-Keep Shares Sharpened.

Plowing is at best the hardest work our farm horses have to perform. Few plow teams are not doing 10 to 30 per cent, of unnecessary work. The writer has seen plows which he believed were pulling 50 per cent harder than they should, writes E. W. Hamilton in an exchange.

We are told that about 50 per cent. of the draft of a plow is due to the woods or walking in the country than cutting of the furrow slice. The condition of the cutting edge must then good one—is as essential as other live be of first importance. Expert plowmen recognize this and in competitions file their shares to knife edges. REALLY GOOD RECIPES CANADA WINS AGAIN

THE COLORADO SILVER TROPHY FOR OATS WON A SECOND TIME BY CANADA.

Canada's West is winning for the second time the magnificent \$1,500 silver trophy awarded by the State of Colorado for the best peck of oats. At Columbus, Ohio, in 1911, J. C. Hill & Sons of Lloydminster, Saskatchewan, placed a peck of oats grown on their farm in competition, with oats from every part of the world. The judges had no difficulty in deciding, and the award was given to the Saskatchewan grown oats. In 1912, the Corn Exposition had no exhibition, and our Canadian friends, although ready for a second contest had no opportunity. was held at Columbus, S. C., and it is said of it that it was one of the best yet held. At this exhibition; which comprised corn and all the smaller grains, Hill & Sons of Lloydminster had on exhibition for the contest another peck of oats grown on their Saskatchéwan farm, in 1912. There was no trouble for the judges, no time necessarily lost in reaching a decision, Hill & Sons won, and for the second time their name will appear on the crest of the cup. The third space will doubtless be occupied by their name,

theirs. During the past few years Western Canada grains—wheat, oats, barley and flax—have been in competition with grains from all other countries, and in every case their superiority has been shown. It is not only in oats, but it a neighbor is just what she wants to is in wheat, in barley and in flax, that | find out. Canada more than holds its own, when placed side by side with grains from

other parts. Mixed farming is taking a strong hold not only in those parts of Manitoba, Saskatchewan and Alberta, which up to the present have been devoted solely to grain growing, but also in the districts contiguous, where the conditions of climate, shelter, water, grass and hay make farming of this kind, easy to prosecute and large in profits. It was in the Province of Manitoba that the steer was raised that carried off the Championship of the steer class, at Chicago last December. This beast had been fattened on the grass and hay of the Province

and the only finishing grain it had was barley; not an ounce of corn. Western Canada presents innumerable opportunities for the big farmer who wants to cultivate his thousands of acres, the medium man satisfied with a few hundred acres, the man who is content to farm his free homestead of one hundred and sixty acres; it has opportunities for the investor, the capitalist the business man, the manufacturer and the laborer.
